# TOMATO CAGES

## Galvanized Tomato Cages

Plants that grow inside a cage utilize the sides of the cage to support the stems and require fewer ties. These heavy duty tomato cages are ample enough to help keep even the largest tomato plants contained and under control without blocking sunlight or rain. Keeps plants growing tall and off the ground for better air circulation. Large openings make harvesting easy. Supports up to 10 lbs. Can be used for multiple projects as seen on Pinterest. Available colors: red, blue, green, and black.

## Perfect Circle Technology

Exclusive perfect circle technology makes it easier to remove cages from stacks in the store and provides a more durable plant support in the garden.

# TWISTS & TOWERS

## The Ultomato Twist™

Tomato Twists offer a creative and colorful alternative to standard plant stakes. Many plants are strong enough to hold themselves, but some can use a little help. Strong winds or hard rain can destroy certain fruit or vegetable-laden plants and some varieties that produce large fruits or vegetables require extra support. These twists are constructed out of solid steel with a powder coated finish for durability. Colored stakes add extra beauty and charm to your garden and landscape beds.

## 4-Sided Tomato Tower Plus

Keep your plants growing strong and tall with the support of the Tomato Tower Plus. It isn't just for tomatoes. This multi-purpose, versatile plant support converts into a variety of different shapes, such as a trellis, cage and fence. The sections can also link together, if needed, and can be used for vegetables, fruit plants and flowers. Plants that are supported and grow off the ground are less likely to rot. Works well for growing green beans, peppers, peas, roses, and more. Large openings make harvesting easy. At season's end, the tower folds flat for easy storage. Reusable and great for any gardener. Ideal for use in raised garden beds and container gardening. 47" tall with (3) 17.5" wide panels. It measures 52" wide, when used flat.
