A Shared Vision

Meredith DeWitt, Vice President

We Are All Family

Established in 1973, the DeWitt Company remains a family-owned, family-operated and family-inspired lawn & garden company. However, when we mention the word “family” we are not just talking about our personal family relationship.

We feel the word “family” is a very powerful word. A family provides love, support and protection for each other, but what creates a family may have nothing to do with genes and everything to do with connectedness, respect, protection and support. At DeWitt our philosophy iswe are ALL family!

Our DeWitt Family Team

We are down to earth people selling the best down to earth products! Our experienced DeWitt family team blends old fashioned ways of doing business with state-of-the-art technology. Tools are for people to use, not used to replace people. We have an incredibly dedicated and talented team of 80 members that operate out of a 400,000 square-foot facility in America’s Heartland.

Our DeWitt Family of Customers

At DeWitt you are not a number – you are a member of our family. Our dedicated team knows our continued success is linked to your continued success. We’re investing in new technology and equipment that allows us to provide you with the highest quality lawn & garden products available in today’s market. We offer over 600 products that cover 14 lawn & garden categories, so we have the quality products you need to promote environmentally responsible product lines.

Our Industry Family

There is no better industry than the lawn & garden industry. It is comprised of ethical, passionate and hard-working people that work every day to create a better tomorrow. We have a common bond to protect our environment and to respect the dirt of this wonderful earth we are all blessed to be a part of, protecting our future one product at a time. Let’s continue to keep building a better tomorrow together.

United We Stand,

Larry DeWitt
Founder and CEO

Meredith DeWitt
Vice President

A COMPANY BUILT FROM THE GROUND UP

Our Story

Larry DeWitt started his landscaping business in Sikeston, Missouri, soon after he earned degrees in horticulture and landscape design. In 1977, he was looking for a material to stop weeds and increase plant growth — without chemicals. But during those days, black plastic was a landscaper’s only option. From his hands-on experience, Larry knew that while plastic stops weeds, it also blocks out moisture and air. This combination often resulted in plant disease, fungus and rot.

Larry set out to create a better alternative. He experimented with textiles and materials until he finally hit pay dirt. He discovered that woven polypropylene did everything he wanted. His new “landscape fabric,” later dubbed DeWitt’s Weed Barrier, would change the professional landscaping industry. Landscaping pros quickly realized what an outstanding product DeWitt’s Weed Barrier was. It halted weed growth and promoted tremendous plant growth. The industry couldn’t get enough.

Today, DeWitt products are used in more than 70 percent of the commercial landscaping jobs throughout the United States. This makes DeWitt Company the No. 1 choice of landscape professionals.

We’ve made a serious commitment to the lawn and garden industry by introducing new products, improving existing products and developing innovative merchandising solutions. Keep reading to learn more about our nonstop efforts to be your first-choice supplier.

...A COMPANY DEDICATED TO THE INDUSTRY

Our Passion

DeWitt has a dedicated team that designs products using the most reliable research and development, innovative marketing strategies and on-target distribution. We strive to promote environmentally friendly solutions for everyday applications. Our passion drives us to offer products you can use, while providing a service you can rely on and from a company you can trust!

Experienced and Trusted Team

From manufacturing to on-time delivery, the DeWitt Company prides itself on providing exceptional quality and service. Our philosophy is simple: “The bitter taste of poor quality lasts long after the sweet taste of a cheap price is gone.”

Breakthrough Merchandising

Unlike many manufacturers, DeWitt stands ready to back up our products after you place your order. We know our continued success is based on your continued success. That’s why we constantly develop new and innovative merchandising systems for retailers. We know that proper management of shelf space can make or break a business, and we work to ensure you get the most for your money.

Focus on the Environment

Not only do we keep chemicals out of our products, but we also are committed to conserving water. Many of our products have been designed to do just that. They conserve water by design.

Centralized Location

In 2000, the company moved into a 400,000-square-foot, state-of-the-art manufacturing facility in America’s Heartland. By continually investing in technology and equipment, DeWitt can consistently provide the highest quality products available in the lawn and garden industry.

SunShield® Spiral & Straight Anchors

Galvanized Steel Spiral Anchors are great for hay covers, outdoor storage covers & bounce house anchoring. The 3" x 3" triangle top handle makes for easy ground insertion with a firm twisting grip. Spiral Anchors provide optimal holding power. The Galvanized Steel Straight Anchor is typically used for hay covers and heavy duty outdoor tarp applications. Same 3" x 3" triangle top handle makes for easy ground insertion with a firm pushing grip surface. Each comes with a clear plastic protective sleeve on point, individually tagged and UPC Code.

Black Stallion® Rubber Straps

Molded of 100% EPDM, Black Stallion® Heavy Duty Rubber Straps provide the highest possible quality and physical properties. The Rubber Straps undergo an extensive manufacturing and quality control process to ensure each strap delivers excellent performance and value. The Rubber Straps are manufactured with the graduated TEARDROP design at each end for added strength. The "S" Hooks are made of silicon kiln-tempered and galvanized steel for extra strength and rust protection. The Rubber Straps are retested for tensile strength and Duro Meter hardness, for elongation and stretch recovery, and for ozone and cold resistance. Black Stallion® Heavy Duty Rubber Straps come in 5 popular sizes; 10, 15, 21, 31, and 41 inch to meet a wide variety of applications.

Holds down multiple types of items

Biodegradable Stakes

Made in the USA, Biodegradable Stakes are manufactured using recycled materials (polypropylene) with an additive to cause stakes to breakdown and biodegrade. The new ribbed design allows for significantly more holding power than metal staples. Great for securing landscape fabrics and netting. Other uses include pinning down turf grass, anchoring erosion control blankets and mulch mats. Use these biodegradable stakes in yards, parks, or schools.

One Company. One Call. Over 600 Products!

Green Fabric Pins

Green Fabric Pins are made from recycled plastic. They are noncorrosive, sturdy, easy to install and reusable. Fabric Pins can be used to secure landscape fabrics, erosion control products and plant protection products. For best results, pins should be spaced every 2' to 3' around outside edges. For lighter weight products, it is highly recommended to fold over edge and push pin through double-layered material.

Pond Underliner

DeWitt Pond Underliner is a durable, clean, and safe material to install under ponds instead of using cardboard, newspapers, sand or old carpet padding. DeWitt Pond Underliners are constructed of nonwoven needle punched fabrics in various weights. Use of this material under your liner will help protect the inner wall from punctures caused by stones and cushion the pond wall for fish, while allowing gases to escape to maintain the proper biological balance for all pond life.

COMMERCIAL QUALITY LAWN EDGING - FLAT STRIPS

Diamond Back Royal 5.5" Height T Shape Bottom

The "gripping" power of Diamond Back Royal adds stability in various soil conditions. Our premium plastic composition is second to none for this addition to the family of Valley View products. A "T" shape bottom lip increases the stability when installed. Corrugated sidewalls add channels where soils can solidify the position of the edging. Connecting plug and bead diameter will allow for use with other industry lawn edgings.

- Safe for home, children & pets

Straw TackSak

Straw TackSak is a sack of straw seeding mulch designed to stop erosion and speed up germination. TackSak is made of finely processed straw, cut twice and processed with a bonding agent that gives straw a tackiness which holds it together and protects grass seed from heavy washout, runoff and wind. TackSak conserves water, naturally biodegrades and is safe for pets and children. It also makes great bedding for livestock. Easy to use, handle and clean up. Covers up to 500 sq. ft.

DeWitt Hardscape Products
GEOTEXTILE
Woven Fabric 200 LB

Woven Fabric
Provides Stability and Separation of Subgrade in Pavers or Retaining Walls

Applications

- Helps stabilize foundation of paver projects
- Can be applied for driveways, pathways, sidewalks and retaining walls
- Can be used for soil separation

Benefits

- Improves long-term performance of hardscape project
- Cost-effective solutions for reinforcement applications
- Extra-resistant to punctures and tears
- Reduces extra excavation and backfill

HOW TO INSTALL
Excavate, level and pre-compact the subgrade area.

Apply DeWitt Woven Geotextile. This cover and level with sand or aggregate to ensure a perfect paver installation.

WOVEN GEOTEXTILES

Woven Geotextiles are high-quality polypropylene fabrics that stabilize the sub grade and separate soil from the aggregate. With everything in place, you'll experience a reduction in maintenance costs and extended life of your pavement structure. These fabrics work well for unpaved structures as well.

DWG200 Series

- Industry-standard woven geotextile
- Designed for three primary functions – separation (separating the native sub-grade from an aggregate layer), reinforcement (reinforcing an area by distributing weight over a wider area) and filtrating (retaining soil while allowing the passage of water)
- 200 pound grab tensile strength
- Used underneath an aggregate overlay

NON-WOVEN GEOTEXTILES

Non-Woven Geotextiles are comprised of strong polypropylene staple fibers. They are designed to allow for drainage and soil filtration, separation, permanent erosion control, asphalt overlay, and cushioning.

DNG105 Series

- Used for separation, drainage and filtration
- Landfill drainage & filtration subsurface drainage, highways, etc.
- 105 pound grab tensile strength
- Designed to handle environmental problems found in roads, embankments, landfills, airfields and sports construction projects

ITEM #	DESCRIPTION	UPC	WT	CI	CS/BDNL
DNG105-12.5360	4 OZ NWN GEOTEXTILE 105 LB- 12.5' X 360'	817542	141	21600	1

DeWitt HARDSCAPE PRODUCTS
GEOGRID
Biaxial GeoGrid 2K SERIES

Biaxial GeoGrid
Provides Stability, Separation of Subgrade in Pavers or Retaining Walls, Plus Aides in Drainage and Filtration

Applications
• Behind Retaining Walls
• Erosion Control
• General Hardscape Applications

Benefits
• Biaxial - can be installed in both directions
• Adds strength, stability, and longevity
• Soil separation for additional stabilization

DeWitt HARDSCAPE PRODUCTS
GEOGRID
Biaxial GeoGrid 3K SERIES

Biaxial GeoGrid
Provides Stability, Separation of Subgrade in Pavers or Retaining Walls, Plus Aides in Drainage and Filtration

Applications
• Behind Retaining Walls
• Multi Level Wall Structures
• Erosion Control
• General Hardscape Applications

Benefits
• Biaxial - can be installed in both directions
• Adds strength, stability, and longevity
• Soil separation for additional stabilization

GEOGRID FOR GROUND STABILIZATION

Geogrid is geosynthetic material used to reinforce soils and similar materials. Geogrids are commonly used to reinforce retaining walls, as well as subcases or subsoil below roads or structures. Soils pull apart under tension. Compared to soil, geogrids are strong in tension. This fact allows them to transfer forces to a larger area of soil than would otherwise be the case.

Biaxial GeoGrid 2K Series

DeWitt Biaxial GeoGrid 2K Series provides ground stability, separation of subgrade and aides in drainage and filtration. Horizontal layers of geogrid provide tensile strength to hold the reinforced soil matter together. The geogrid-reinforced soil matter becomes part of the retaining wall system, giving the system more size and weight to resist pressures from behind it.

ITEM #	DESCRIPTION	UPC	SCC	WT	PK	CS/BNDL

GG2K-6150	6' X 150' GEO GRID 2K SERIES CLR	826025			1	1

Biaxial GeoGrid 3K Series

DeWitt Biaxial GeoGrid 3K Series adds greater stability to multiwall strutures while maintaining separation of subgrade and adding drainage and filtration. As a wall gets taller, it needs longer geogrid lengths to increase the size of the geogrid-reinforced soil matter. Taller walls need more layers of geogrid and stronger geogrids to internally hold the reinforced soil matter together.

AN INNOVATIVE GEOTEXTILE GRID FOR USE IN GROUND STABILIZATION

DuPont™ GroundGrid®

DuPont™ GroundGrid® ground stabilization system is a geotextile grid used for ground stabilization in landscape and construction projects. Simply expand the three-dimensional honeycomb structure, place it on your project surface and fill with gravel, soil, sand or other mineral infill to create a strong and stable surface.

GroundGrid® uses DuPont science to create an uncommonly strong and stable surface for your job site. As with many ground stabilization systems, a three dimensional honeycomb structure holds mineral infill to create a solid ground surface. The difference is that DuPont™ GroundGrid® is made from high-performance fabric engineered by the experts at DuPont. So it's lightweight but tough enough to work hard and last for decades in any conditions, while being uniquely flexible and truly easy to use. Water permeable in both vertical and horizontal directions, for drainage and erosion control.

EROSION CONTROL

Filter Fabric

DeWitt non-woven, needle-punched Filter Fabric can be used as a stabilizing force to prevent unwanted movements in excavated areas such as roads, sidewalks, patios, and embankments. This product is excellent protection against damaging soil when placed around drainage pipes, retaining walls, and buried or exposed fixtures.

DeWitt HARDSCAPE PRODUCTS
FILTER FABRIC
Non-Woven Fabric

Non-Woven Fabric
Used for Drainage and Filtration

Applications
Drainage control
Erosion control
Behind retaining walls
Landscape projects

Benefits
• Allows high-water flow
• Soil separation for added stability
• High strength/dimensionally stable

Sandbags

DeWitt Sandbags are ideal for flooding control, erosion control, or to increase car and truck control on icy or snow covered roads through the addition of stabilizing weight. DeWitt Sandbags are made from polypropylene which resists tearing and puncturing.

ZIP TIES

DeWitt fencing products are the most commonly used fabric for erosion control in commercial and residential construction projects as well as the protection of plants and animals. Whether you are creating a natural barrier for your garden or blocking sediment from being washed into local streams, DeWitt fencing products are designed for long lasting durability.

Excellent Alternative to Steel Wire Fence

4 FT. Orange Barrier Fence

Orange Barrier Fence is an excellent choice for short term applications and is a great high visibility barrier to prevent accidents around unsafe areas. Primary uses include construction sites, newly paved or sealed driveways, ski & snow slopes or anywhere a barrier is needed to control access. Also works great for crowd control at various events. Made of high density polypropylene, it is ultraviolet resistant and easy to handle, install, and relocate.

Safe & Humane Alternative to Wire Fencing

Deer Fence & Deer Fence PRO

Deer Fence & Deer Fence PRO is a safe, humane alternative to wire fencing. It discourages deer and other small animals from destroying gardens and other vegetation. Both are an environmentally safe mesh netting made from polypropylene strands bonded together. With a 3/4" hole opening, it is UV-treated for longer lasting durability. It attaches easily to metal or wooden stakes.

Blocks Sediment Yet Lets Water Flow Through

Silt Fence

Silt Fence is the most commonly used fabric for erosion control in residential and commercial construction. Silt Fence is made of woven polypropylene yarns, which is designed to block the sediment while letting the water slowly flow through the fabric. If properly installed, it can control sediment from being washed into streams or rivers, which results in killing fish and other aquatic life.

REFLECTIVE WHITE/BLACK WOVEN GROUND COVER 3.5 oz.

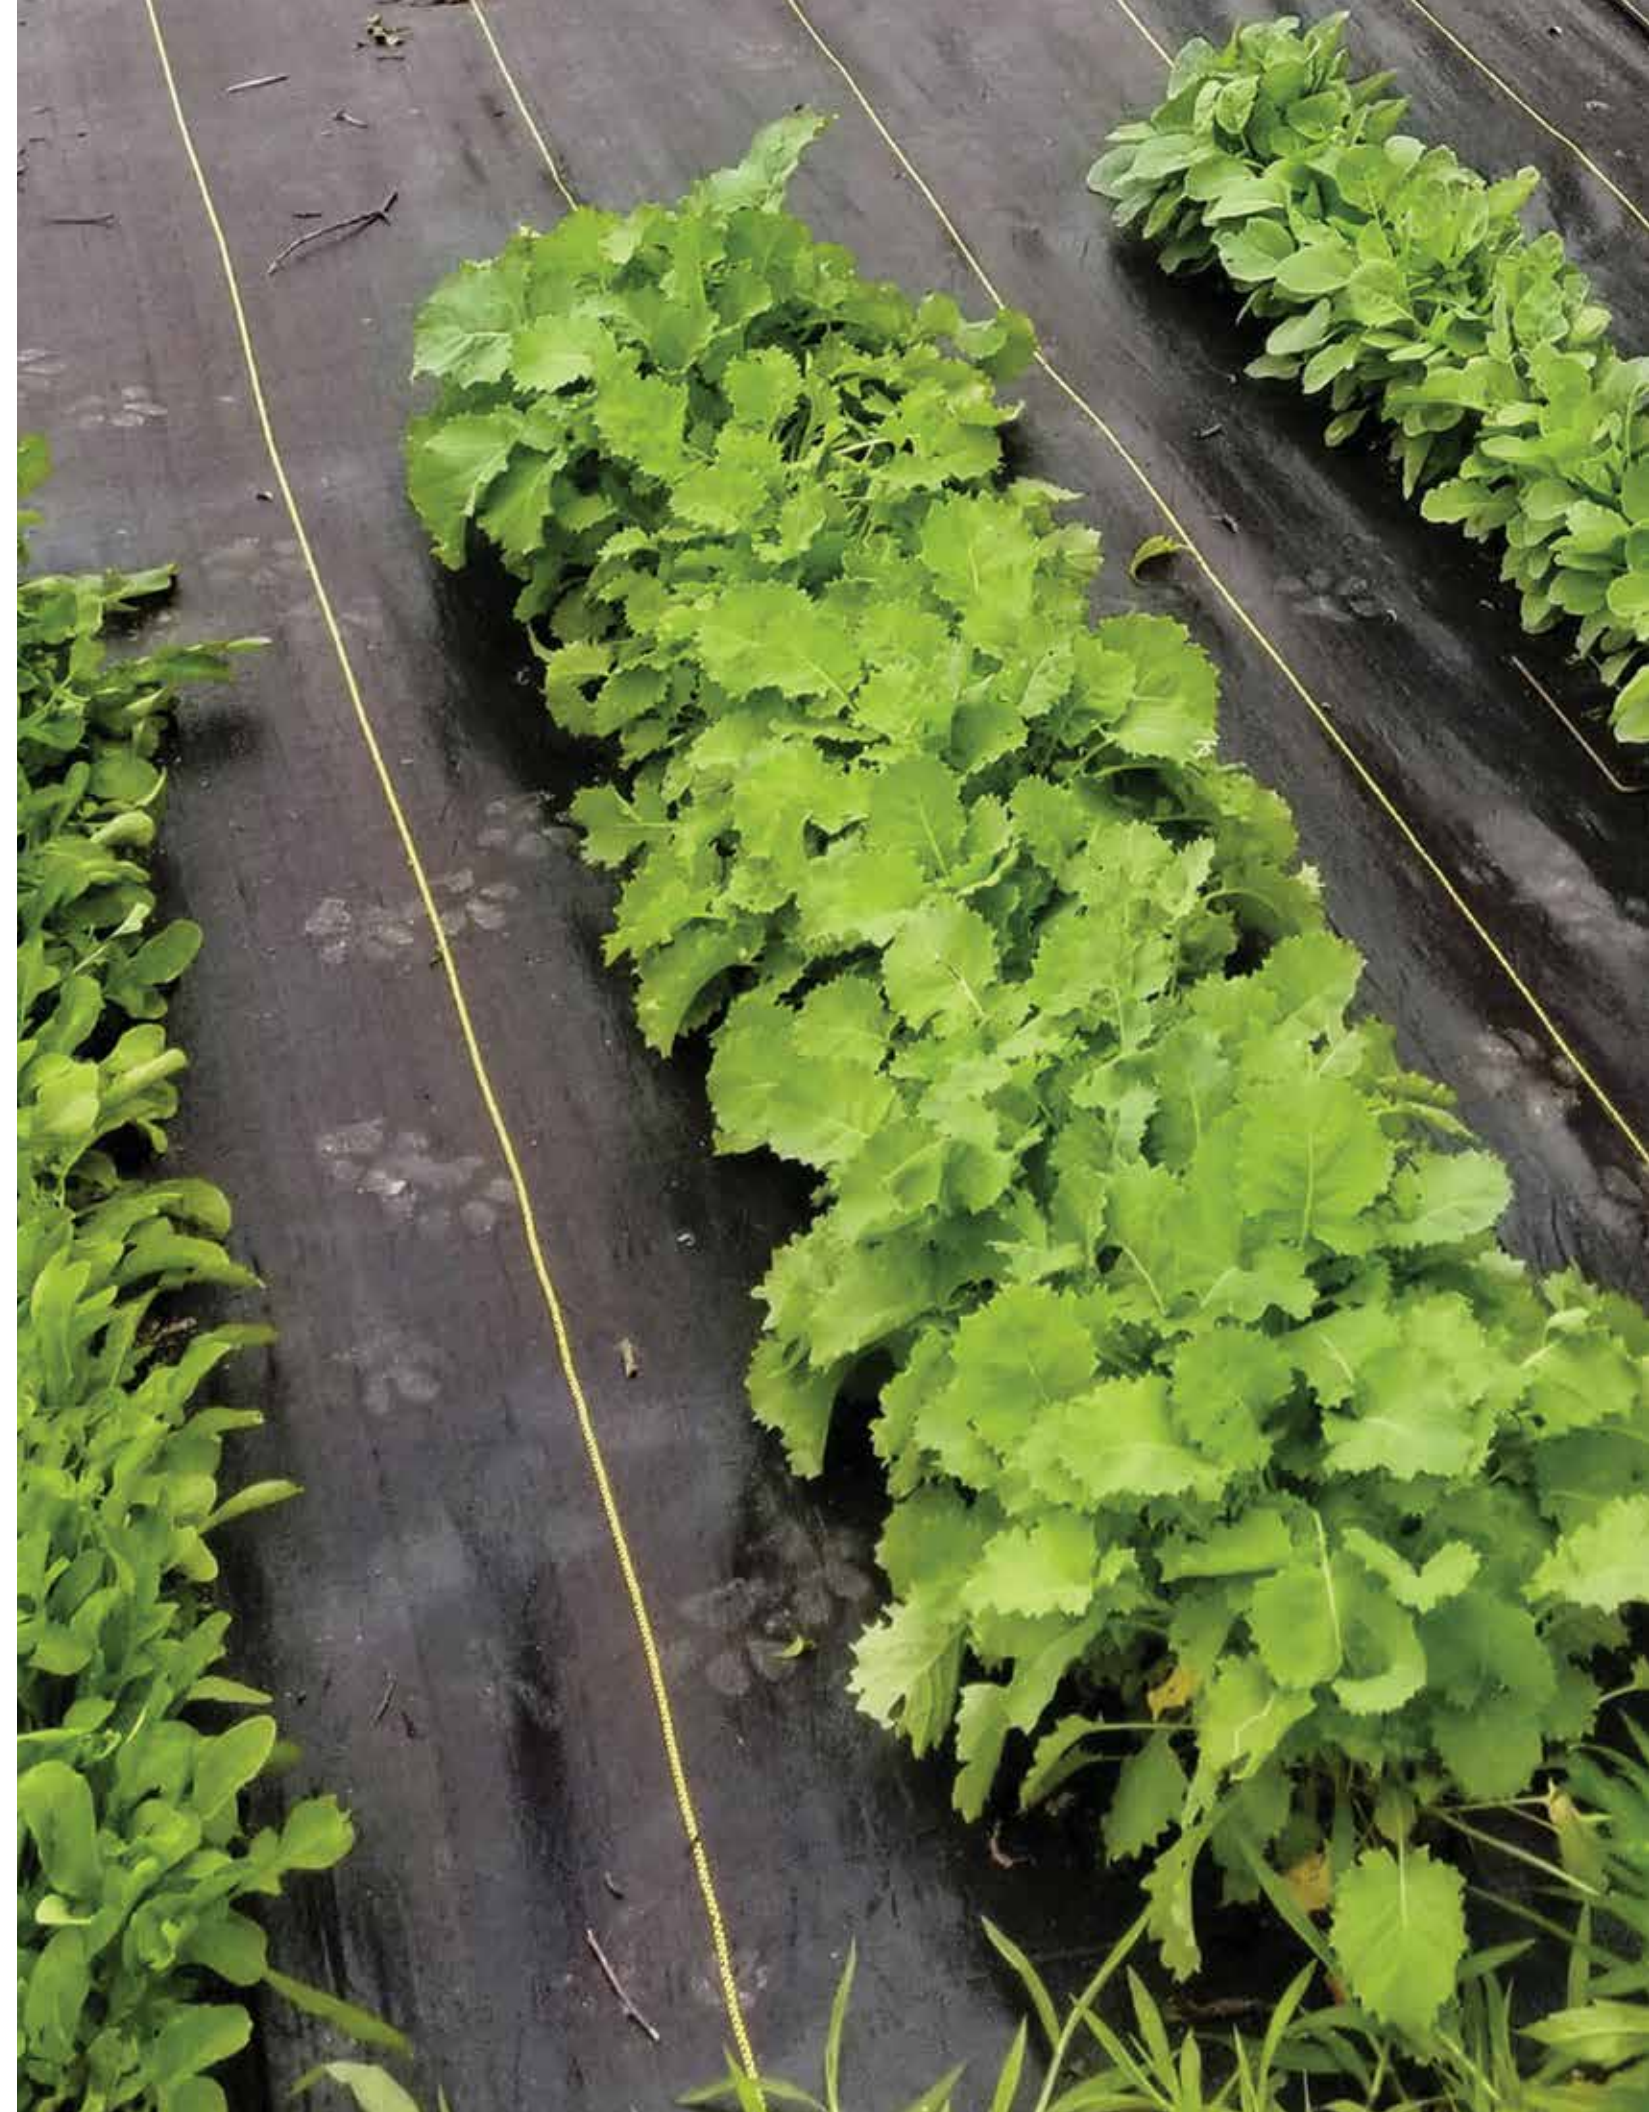

ULTRAWEB 3000 2.2 oz.

WHITE GROUND COVER 3.2 oz.

ACCESSORIES:

ANCHOR PINS

DeWitt offers a full line of durable woven ground cover products to meet the needs and wants of professional landscapers, greenhouse growers and nursery markets. A powerful alternative to black plastic, the fabric allows air and moisture to reach the soil, saving water!

Ground Covers Resist Tearing, Puncturing & Weed Penetration

Sunbelt

Our Best — Sunbelt Woven Ground Cover consists of 3.2 oz. polypropylene, which resists tearing, puncturing and weed penetration. It is approved for most government weed control applications. Sunbelt is ideal for greenhouses, outdoor displays and as a weed barrier for plantings without topical coverings where a weed-free environment is a must. DeWitt Sunbelt is striped every 12 inches to aid in plant alignment and is UV-stabilized to last even in direct sunlight.

Reflective White/Black Woven Ground Cover

Reflective White/Black Ground Cover is a 3.8 oz., UV-stabilized, white woven polypropylene fabric woven to a black polypropylene fabric. It is a strong, heavy fabric, which allows it to be more resistant to tearing, puncturing and weed penetration. Reflective white fabric on top - increases yields by allowing the lower canopy of plants to receive light exposure. Black fabric underneath blocks sunlight from reaching weeds. Reflective White/Black Ground Cover is permeable, allowing water and nutrients to pass through. It is excellent when used in growing operations. DeWitt Reflective White/Black Ground Cover is striped every 12 inches to aid in plant alignment and is UV-stabilized to last even in direct sunlight.

White Ground Cover

White Ground Cover is a 3.2 oz., UV-stabilized, white woven polypropylene fabric. It is a strong, heavy fabric, which allows it to be more resistant to tearing, puncturing and weed penetration. White Ground Cover can also be used as an alternative to a frost blanket. When applied on top of plantings, it protects against light frost and cold temperatures by holding heat in during the day and by blocking wind at night. White Ground Cover is permeable, allowing water and nutrients to pass through. It is excellent when used in rose growing operations.

Spunbond Landscape Fabrics

Characteristics:

- Polypropylene
- Made from one continuous fiber for consistent strength
- Versatile-great for hardscapes and xeriscape applications

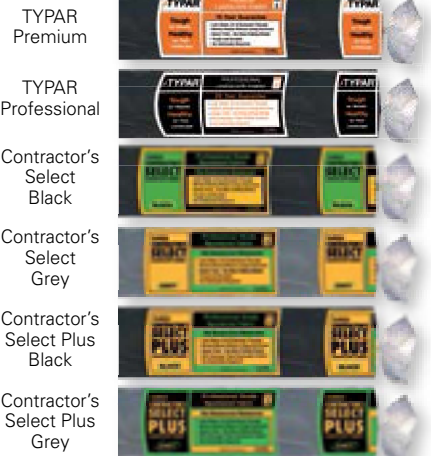

Benefits:

- High Strength
- Easy to install
- Great for weed control
- Allows air, water and nutrients to pass through
- Conserves water

Practical Uses:

- Hardscape Applications
- Soil Separation
- General Weed Control

Pointbond Landscape Fabrics

Characteristics:

- Polypropylene
- Low cost
- Several weights to choose from

Benefits:

- Easy to install
- Provides great weed control
- Allows air, water and nutrients to pass through
- Conserves water

Practical Uses:

- Economical Weed Control (6 year)
- Professional Weed Control (Weed Barrier Pro)
- Soil Separation

Woven Landscape Fabrics

Characteristics:

- Polypropylene
- Heavy duty
- Stripes every 12 inches
- Heavy UV Protection without using a mulch/rock cover
- Versatile-great for hardscapes and xeriscape application

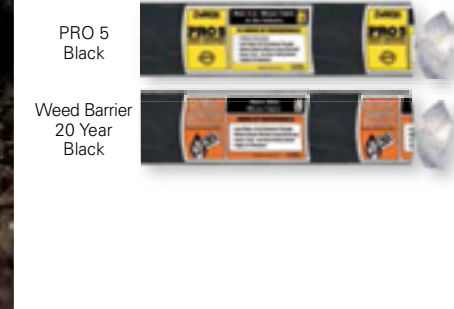

Benefits:

- High strength
- Great for weed control
- Stripes for easy plant alignment
- Allows air, water and nutrients to pass through
- Conserves water

Practical Uses:

- Professional Weed Control
- Soil Stabilization
- Hardscape Applications

Woven Ground Cover

Characteristics:

- Polypropylene
- Stripes every 12 inches
- Resists tearing and puncturing
- Edges lay flat and stay flat

Benefits:

- High strength
- Great for weed control
- Stripes for easy plant alignment
- Can be left uncovered
- High UV resistance
- Conserves water

Practical Uses:

- Nursery/Garden Center Flooring
- Weed Control
- Soil Stabilization

Geotextiles Non-Woven & Woven

Non-Woven Characteristics:

- Polypropylene
- Higher elongation (stretch)
- Versatile for many uses
- High water flow

Non-Woven Benefits:

- Prevents soil erosion
- Soil separator/filter fabric
- High water flow

Practical Uses:

- Soil Separation
- Filtration
- Drainage
- Underlayment Fabric

Non-Woven:

Filter Fabric, DNG105 Series, DNG120 Series & DNG205 Series

Woven Characteristics:

- Polypropylene
- High strength
- Lower elongation (stretch)
- Lower water flow

Woven Benefits:

- Stabilization of soil
- Lower risk of puncture
- Reduces amount of required base materials

Practical Uses:

- Soil Stabilization
- Base Reinforcement
- Structural Support
- Underlayment

Woven:

DWG200 Series & DWG315 Series

Down to Earth Protection.

Down to Earth Results.

Non Woven Landscape Fabrics

3 Year

DeWitt Weed-Barrier® 3 Year

DeWitt Weed-Barrier® 3 Year 1.0 oz. is an entry-level garden fabric used to suppress weed growth without the use of chemicals. Fabric allows air, water and nutrients to pass through. Plus, it conserves soil moisture and promotes plant growth. Short term control for annual planting.

12 Year Earthtone

DeWitt Weed-Barrier® 12 Year (Earthtone)

DeWitt Weed-Barrier® 12 Year Earthtone 3.0 oz. is a two-color, UV-treated, spunbonded fabric, which offers the same benefits as DeWitt Weed-Barrier® 12 Year. However, the fabric has an earth-tone colored layer giving it a natural look – versus traditional black fabric – which makes it ideal for use with bark or mulch. This one-of-a-kind fabric is only available through DeWitt Company.

Landscape Fabric Stops Weeds Without Chemicals

DeWitt Weed-Barrier® 12 Year

DeWitt Weed-Barrier® 12 Year 3.0 oz. is an easy-to-use, environmentally safe fabric that controls weeds before they start. Its unique design provides several advantages over conventional weed barrier products. It is fabricated using a spunbond method, which sandwiches melt-blown material between two layers of spun material, forming a powerful 3-ply layer of weed protection. Plus, the fabric's higher carbon black content provides superior light-blocking capabilities to protect against the toughest perennial weeds. The design also prevents unravelling and makes the material easier to cut. In addition, DeWitt Weed-Barrier® 12 Year is hydrophilic-treated, providing improved water and nutrient flow through the fabric.

Natural Organic Biodegradable Weed Barrier

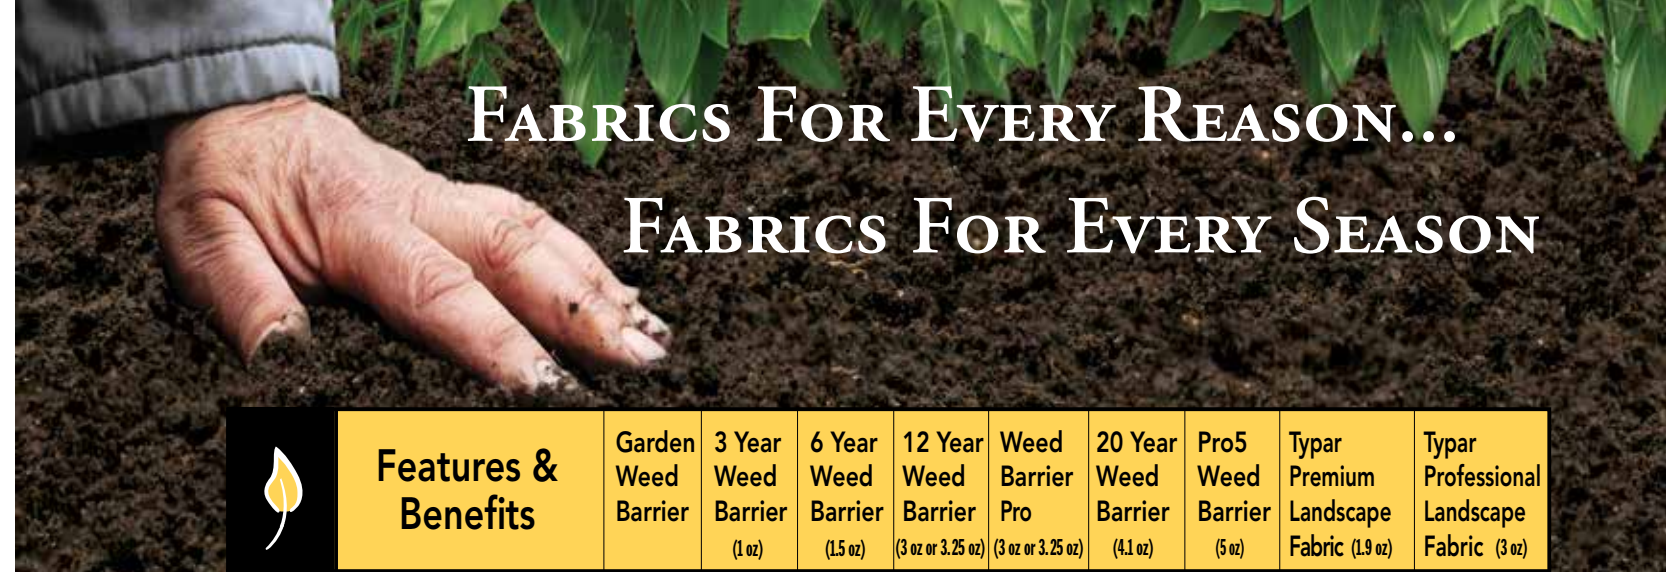

Garden Weed-Barrier

Economical, light-weight paper mulch that helps control weeds and is 100% organic and an environmentally responsible alternative to black plastic. Made from premium recycled paper, DeWitt Garden Weed-Barrier® is chemical free and OMRI Listed® — making it approved for organic food production. Our line of paper mulch is perfect for vegetable gardens and designed for annual planting. Garden Weed-Barrier® stops weeds, helps conserve moisture and doesn't interfere with the natural balance of the land. The paper mulch naturally biodegrades or can be tilled back into the soil, putting nutrients where they belong.

PERFECT SHADE CLOTH PRODUCTS - FOR PETS

Kool K-9™ Dog Kennel Cover

Kool K-9™ is a tough, UV stabilized, woven polypropylene cover that protects your pet from the heat and wind. These covers provide an 80% shade factor and will not rot, mildew or permit the growth of fungus. Covers are specially designed to create enough shade to keep your dog cool while allowing air to circulate freely. These covers can also be utilized as a wind or snow break during the winter months. The perimeter is double-stitched and solid brass grommets are placed every 12" for extra strength and durability. Includes 11" Dewitt Zip Ties.

PROTECT YOUR PETS FROM THE ELEMENTS

Shady Dog™ Dog Kennel Covers

Shady Dog™ is a high-density polyethylene, lock-stitched, knitted shade screen. These UV stabilized shade screens provide a 60% shade factor and will not rot or mildew. Shady Dog™ cools your pet by blocking hot infrared sun rays and drawing cool air up from the ground to reduce temperatures under the kennel cover. This shade fabric can also be utilized as a wind or snow break during the winter months. The perimeter is double-stitched and solid brass grommets are placed every 24" for extra strength and durability. Includes 11" Dewitt Zip Ties.

Covers Can Also Be Used As A Wind Or Snow Break During The Winter Months!

Plant & Seed Guard

DeWitt Plant & Seed Guard is a lightweight, .5 oz., white, spunbond fabric for use in grass seeding in commercial and residential sites. It creates an excellent micro-environment for seed germination and seedling growth. This fabric provides a 90-95% average seed germination compared to 60-65% with straw or hay and can be used as a low cost insulation against the elements.

DeWitt Retail Display Racks & Sales Centers

DeWitt Display Racks & Retail Sales Centers make it easy to display a complete line of landscape fabrics for customers. Unlike many manufacturers, DeWitt is there to back up our products after you order. We know our continued success is based on your continued success. We are constantly developing new and innovative merchandising systems to better serve your retail needs. We know how important shelf space is in your world and want to make sure you get the most for your money.

These 6 ft. Retail Display Racks can be used as an end cap, wall or in-shelf display. These sturdy racks are designed to hold up under constant use and can be easily refilled. The rack is shipped unloaded and can be filled with four cases of the landscape fabric. Each rack also comes with its own header card sign displaying product names and selling features.

STRONG & STURDY!

CREATE YOUR OWN!

DeWitt Retail Display Racks are the perfect way to stock and showcase a complete line of landscape fabrics in your store or independent garden center. 4 TIER STORAGE: Four vertical arms hold and store multiple rolls. The open design makes grabbing a fabric roll quick and easy. Make the most of unused wall space and gain vertical storage. Position where it's most convenient for your customers to see Perfect for small spaces!

SPECIAL ORDERING OPTIONS & SEWING CUSTOMIZATION

*Note: Where tarp size requires material to be cut down, pricing must be calculated from standard width of product.
For each order of 5 or more identically sized tarps, the one time set up charge will be pro-rated over the total number of tarps. For orders of less than 5 identically sized tarps, the set up charge will apply to each tarp.

Sudden Shade

DeWitt's Sudden Shade is made from 100% UV-stabilized polyethylene. Its unique lock-stitch construction allows customers the ability to cut the fabric with scissors without further unraveling. Sudden Shade is pre-cut at 6' x 12' and 12' x 12', which greatly reduces delivery times. Available in green and black. Kit includes Clip-Its™ and rope for installation.

DeWitt carries a variety of stock in various sizes for several applications. Choose from a professional selection of tarp products for lawn and garden industries, construction sites, truck transport and animal protection.

Knitted Stock Tarps

DeWitt's Knitted Stock Tarps are UV stabilized with lock-stitch knitted construction. They are heavy duty and pliable. DeWitt Company has a complete line of Knitted Stock Tarps, making it easy to choose one that is right for any application. Knitted Stock Tarps many uses include shading people, plants, pets, and greenhouse shading.

Due to the high seasonal demand of these products, DeWitt has finished stock panels in many sizes and percentages. These are available for immediate shipment. The professionals on DeWitt's sewing production team can customize panels to any percentage of shade. We use #4 brass grommets and 2 3/4" reinforcement tape. The taped edges are double stitched for extra holding power.

Heavy Duty Forest Shade™ Tarp - UV 4.5 oz.

An environmentally compatible color visually recedes in outdoor setting. This heavy duty tarp weighs 60 % more than most polyethylene tarps. Tightly woven fabric provides more puncture resistance. Thicker coatings on each side adds longer product life. Black anodized grommets about every 3 feet around the hem, 10 mil. thickness with UV resistant top and bottom coating give added strength and securing dependability. Green on both sides. Many applications include firewood cover, patio furniture cover and building supplies.

SunShield® Silver/Black Tarp - UV 6.0 oz.

The SunShield® Silver/Black 6 oz. tarps are very rugged and designed for use under continuous outdoor exposure. SunShield® is made with high density woven fabric along with UV treated coatings on both sides to provide extended life in the sunlight. In addition, using SunShield® with the reflective silver side up will divert both heat and ultraviolet light, while using the black side up will absorb heat/divert ultraviolet light. Both sides are heat and cold resistant. SunShield® is also an excellent sunblock fabric. The tarps include patent pending molded reinforced corners, rust proof grommets every 24 inches and bolt rope hems to provide dependable tie down points. Suggested uses include material covers, recreational vehicle covers, pool covers and rolled hay covers.

Reinforced Corners

Black Stallion® Rubber Straps

Black Stallion® Heavy Duty Rubber Straps are molded of 100% EPDM Rubber to provide the highest possible quality and physical properties. The Rubber Straps undergo an extensive manufacturing and quality control process to insure each strap delivers excellent performance and value. The Straps are manufactured with the Graduated TEARDROP design at each end for added strength. The "S" Hooks are made of Silicon Kiln-Tempered and Galvanized Steel for extra strength and rust protection. The Straps are retested for tensile strength and Duro Meter hardness, for elongation and stretch recovery, and for ozone and cold resistance. Black Stallion® Heavy Duty Rubber Straps come in 5 popular sizes; 10, 15, 21, 31, and 41 inch to meet a wide variety of applications.

Slow-Release Tree Bag Continuously Waters for Up to 8 Hours

DeWitt Dew Right Tree Watering Bag

Take the stress out of planting new trees with the new DeWitt Dew Right Tree Watering Bag; a 15 gallon bag designed to provide a drip irrigation system directly to tree roots over an extended period of time. Made of heavy duty green coated polyethylene with nylon webbing, poly straps, and black nylon zippers, the DeWitt Dew Right Tree Watering Bag has micro-perforated release points along the bottom seams for a slow release of water. Safe to use with nutrient or chemical additives, the bag needs to be filled 1-2 times per week for most trees.

Zip together 2 bags for trees 3"-5" caliper to hold 30 gallons

Slow-Release Donut Continuously Waters for Up to 8 Hours

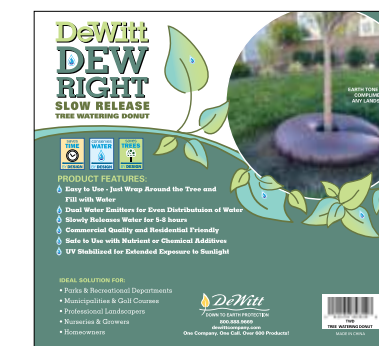

DeWitt Dew Right Tree Watering Donut

Take the stress out of planting new trees with our slow release tree watering donut. Designed to ensure that your new trees will survive their crucial first year after being planted. It eliminates the severe water stress new trees endure after transplanting by delivering a high volume of water directly to their root system. Easy to use, just wrap around the tree and fill with water. Dual water emitters distribute water evenly. Slowly releases water for 5-8 hours.

- Great for trees with 5" or smaller diameter.
- Will support the trees without any girdling.
- It won't damage trees like common wire-encased garden hoses.
- 32" in length with a loop and 3 grommet tie-down support.
- Installs quickly and easily for any tree support.

Helps Trees Grow Straight and Healthy

Tree Rope

Tree Rope is made of polypropylene that won't rot and is UV-treated to resist deterioration and is reusable. Its flat, snake-like form will not girdle trees like conventional ropes – no need for turn buckles or vinyl garden hose.

Tree Wrap

DeWitt Tree Wrap protects trees from scorching, and from trimmer and mower damage. Tree Wrap is made of polypropylene fabric and easily conforms to fit any tree shape or bark texture. Tree Wrap slowly photo degrades to prevent girdling of the tree's trunk. This product is approved by leading universities and horticulturalists.

Protective Netting for Fruit and Vegetables

Bird & Pond Netting

DeWitt Bird & Pond Netting is a durable, UV-treated polypropylene with 3/4" hole openings that allows in sunlight, moisture and ventilation. It is a safe, humane pest protection for fruit and vegetables or can be used to protect fish and water life from predators. Also safely deters children and pets from the protected area. Netting helps keep leaves and harmful debris out of pond water to stay cleaner and healthier for optimum life which extends the life of the pond.

Safe & Humane Alternative to Wire Fencing

Deer Fence & Deer Fence PRO

Deer Fence & Deer Fence PRO is a safe, humane alternative to wire fencing. It discourages deer and other small animals from destroying gardens and other vegetation. Both are an environmentally safe mesh netting made from polypropylene strands bonded together. With a 3/4" hole opening, it is UV-treated for longer lasting durability. It attaches easily to metal or wooden stakes.

Environmentally Safe Ways to Remove Unwanted Bugs

Natural Wasp Away

DeWitt Natural Wasp Away works like a scarecrow for wasps. The DeWitt Natural Wasp Away is perceived as a hornet's nest so wasps see this as a predator and avoid the area. DeWitt Natural Wasp Away keeps wasps away but does NOT kill them. Wasps are beneficial to our environment and help regulate other pests such as aphids, caterpillars and mosquitoes.
