EPIC REPELLENTS REGIONAL ANIMAL PEST MAP

The map shown below was developed to help the branches target the specific pest for each area. We have defined the Dominate pest for each Region & have identified Metro locations that have specific infestations. ©2019 EPIC Animal Density Map

The first thing you ought to know about the people of Enviro Protection Industries Company, Inc. (EPIC) is that **we love animals and respect nature.** When we talk about repelling various types of animals, whether wild or domestic, the words "pest" and "nuisance" come up. These beautiful animals only become a nuisance when they destroy the hard work we have put into our gardens, lawns and landscaping.

So we set out to come up with the best ways to protect our flower and vegetable gardens as well as our yards without causing harm to the vegetation, the animals, or to people and our larger environment.

Our products are developed specifically for the pest at hand. We are not an "All-in-One" repellent company that claims a wide arrange of animals it repels. Our testing has shown each animals' "fears & avoidances" are different and they require specific formulas to work on the particular animal or reptile to be 100% effective. **We Guarantee it!**

- Ready to Use – No Mixing, No Spraying, Just Sprinkle On
- All Natural Ingredients
- Won't Harm Animals
- Safe around People and Pets (When Used As Directed)
- Effective in ALL Seasons
- Long Lasting Products
- Environmentally Safe
- 100% Biodegradable
