Over 370 years of history are proof of our commitment to quality. Fiskars products are ingeniously functional, uniquely user-friendly, impressively long-lasting and aesthetically iconic.

Relentless

Working hard is in your DNA.
Which is why every day, you go out there and dig.
Pry. Strike. And demolish. Your work is rigorous.
Relentless. And unforgiving.
And at the end of the day, you hurt.
We feel your pain.

Truth is, there are plenty of tools out there
that “get the job done.” But how many of
them can also say they work for you?

We can.

We work tirelessly to design tools that not only
perform and last, but reduce negative impact
on your body. It's called Advanced Human
Engineering and it's a process of study, design
and validation that puts you at the center of it all.
It's ruthless. But at the end of the day,
it solves problems. Real problems for real people.
And that is the heart of our design DNA.
