ABOUT US

Number 2 Organics was born out of a partnership between Malibu Compost - the leader in the true organic and Non-GMO soil market of the lawn and garden industry, BoBerg Engineering - one of the top soil engineering firms in the country, and Greenstone Materials - an industry leader in reclamation and recycling. The three came together during the remediation of century old dairy farms in a beautiful Southern California valley.

We've captured the biology, nutrients, dairy cows, families, farmers and soil that went into years of farming this incredible piece of history.

Our soil and toxicology testing told us we were sitting on a goldmine of clean, beautiful, healthy topsoil and manure that should not go to waste during the transition of these historic dairies.

“The life in this soil needed to get into people’s gardens, into the hands of organic gardeners looking for quality NOP organic compost, topsoil and potting soil.”

- Malibu Compost

Malibu Compost brings years of organic and biodynamic farm composting experience to Number 2 Organics. There is no BETTER line in the GOOD-BETER-BEST scale for your organic needs, hence the name Number 2 Organics.

It’s the next generation of Organic and is a truly unique product line in the mid-priced soil market.

FARM MADE ORGANIC COMPOST

The second best farm made organic compost available on the market today. Made in partnership with Malibu Compost, this compost comes from century old dairies that had cows living on pasture in farms from years gone by. Our Farm Made Organic Compost has many uses for your garden, landscape, farm or homestead. Use it as a topdress to amend your soil. Add it to potting soil or planting mixes that don't have enough organic matter. Use it to break up clay soil or repair chemically damaged and compacted soil.

Available in 1 cf bags and 2 cy totes.

INGREDIENTS:

Compost (dairy cow manure, wood shavings, volcanic rock dust, concentrations of yarrow, chamomile, valerian, stinging nettle, dandelion and oak bark).

FARM MADE ORGANIC COMPOST

DIRECTIONS FOR USE:

TOPDRESSING

Cover all planting areas, raised beds & containers with 1" to 2" of compost, then water in. Topdress your entire garden every spring, summer & fall.

IN-GROUND PLANTING

Mix 50% compost with 50% native soil at planting.

AMENDING

Mix in 2" - 3" of compost to your existing raised beds & containers to amend & revitalize the soil.

LAWNS

Cover seed with 1/4" to 1/2" of compost, then water. For sod, use 1/2" to 1" of compost as an underlay, then water before placing sod.

INGREDIENTS:

Compost (dairy cow manure, wood shavings, volcanic rock dust, concentrations of yarrow, chamomile, valerian, stinging nettle, dandelion and oak bark).

STORAGE: keep in a cool, dry place out of direct sunlight, rain and heat.

PRODUCT PERFORMANCE: best if used within 1 year of purchase. Information regarding the contents and levels of metals in this product is available on the internet at:

PREMIUM ORGANIC TOPSOIL

Our Premium Organic Topsoil comes from 8"-12" beneath the surface of century old dairy farms in a beautiful Southern California valley. We have captured all of the high organic matter and microorganisms that thrive in this premium soil. Our topsoil is perfect for filling the bottom of raised garden beds, one of the biggest problems that veggie gardeners face. It is an excellent underlay for new sod and a great topper for lawn seed. There is no topsoil in the marketplace that has the vitality, life and clean sourcing as Number 2 Organics.

Available in 1 cf bags and 2 cy totes.

INGREDIENTS:

Topsoil, aged dairy cow manure, and concentrations of yarrow, chamomile, valerian, stinging nettle, dandelion and oak bark.

PREMIUM ORGANIC TOPSOIL

- Clean, multi-use garden soil
- Contains aged dairy cow manure
- Adds organic matter to existing soil
- Perfect for covering lawn seeds and as an underlay for new sod
- Great for filling the bottoms of raised garden beds
- No chicken manure or municipal green waste

1 CUBIC FOOT (28.3 LITERS)

2

PREMIUM ORGANIC TOPSOIL

DIRECTIONS FOR USE:

ADDING ORGANIC MATTER

Cover all planting areas where necessary, with 1" to 2" of topsoil, then rake and level.

COVERING LAWN SEED AND SOD UNDERLAY

Cover seed with 1/4" of topsoil, then water. For sod, use 1/2" to 1" of topsoil as an underlay, then tamp down and level before placing sod.

FILLING AND LEVELING

Fill holes and uneven areas of the lawn or garden with topsoil, then tamp down to even surface.

FILLING RAISED BEDS

Fill the bottom 1/3 of the raised bed with topsoil, then cover with our Premium Organic Potting Soil and fill your bed to 1" below the rim.

INGREDIENTS:

Topsoil, aged dairy cow manure, and concentrations of yarrow, chamomile, valerian, stinging nettle, dandelion and oak bark.

STORAGE: keep in a cool, dry place out of direct sunlight, rain and heat.

PRODUCT PERFORMANCE: best if used within 1 year of purchase. Information regarding the contents and levels of metals in this product is available on the internet at:

2

A large pile of dark, rich compost is being processed by a blue conveyor system. The conveyor is dumping the compost into a large pile. In the background, there are yellow excavators and a clear blue sky. The scene is outdoors, likely at a composting facility.
