r a d i u s g a r d e n . c o m

- Radius Garden was founded in 2005 in Ann Arbor, Michigan.
- Radius Garden holds over 2 dozen design and utility patents.
- Our product development philosophy is driven by innovation, ergonomics, functionality, and quality construction.
- Root Slayer is consistently a #1 selling shovel online in the garden shovel category.
- The Great States Corporation American Lawn Mower Company purchased Radius Garden Tools on July 1, 2019.
- Root Slayer products are frequently seen on popular cable television shows such as; "The Curse of Oak Island" on the History Channel, and on HGTV's "Good Bones" home improvement program.
- Radius products have been positively reviewed and covered by respected media and expert gardeners.

Root Slayer

The award winning, top-rated Root Slayer® family consists of multi-purpose tools that combine digging, cutting, chopping, and sawing functions in single, super-strong tools. All Root Slayer® blades feature the "Inverted V" cutting tip and specially designed teeth proven to rip through roots. These innovative products are favorites of professionals and homeowners alike. Materials include: powder-coated mid-carbon steel blades, resin-encased carbon steel shafts with the unique patented "O" Handle, or "Paddle Style Handle with non-latex thermoplastic grips. Tools with large blades and tools with smaller blades for precision transplanting work, working on your knees or digging in raised beds. Shorter, lightweight shafts are also available for easy transport while camping or metal detecting.

RADIUS

SNOW TOOLS

These premium snow shovels and scraper take everything you love from Radius and allow you to enjoy them year-round. The powder coated mid-carbon steel blades couples with the reinforced fiberglass shaft and the non-latex thermoplastic grip to create a quality snow tool. The fore-grip attachment can be used to help assist you by reducing the physical stress on your body that shoveling heavy snow can cause.

EARTHWISE[™] **SNOW TOOLS**

Earthwise Snow Tools combine quality materials and lightweight design to create products that are great for everyone. The Polypropylene blades make it so that they only you need to worry about when shoveling is the weight of the snow, not the tool. The oversized ergonomic handles make it easy to grip with or without gloves.
