

The image features three Fiskars pruning shears arranged in a triangular pattern on a tree trunk. The shears are black with orange accents and are positioned as if they have just cut through a piece of wood. The background is a close-up of the rough, textured bark of a tree. The lighting is dramatic, highlighting the sharp edges of the blades and the texture of the wood.

Why is Fiskars #1 in cutting?

Guaranteed for life

Fiskars tools are designed for longevity and are guaranteed to maintain exceptional performance season after season. We are proud to include a Full Lifetime Warranty with nearly every item.

Durability & quality

We are committed to designing and offering high quality tools that stand the test of time. Not only do we use the very best materials, Fiskars tools also must pass rigorous lab testing to guarantee lasting performance.

Innovation

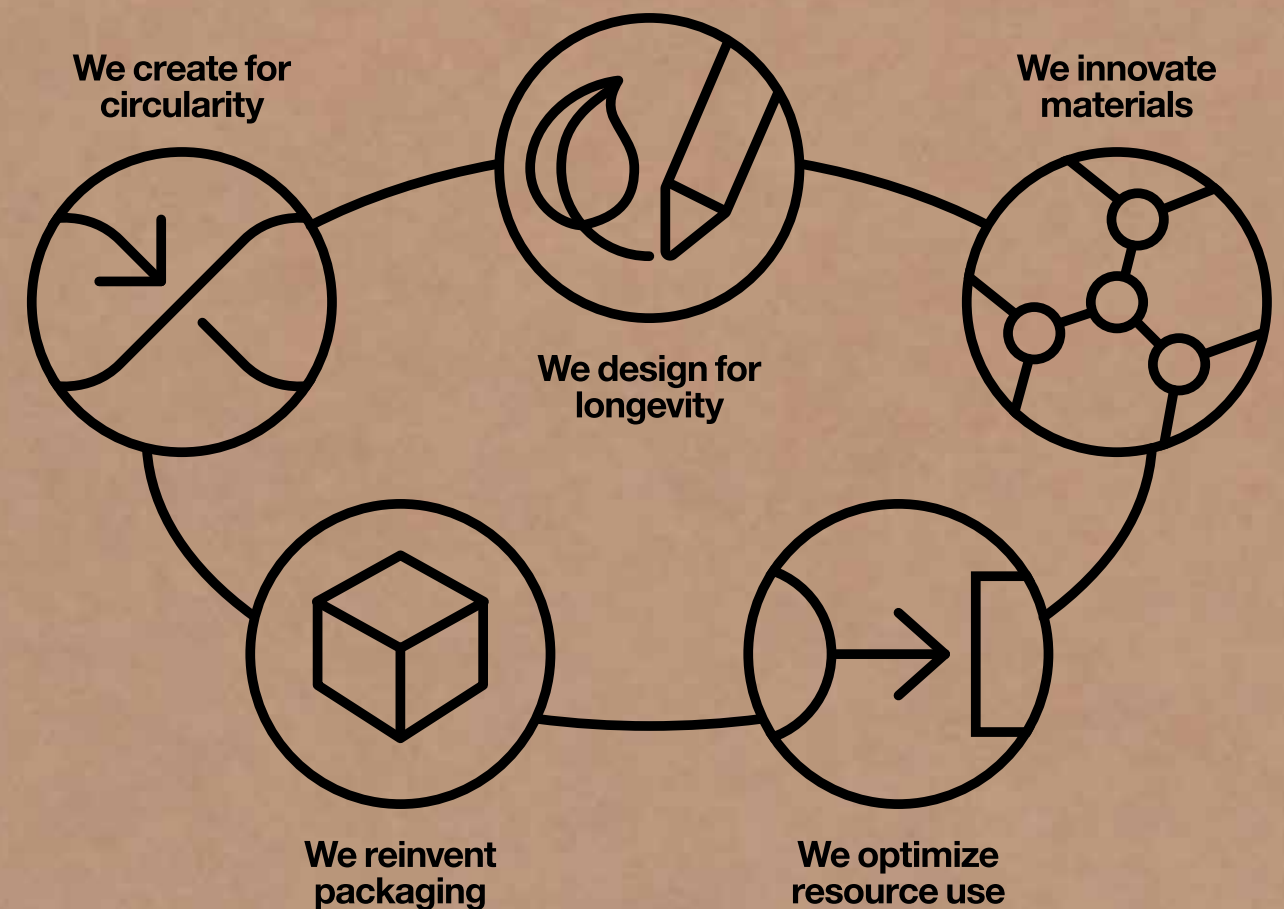

We have developed hundreds of patents and technologies, which allow our tools to outperform the competition and feel like a natural extension of your body.

Design philosophy

We submerge ourselves in segmentation studies, immersive consumer interviews and usability research to find ingenious ways to continually improve our products. As a result, we've won many awards, including prestigious RedDot Best of the Best Design Awards.

We take action for the environment

Doing what we love brings us happiness. To really enjoy the activities we love, and make a positive impact beyond our homes, Fiskars takes action for the environment. Every product detail is designed for the best of the user and the environment, increasing sustainability and overall happiness.

Plant seeds, help bees

About the small but mighty bee*

20,000+ bee species globally,
7 honey bee species

1 honey bee colony
can contain **10,000+ bees**

33% of the food we eat relies on bee pollination. Without bees, we'd lose:

- 100% Almonds
- 90% Apples
- 90% Onions
- 90% Blueberries
- 90% Cucumbers

25% of the world's bee species risks extinction from:

1. Habitat loss
2. Climate change
3. Chemical pesticides
4. Invasive plant species
5. Diseases & parasites

Bee spotting in your garden*

Whether you have a window box, parcel or large garden, you can support your wild bee population by planting bee-friendly flowers. In return, they will dutifully pollinate many of your flowers, fruits and vegetables.

The best habitat for bees is one with plenty of flowers to feed on during the most active phase of the bees' lifecycle (March-October). Bees are a beautiful example of nature in harmony. Flowers use scent and color to attract bees, offering them nectar and pollen in return. Bees then travel from flower to flower, transferring pollen and helping plants to reproduce.

Consider planting bee-pleasers like lavender, marjoram, crocus, lilac, chives, echinacea and aster, and see how many types of bees stop by for a visit.

Planting a bee garden is one way to help preserve these important pollinators!

Pruners

Features & benefits

- 1 Best cutting performance**
Hardened, precision-ground stainless steel blade cuts all the way to the tip and keeps its sharp edge
- 2 Added power**
Patented technologies (PowerGear® and Power-Lever®) provide mechanical advantages, allowing you to maximize your power when cutting through thicker stems and branches
- 3 Low-friction blade**
Specialized coating helps blades glide through wood without gumming with sap or debris, and it provides added rust resistance
- 4 Comfortable handle**
SoftGrip® touchpoints on durable handle enhance comfort and control

Bypass or anvil?

Bypass

Both blades and counter blade press into the wood to make clean cuts with less compression damage. In other words, the cutting blade bypasses the counter blade in a scissors-like fashion. This makes it possible to cut close to the stem, making bypass pruners ideal for cutting fresh wood.

Anvil

The upper blade is forced through the wood with greater pressure as the anvil blade supports the branch, spreading pressure until the cut is complete. Anvil blades are ideal for cutting dry or dead wood.

Norden

Made in

 Finland

With Norden axes, Fiskars returns to its deep roots. The finest hickory is used to craft a handle with the authentic and natural feel of the traditional wooden axes.

Features & benefits

- 1 Carbon steel blade**
 Ultra-sharp, precision-ground blade is made of double-hardened carbon steel with low-friction coating that protects against rust and dirt
- 2 Optimal balance**
 Perfected balance has center of gravity close to the blade for maximum control
- 3 Over-molded head**
 Axe head will not loosen or separate, offering the strongest, safest, head-to-shaft connection
- 4 Hickory handle**
 Beautiful hickory wood handle provides shock absorption, strength and durability, with a hooked end for secure grip

How to choose the right axe

Chopping axes

Fiskars next-generation chopping axes serve all manners of woodwork, chopping, carpentry and pruning. The range delivers a wonderful package of minimalist design and sharp-edged functionality with the right fit for all wood preparation tasks. Pick your size according to the task at hand.

The Universal Chopping Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axes

Fiskars next-generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

The Splitting Axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

Choose the right size for you

Length test

Grab the axe on the shaft below the blade. Turn the shaft towards your armpit. If the end of the shaft reaches your armpit, the axe is too long.

Weight test

Grab the axe at the end of the shaft and let the head rest towards the ground. Lift the head up while turning your wrist close to your body. The axe should be vertical in your hand by the end of this movement. If you can't lift the axe this way, the axe is too heavy.

X-series™

X27 Super Splitting Axe (36")					Model	378841	Item no.	378841-1004	UPC

Imagination to garden. Garden to plate.

Imagine, cultivate, savor.

Feeling a connection to nature provides a peaceful and fulfilling experience. Getting your hands in soil reconnects and centers you. There are a number of ways to turn that connection into intention—think fresh cut herbs, hand grown vegetables, or inspired blossoms—on your patio, windowsill, backyard or wherever your happy place may be.

Connecting to your space

We all need a space. A room that encourages you to slow down. A patio that invites you to breath more deeply. A backyard that reminds you to move your body. Adding something natural, organic and alive to that space provides an even deeper affinity. Growing things need nurturing—sunlight, water, and tending—and with each intentional action we take to nourish our connections, we gain a little more time to reflect and create.

Fresh cut herbs

Thyme, basil, mint—herbs enrich just about any meal, adding aromatics to the room and a flavor boost to familiar recipes. Many herbs thrive on a sunny windowsill throughout the year. Reserve a clipping from a neighbor's garden or store bought package, propagate in a glass of water and you're on your way.

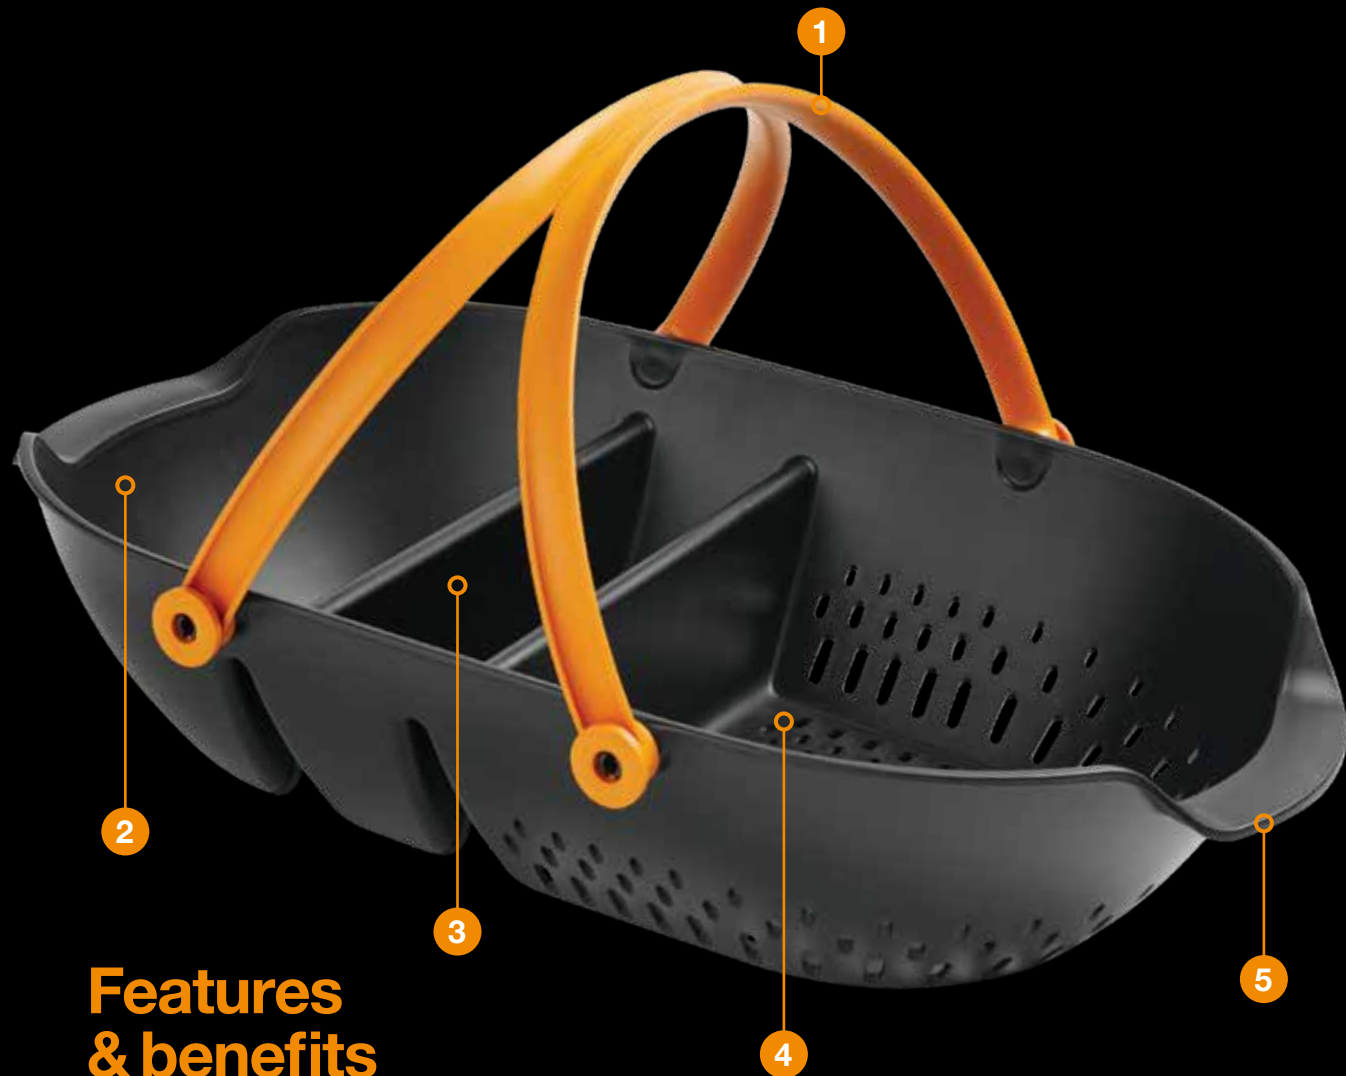

Hand grown vegetables

You don't need an entire plot to grow your vegetables. A planter box on a balcony or raised bed on a patio, with careful attention made to the right location and soil mixture, brings nourishing, and delicious, elements to your space. Choose vegetables you'll enjoy on your table: lettuce, tomatoes, peas—because nothing tastes better than homegrown.

Design inspired blossoms

From native-wildflower cottage to succulent-gravel contemporary, bring your imagination to life. Add in low-maintenance choices like peonies, cosmos and sunflowers as you work your way through your color story. Home-picked florals also make excellent gifts and decor—fresh, vibrant bouquets and dried flower accents—bringing the outdoors in and sharing what you've created with friends and family.
