Chosen by more professionals, Chapin Industrial Sprayers are designed with the help of chemical manufacturers and construction professionals, specifically with your applications in mind.

TriPoxy® coatings line the interior of all Chapin steel tanks. There is just no comparison in the field when it comes to durability and performance.

Our open head tanks have our unique Tri-Lock seal that ensures the pump cap tightly locks into the tank making positive contact with the O-ring seal for a tight seal.

### *Industrial Grade...*

Others may repackage consumer quality, home owner products as "Industrial Grade" and expect the construction professional to not see the difference. Chapin is committed to providing the best value and highest quality products to the professional contractor.

When the job is “over the top” and efficiency is paramount, pull out all the stops and reach for the EVOLUTION. The latest in Chapin’s industrial lineup, it’s the sprayer that combines all of Chapin’s top level features in one. With its 3.5-gallon tank, extreme seals, dripless shut-off, pressure relief valve and stainless TeeJet nozzle, Evolution sets a new industry standard for compressor-charged sprayers.

**Compressor-charged tank with pressure relief valve**

**Brass dripless shut-off for better control while spraying**

**Stainless TeeJet 0.8 GPM fan nozzle reduces banding**

**Ergonomic metal handle for comfort and wide mouth for easy filling and cleaning**

**The Exclusive holster keeps wand and tips secure and pump off-ground during filling**

**FLUOROPOLYMER ELASTOMER SEALS**

**41330**  
**NITRILE SEALS**

**6-6142**  
**CONVERSION HOSE KIT**

Safely keep silica dust at bay with water supply systems from Chapin. You can easily get your water supply deep into a jobsite with the Chapin 24V Dust Abatement Water Supply. As a backpack you can move it easily from location to location.

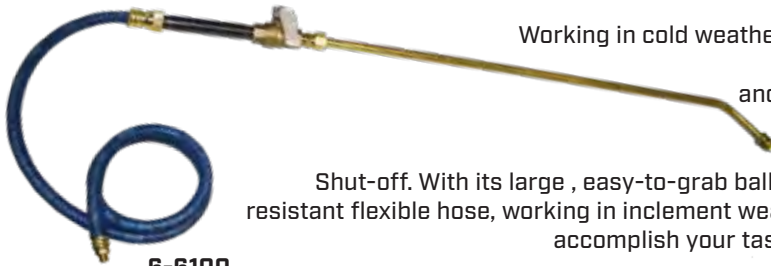

Battery power allows you to abate dust silica where power cords and water sources can't reach. The 4163 and 41330 are manual supply options. Quick connect fittings allow for easy setup and operation.

## PROFESSIONAL SPRAYER ACCESSORY UPGRADES

Chapin Dripless Shut-offs seal at the nozzle tip eliminating excess buildup in the extension wand that can cause unwanted drips when the shut-off is disengaged. When the trigger grip is released from spraying, the shut-off seals at the nozzle tip keeping the access left in the wand from dripping. Excellent for applying sealers where percise control is needed. Equipped with Xtreme® Seals to handle the Most Extreme Chemicals and High Concentrations of Acetone®, Naphtha®, Xylene® and Toluene®.

**6-8135**  
**Xtreme SEALS DRIPLESS CONTROL**

**6-6100**  
**COLD WEATHER FLEXIBILITY**

Working in cold weather is hard enough. When hoses become brittle and inflexible, it's time to upgrade to Chapin's Cold Weather

Shut-off. With its large, easy-to-grab ball valve and chemical resistant flexible hose, working in inclement weather, allows you to accomplish your tasks with efficiency.

# AUTO-MIX SYSTEMS

**NEW**

**MIXES™**  
ON EXIT  
STOP • SWAP • SPRAY

63950

**4 GALLON CAPACITY  
INCLUDES 2 CONCENTRATE TANKS**

**Mixes On Exit™** takes the measuring, waste and effort out premixing concentrate in the tank. Equipped with a separate concentrate tank, the primary tank remains untouched by the concentrate allowing you to automatically mix only the chemical you spray. You will never have to dump or waste unused chemical again. Mixes On Exit™ Sprayers allow you to switch chemicals on the fly saving time, money and the environment. The adjustable variable rate control lets you dial in a mix ratio that fits your application.

**1 YEAR**

## Fertilizer Injectors

HydroFeed Injectors offer great flexibility for garden enthusiasts and weekend D.I.Y.ers. Control watering and feeding with Chapin Hydrofeed products.

In-line injectors deliver liquid or granular fertilizers to sprinkler systems or a favorite hose nozzle or watering wand.

HydroFeed Timers take the hassle out of remembering to water and provides consistency with the duration between and during applications.
