

Smarter Pest Control®

It wasn't easy being green in 1982. Harsh pesticides were the norm for insect control. But after spending his teenage years working on a farm, Rod Schneidmiller saw firsthand that "chemical warfare" was only marginally effective at controlling pest infestations. As for humans, pets and beneficial insects, it was simply not safe.

Schneidmiller knew there was a better way, and set out to prove it. He created a reusable trap for flies in his garage and started selling the product out of his pickup truck throughout Eastern Washington.

Over 40 years after that humble start, Sterling International and our RESCUE!® family of products have continued to pioneer innovation in pest control through exhaustive scientific research, knowledge of insect behavior, intelligent design and quality U.S. manufacturing.

OUR MISSION

RESCUE!® brings innovation to the household insect control category with scientifically-sound, American-made products that respect the environment without sacrificing results.

ANTS

Ants are the most common insect problem around the home. They seek different types of food depending on the season and type of ant. Liquid baits can be consumed too quickly for ants to bring back to the nest. Solid baits can be too dry and unappealing for ants. So we created a gel bait that allows ants to efficiently transport the poison back to the colony.

Ant Baits

WHAT IT CONTROLS: Most common household ants, including pavement ants, Argentine ants, odorous house ants, crazy ants, grease ants, thief ants and more.

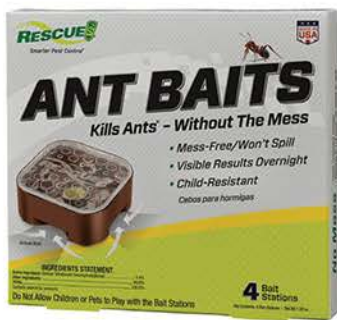

HOW IT WORKS: We use both sugar and protein lures to entice ants no matter the season or what kind of food they seek. Dual bait technology means ants find it fast, and it feeds more types of ants in the colony for a quick nest knockdown.

- Child-resistant
- Mess-free; won't spill
- Easy to use
- Durable hard plastic shell

MSRP: \$7.49

MOTHS

A pest to birdseed and grains, these moths chew through packaging to lay their eggs. Defending the garage, pantry, and shed requires a standout trap that blends in.

Birdseed Moth Traps

WHAT IT CONTROLS: All common birdseed and pantry moths, including Indian meal moth, raisin moth, almond moth and Mediterranean flour moth.

HOW IT WORKS: We lure them to a sticky trap with a powerful pheromone. Hard plastic shell in a neutral color is durable and discreet.

- Safe near food and birdseed
- Easy to use
- Durable hard plastic shell
- Also catches pantry moths

MSRP: \$9.49

MODEL PMT2
BIRDSEED MOTH TRAPS 2-PACK

PMT2	Retail pack	14000/7	1	1.9 x 4 x 7.5
PMT2-BB5	Bulk box	14000/7	5	N/A, no shelf tray

SPIDERS

Spiders are unsightly in the home and should be trapped discreetly. They prefer dark and cozy places, yet most traps are bright and spacious. Luring spiders without calling attention to them is all about the trap design.

Spider Traps

WHAT IT CONTROLS: All common household spiders, including Black Widow, Brown Recluse, Hobo, jumping, sac and wolf spiders.

HOW IT WORKS: We created a decorative hard plastic shell that's an enticing dark environment for spiders, and looks nice around the house. Our exclusive glue dot technology lures spiders further into the trap. Glue is on both interior sides; simply flip it over to continue using the same trap. Now includes multi-surface tape for even easier placement.

- No mess, no assembly
- Pet-resistant
- Durable and decorative shell
- Place anywhere with multi-surface tape

MSRP: \$7.99

FRUIT FLIES

Fruit fly eggs hitch a ride on fresh produce, hatching in the house and reproducing quickly in kitchen sinks, garbage disposals and on food scraps. We developed a trap that quickly breaks the breeding cycle and can be reused again and again.

Fruit Fly Traps

WHAT IT CONTROLS: Fruit flies that congregate around kitchens, pantries and food scraps.

HOW IT WORKS: By studying fruit flies in our insect lab, we determined the exact shade of red that will lure fruit flies. The top is designed with multiple entrance funnels to catch more flies and keep them contained. Combined with our own superior lure formula, our trap catches fruit flies better than competing traps.

- Reusable
- Traps fruit flies in ONE day
- Safe around food
- No-tip design

FLIES

In our research lab, RESCUE!® scientists scan insect retinas to determine the colors and patterns insects find most attractive. We call this exclusive technology VisiLure®, and have paired it with sticky traps to offer an odor-free and pesticide-free line of insect control.

Indoor Fly TrapStik®

WHAT IT CONTROLS: Common house flies, cluster flies, fruit flies and gnats.

HOW IT WORKS: An indoor trap that camouflages flies as they get stuck. Attracted by the colors and patterns, flies are trapped on the adhesive surface.

- Odor-free
- No mess, no assembly
- Appealing colors attract flies

MSRP: \$4.99

FLIES

Deck & Patio Fly TrapStik®

WHAT IT CONTROLS: Common nuisance and filth flies. Also works on horse flies, stable flies, black flies, deer flies and others that feed on blood.

HOW IT WORKS: Insects are lured by exclusive colors and patterns and trapped by a strong adhesive. Unique glue guards reduce the risk of unintended catches.

- Odor-free
- Resistant to rain and hot weather
- Pesticide-free
- Appealing colors attract flies

MSRP: \$10.99

FLIES

Add water. Subtract flies. It sounds simple, but we developed the fly trap category in 1982 and have been the leader ever since with superior trap designs and lure formula.

Disposable Fly Trap

WHAT IT CONTROLS: House flies, lesser house flies, cluster flies, lance flies, secondary screwworm flies, flesh flies, false stable flies, blow flies and bottle flies.

HOW IT WORKS: The lure pouch inside the bag dissolves and activates when water is added. Lured by the scent, flies enter the trap through the top cap and drown in the water.

- Never touch bait or flies
- No-mess disposal
- Catches up to 20,000 flies

MSRP: \$6.49

MODEL	DESCRIPTION	UPC 0/42853-	# UNITS	RETAIL FOOTPRINT (length x width x height, in inches)
FTD	Retail pack	77301/4	1	8.5 x 7.8 x 3.4
FTD-DB12	Shelf pack	77301/4	12	8.9 x 8.6 x 12
FTD-FD48	Floor display	77301/4	48	9 x 9.9 x 48
FTD-DB300	Half pallet	77301/4	300	20.7 x 48.5 x 45

Reusable Fly Trap

HOW IT WORKS: This trap comes with our water-soluble lure in a separate packet that you open before use. When the jar is filled with warm water and the trap is placed outdoors, the lure pouch dissolves and activates quickly. Simply replace the used lure pouch with a refill packet to allow this trap to be reused again and again.

- Flies find it fast
- Lures flies away from you
- Easy to use, just add water
- Durable jar lasts for seasons of reuse

YELLOWJACKETS

Yellowjackets are some of the most dangerous insects known to man. Our traps effectively capture yellowjackets during their full lifecycle: from the queen's emergence in spring to the peak size of their colonies in the fall.

Disposable Yellowjacket Trap

WHAT IT CONTROLS: All major yellowjacket species found in North America.

HOW IT WORKS: The water-soluble lure pouch inside the bag activates when you add water. Lured by the powerful scent, yellowjackets enter through the top cap and drown in the water. Ideal for picnics or camping, Disposable Yellowjacket Traps have convenient yellowjacket control in the bag.

- Lure yellowjackets away
- Easy to use, just add water
- Quick and clean disposal

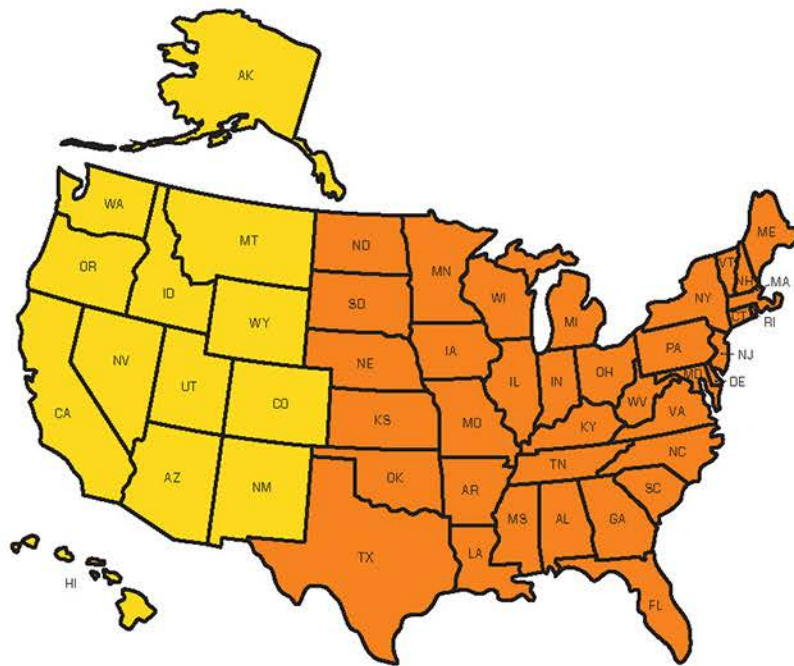

MSRP: \$6.49

YELLOWJACKET TRAPS

Reusable Yellowjacket Trap

HOW IT WORKS: Our trap gives you the satisfaction of seeing the yellowjacket “body count” accumulate while knowing the insects can’t escape. Yellowjackets fly in through holes in the bottom of the trap, then continue upward through the interior cone and become trapped within the outer cylinder. Trapped yellowjackets eventually dehydrate and die.

- Catch queens and workers
- Prevent nests
- Use spring through fall
- Won't trap beneficial honeybees
- 4-week and 10-week refills available

MSRP: \$12.99 YJTR

MSRP: \$4.99 YJTA

WASPS, MUD DAUBERS

Wasps build their nests wherever they please. Mud daubers are solitary wasps that build mud huts. With VisiLure® technology, our TrapStik® works like nothing else on these pests.

Wasp TrapStik®

WHAT IT CONTROLS: Wasps, Mud Daubers and Carpenter Bees.

HOW IT WORKS: Stick it to wasps and mud daubers. TrapStik® employs our exclusive VisiLure® colors and patterns proven to attract wasps and mud daubers.

- Capture the queen, empty the nest
- Chemical-free
- Resistant to rain and hot weather

CARPENTER BEES

Carpenter Bees cause unsightly and expensive property damage by boring holes into wood siding, decks, windowsills, and outdoor furniture. Over time, that excavation weakens the wood, inviting mold and rot. Stop the damage before it starts with Carpenter Bee TrapStik®.

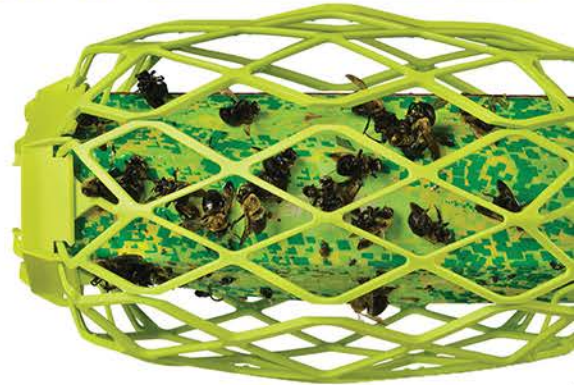

Carpenter Bee TrapStik®

WHAT IT CONTROLS: Carpenter bees that cause damage to wooden structures.

HOW IT WORKS: Enticed by the colors and pattern on TrapStik®, carpenter bees will fly to it and get caught on the sticky surface.

- Catch all season long
- Save structures from damage
- Break the life cycle

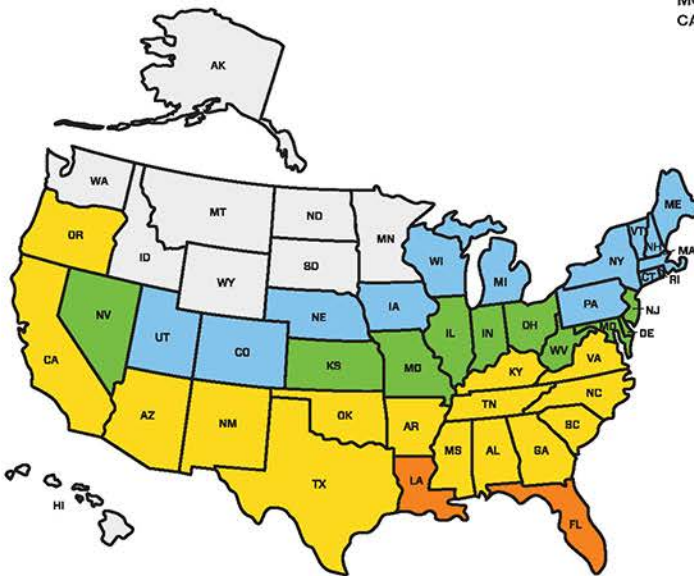

MSRP: \$10.99

JAPANESE BEETLES

Meet the beetles! They show up in summer for an 8-week party in your backyard – and they are the worst guests. Japanese and Oriental beetles destroy over 300 varieties of ornamental plants. Stop the party with our season-long traps and refills.

Japanese Beetle Trap

WHAT IT CONTROLS: Japanese beetles and Oriental beetles.

HOW IT WORKS: We developed a controlled release lure that lasts the full 8-week beetle season, and a large bag that can be reused. It's an all-in-one season-long trap that draws beetles away from ornamental plants, shrubs and trees. Easy-lock opening makes emptying and reusing the trap a breeze.

- Durable two-layer bag
- Easy-lock opening
- Lures last full season

WHY RESCUE![®] MADE IN USA

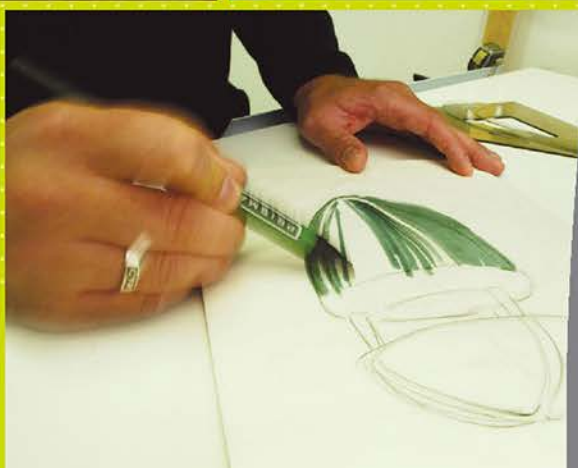

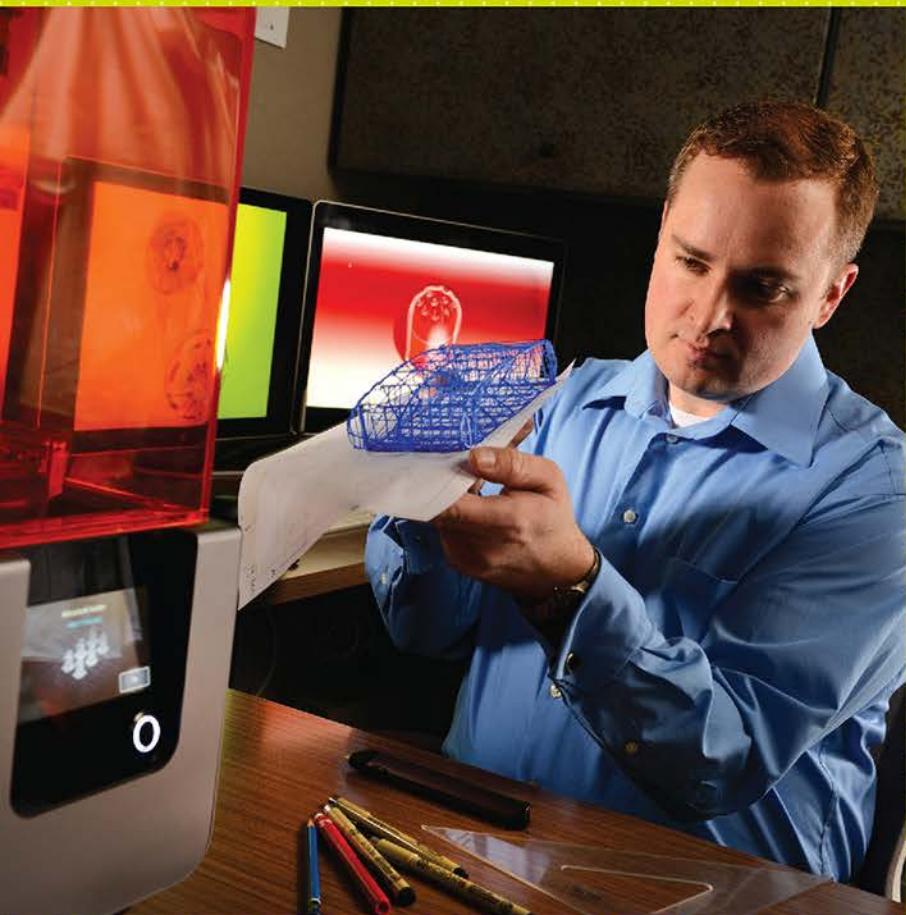

Made in the USA isn't just a slogan. It's a commitment we've made to our employees, our customers, our community and our country. All RESCUE![®] products are manufactured in-house at our factory in Washington State. This helps us not only maintain the highest degree of quality control, but also respond rapidly to the needs of our retailers.

MADE IN USA

WHY RESCUE![®] ENGINEERING

The design of our products is about more than just looks; the overall customer experience is paramount. Every product we make is designed with the needs of the end user in mind. It starts with sketches, progresses to CAD drawings and 3D printed prototypes, and proceeds to injection-molded parts which are produced in-house.

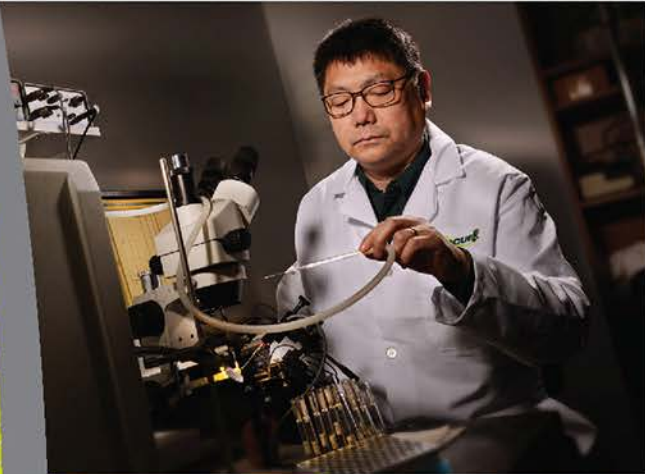

WHY RESCUE![®] RESEARCH & DEVELOPMENT

Effective pest control begins with knowing the pest. That's what our world-class insect research lab has been committed to since 1982. Our drive to understand insect behavior guides our research and development efforts and is responsible for our ability to continuously produce effective pest control solutions. Years of research, field testing, and refinement by our team of scientists go into every product. It's part biology, part chemistry, and part entomology. Most importantly, it's 100% innovation.

RESEARCH & DEVELOPMENT

WHY RESCUE![®] GREEN COMMITMENT

We respect our role as stewards of the environment. Each RESCUE![®] product is scientifically formulated to work on the targeted insect while being safe around people and pets, and minimizing the impact on the ecosystem. Our approach allows customers to feel good about avoiding “chemicals” while achieving the performance they want.

GREEN COMMITMENT

SALES TOOLS

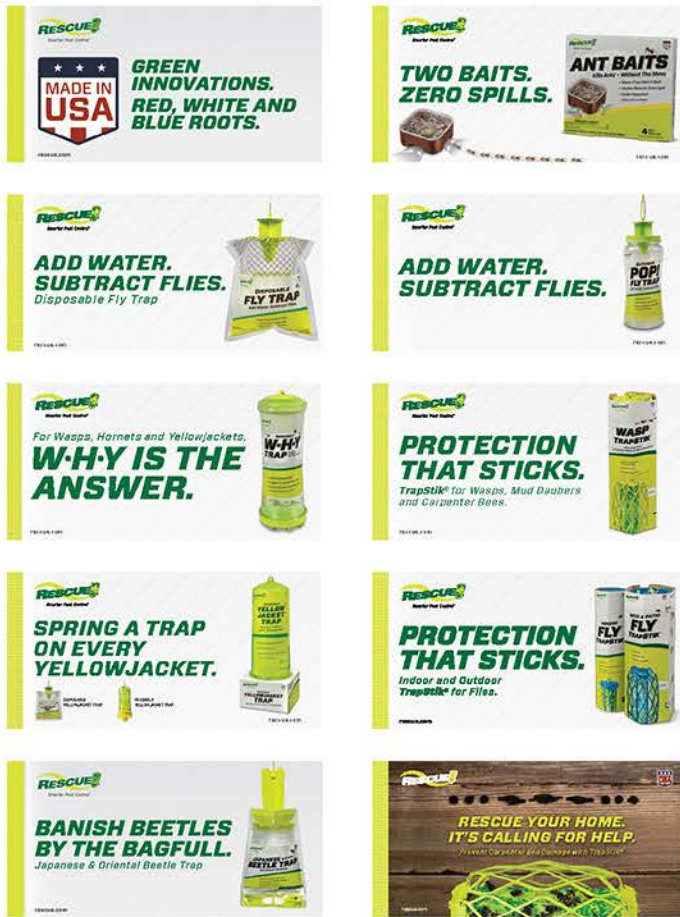

Floor Displays

Floor Displays use eye-catching graphics. Studies have shown a POS increase of up to 300% with displays and an increase in refill add-on sales.

2x4' Banners

Vinyl banners are hemmed with grommets for easy hanging.

Infographics

RESCUE! Infographics are a great tool for understanding how our products work. From insect identification to trap how-to's, these infographics cover our most frequently asked questions.

Shelf Wobblers

Grab attention at the shelf with these small yet powerful shelf talkers. Wobblers are complete with adhesive strip to attach to front or top of shelf. Currently available for Wasp TrapStik, Ant Baits, and Made in Washington.

Digital Library Access

In addition to the public-facing content available on rescue.com, we have a wide variety of videos: promotional, sales, how-to and assembly, and photos available for download from our Extranet.

To receive credentials to access the Extranet, visit rescue.com/request-access to fill out the form.
