YARD GARD®

CHAIN LINK
## FENCING PRODUCTS

YARD GARD®

CHAIN LINK
FENCING PRODUCTS

Yard Gard® brand of quality chain link fencing meets the needs of residential property owners, industry and municipalities. Yard Gard® is manufactured and distributed by Midwest Air Technologies, Inc.

Chain link fencing has long been the fence of choice for schools, baseball fields, tennis courts, businesses, homes and government facilities. Chain link owes its popularity to ease of installation, configuration options, see-through characteristics, durability, and exceptional value.

We offer everything you need to customize your fence including fabric, framework, fittings and gates.

For more information about our products, please call **1-800-628-8815**
FABRIC

1	**FABRIC**	Same as total linear footage of fence, less gate opening(s)

FRAMEWORK

|		
2	**TOP RAIL**	Same as linear footage of fence fabric
3	**TERMINAL POST**	1 per each corner; 1 per each end; 2 per each gate
4	**LINE POST**	One each every 8' to 10'

FITTINGS

|		
5	**EYE TOP**	1 per each line post
6	**TENSION BAND**	3 to 5 for each post depending on height
7	**BRACE BAND**	1 per each rail end
8	**RAIL END**	1 per each gate post; 1 per each end post; 2 per each corner post
9	**POST CAP**	1 per each terminal post
10	**CARRIAGE BOLT - 5/16" x 1-1/4"**	1 per each brace band; 1 per each tension band
11	**CARRIAGE BOLT - 3/8" x 2"**	1 per each frame hinge
12	**CARRIAGE BOLT - 3/8" x 3"**	1 per each post hinge
13	**TIE WIRE**	1 per every 24" of top rail and 1 per every 12" of line posts
14	**TENSION BAR**	1 per each gate post; 1 per each end post; 2 per each corner post
15	**FRAME HINGE**	2 per each walk gate; 4 per each drive gate
16	**POST HINGE**	2 per each walk gate; 4 per each drive gate
17	**FORK LATCH**	1 per each walk gate

GATES

18	**GATES**	As needed

Need help planning your fence project? Just scan the QR code or type in http://www.yard-gard.com/fence_calculator.php in your favorite browser. Enter fence dimentions and obtain a personalized list of materials needed to complete your project.

Fabric

Chain link fabric is highly valued for its durability and longevity. Chain link fencing delineates property lines and provides security for pets and children, at an extremely reasonable cost. Yard Gard® has an extensive inventory of the highest quality chain link available. We stock a wide variety of different heights and gauges of chain link fence fabric to accommodate any commercial or residential job application. Additional products are available through special order. See page 19 for special order details.
Chain link fabric is available in a galvanized or vinyl-coated finish:

- Standard heights available: 4', 5' and 6'
- Gauge options: 9, 11.5 and 12.5
- Mesh sizes: 2" or 2-3/8"

Color coated fabric and additional gauges available through special order. Call for information.

† UOM: Unit of Measure.

* See page 19 for Prop 65 details.
Framework

Framework supports the chain link fabric. The fabric is stretched between terminal posts and is supported by the line posts and the top rails. Our framework is made of galvanized tubular steel. Galvanization provides weather protection and long life. We use a heavier gauge tubing which enhances the durability and function of the fence.

Swaged posts are compatible with standard caps and accessories.
- High quality 16 gauge galvanized steel
- Can be set using either end of post
- Can be top cut to level height

SWAGED™
* Patent pending

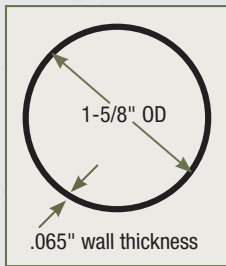

Top Rail

Line Post

Terminal Post
Consider several things when deciding on the framework for your chain link fence. The gauge of the steel and diameter of the posts are most important.

- Galvanized coating extends life
- Top rails available in 1-3/8" diameter
- Line posts available in 1-5/8" diameter
- Terminal posts available in 2-3/8" diameter
- Thickness options: 16 gauge (0.065") and 17 gauge (0.055")

2-3/8" OD
.065" wall thickness
Terminal Post

1-5/8" OD
.065" wall thickness
Line Post
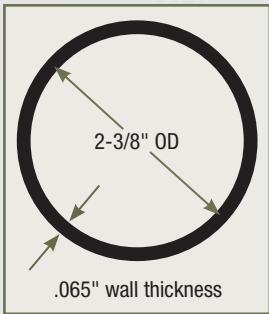

1-3/8" OD
.055" wall thickness
Top Rail

Use non swaged end if installing flat caps.

Color coated framework and additional gauges available through Special order. Call for information.

FITTINGS

Whether repairing an existing fence or installing an entirely new fence, chain link fittings tie the whole project together and add finishing touches to the installation. Supplied in custom coroplast display boxes, all of our fittings come out the shipping box ready for your shelf. Stock plenty of the most common elements to ensure your customers never leave empty handed.

We supply bullet caps, eye tops, post caps, rail ends, brace bands, tension bands, nuts and bolts, gate hardware and more. Be sure to get an accurate count of all fittings needed for a customer's project. Walk through the on line Chain Link Fence Calculator with your customer so that you both have confidence that nothing was missed. The link can be found on page 3.

Our fittings are made from die-cast aluminum or galvanized steel. Common items like post caps and eye caps are made from die-cast aluminum. Many of our die-cast aluminum fitting are available in hot-dipped galvanized steel. See our special order catalog for more details on these alternatives. Gate hardware, such as fork latches, frame hinges, and post hinges are made from steel and are hot-dipped galvanized to resist corrosion.

Meets or exceeds ASTM A641 / A 641M standard for zinc-coated galvanized carbon steel

Color coated fittings available through special order. Call for information.

Privacy Slats

Our privacy slats provide 80% to 85% coverage for your privacy needs. **Permalock** premium slat system provides privacy and security to most chain link fence installation. The unique, easy to install locking rail allows slats to be secured from the top or bottom of the fence. **Channel-Lock** is an attractive, easy to install, economical alternative to the **Permalock** system. **Channel-Lock** is also an easy to install locking rail allowing slats to be secured from the top or bottom of fence. **Economy Fence Weave** features brass fasteners that keep cut-to-size woven strips in place.

* See page 19 for Prop 65 details.

Standard Gates

For residential applications, two types of gates are commonly used: walk and drive. Walk gates are generally used for people to pass through, although they can be made up to 12' wide and are always the same height as the fence. It is a single panel hinged from one terminal post and latched to another. Automatic closing mechanisms are available to shut and latch a walk gate after passage. Drive gates consist of two panels that latch in the middle of the opening. Both walk and drive gates for residential enclosures are made from 1-3/8" diameter tubing.

We offer both bent frame and welded frame options.
All materials are made of galvanized steel.

- Drive gates are double panels and include center drop rod & guides
- Walk gates are single panels hinged on one side and latched on the other

Walk Gate

Gate Opening

Measure inside gate post to inside gate post.
Clearances are provided for gate hardware in opening.

Color coated gates available through Special order. Call for information.

FABRIC
1 FABRIC
Same as total linear footage of fence, less gate opening(s).

FRAMEWORK
2 TOP RAIL
Same linear footage as fence fabric.

3 TERMINAL POST
1 per end or corner; 2 per gate.

4 LINE POST
Divide the total linear footage of fence (less gate openings) by 10 and subtract 1. Subtract 1 additional line post per each corner post used. Maximum distance between line posts should be 10 feet.

FITTINGS
5 EYE TOP
1 per each line post.

6 TENSION BAND
For each end post: 3 for 3', 3-1/2' or 4'; 4 for 5'; and 5 for 6'. Same quantities per each gate post. Double the quantities per each corner post.

7 BRACE BAND
1 per each rail end.

8 RAIL END
1 per each gate post. 1 per each end post. 2 per each corner post.

9 POST CAP
1 per each terminal post.

10 – 12 CARRIAGE BOLTS
10 5/16" x 1-1/4"
1 per each brace band; 1 per each tension band.

11 3/8" x 2"
1 per each frame hinge.

12 3/8" x 3"
1 per each post hinge.

13 TIE WIRE
1 per every 24" of top rail and 1 per every 12" of line posts.

14 TENSION BAR
1 per each gate post. 1 per each end post. 2 per each corner post.

15 FRAME HINGE
2 per each walk gate; 4 per each drive gate.

16 POST HINGE
2 per each walk gate; 4 per each drive gate.

17 FORK LATCH
1 per each walk gate.

GATES
18 GATES
(As needed.)

Aluminio fundido

REPAIR CENTER

Don't have enough space to provide complete chain link solutions? You can still serve your customers by offering a Chain Link Fence Repair Center. The Repair Center, which takes up 4 feet of retail space, contains key items that are used in fence repair. Stocked with common accessories, an adjustable gate, and 10 foot rolls of fabric, your customers will find what they need to make repairs to existing chain link fencing. Repair center contents can be customized to the unique regional requirements no matter what part of the country you are located.
