# THE ZERO PRESSURE ZONE

Tommyco's Rough Terrain, Flat Terrain Pro and Flat Terrain kneepads are the world's only kneepads with patented pressure dispersing covers.

The outer feet are designed to make contact with the kneeling surface first. This action eliminates pressure from being applied directly to the delicate patella bone of your knee. A bridge is actually created over the kneeling surface, allowing pressure to be absorbed around the outer edges. This unique pressure dispersing action repeats itself over and over again allowing you to kneel in comfort throughout the workday.

# CHOOSING KNEEPADS ...MADE EASY!

LOOK FOR THE ICON THAT IDENTIFIES YOUR INTENDED USE

## Hard Terrain Kneepads

Anti-penetration covers slide or swivel over hard surfaces while protecting against sharp objects.

## Rough Terrain Kneepads

Extended feet design creates a bridge to protect the knee over rough unstable surfaces.

## Delicate Terrain Kneepads

Durable outer covers will not mark or dent delicate surfaces while providing ease of movement.

## Flat Terrain Kneepads

Flat articulating outer feet grip the surface to prevent slipping while providing excellent stability.

## General Purpose Kneepads

Soft durable foam rubber kneepads are ideal for those small jobs at home or in the garden.

The **QUALITY** You Want For The Surface You Have!
