Greenhouse Design and Construction

BFG Supply can offer the best turnkey solutions and service available in the market.

Coverings

BFG offers a full range of greenhouse coverings to ensure you have the best option to help your business grow.

Heating and Cooling

The right heating and cooling systems are essential for running your greenhouse evenly and efficiently.

Climate Control

Designed to maximize crop yields, help manage energy cost and optimize thermal comfort. Environmental controllers and light and energy curtains.

Ventilation

Air movement is important to keep your plants healthy and thriving. From passive to forced air ventilation solutions, BFG can design the right environment for your crops.

Irrigation

We are constantly developing our product line to bring you the best in the industry. BFG can design irrigation and fertigation systems to meet your needs.

Light Deprivation

Whether retrofitting an existing structure or designing a new light deprivation facility, BFG has the solutions you need to achieve a total blackout.

Lighting

BFG has all the lighting and controls you need for starting seeds, growing indoors, or just supplemental lighting.

Indoor Grow Rooms

From HVAC to benching, irrigation to control systems, BFG's technical team can assist with your buildout or retrofit of all indoor grow rooms.

Complete Line of Systems

Founded in 1972, BFG Supply has a long history of serving the Green Industry, offering a complete line of systems for Controlled Environment Agriculture.

We can help you design and implement an efficient system where you'll have the optimal growing environment for successful crops in a greenhouse or 100% indoor facility.

BARCODE Tips & Tricks

Having issues reading barcodes? Due to the large amount of products in this catalog it is possible barcodes may read incorrectly. Isolate the intended barcode with paper before scanning.

Terms and Conditions of Sale

BFG Supply Co., LLC referred to as BFG

RELATIONSHIP TO ACCOUNT APPLICATION

These Terms and Conditions together with the Account Application and any fully executed Agreements between the parties contain the entire understanding between the parties as to all matters referred to herein. No other representations, covenants, undertakings or prior or contemporaneous agreements, whether oral or written, regarding any matters that are not specifically contained and incorporated in this Agreement, shall be deemed to have any effect or binding impact upon the parties. The language of this Agreement shall be construed according to its fair meaning and in accordance with its purpose and without regard to whom may have drafted any particular provision herein. For purposes of these Terms and Conditions "Customer" shall mean the legal entity that is a part to any BFG Supply Co. Account Application, or any Order placed with BFG Supply Co. and "Guarantor" shall mean any individual that executes the BFG Supply Co. Account Application as a guarantor.

ACCOUNT APPLICATION

Payment terms are stated on your invoice. Discounts may be offered on certain products in certain situations and will be specified on the invoice. These discounts, if offered, are only available on invoices paid and received into the BFG office within the terms outlined on your invoice via cash or check and payments via credit card are not eligible for discounts. Buyer is responsible for mail time and discounts are only available if BFG actually receives eligible payments during the time frame set forth in these Terms and Conditions. Post marks will not be considered. A finance charge of 2% per month (24% annually) will be assessed on invoices not paid within invoice term date. Payments received towards balance will first be applied to finance charges unless otherwise stated in writing by BFG. BFG reserves the right to assess the maximum amount of finance charges permitted by applicable law. BFG has the absolute discretion to place an account on C.O.D. status until past due balances, including finance charges, are satisfied in full and BFG has determined that Buyer is eligible for the reestablishment of a credit line in BFG's sole discretion. Any failure of the Buyer to satisfy any of its obligations under a Account Application with BFG, including but not limited to the failure to satisfy amounts due within payment terms shall comprise an event of default. In the event of default, if BFG must employ a collection agency or attorney to collect any past due account, Buyer shall be responsible for the satisfaction of all amounts incurred in collection of any past due account including collection costs and attorney fees.

PAYMENTS

Visa, MasterCard, Discover and American Express are acceptable payments at the time of purchase up to \$10,000 or higher as approved by BFG. Payments made after a finalized sale that require (or per request) a change in terms will be charged a 3% convenience fee. Please call BFG Accounts Receivable department at 800-883-0234 Ext 4997. Mail payments by check to BFG Supply Co., 3874 Solutions Center, Chicago, IL 60677-3008. All return checks are subject to a \$35 NSF fee.

ACCOUNT APPLICATION AND TAX EXEMPT FORMS

Account can be established by submitting a completed BFG Supply Co. Account Application. Allow three to four weeks for complete processing. In addition, a tax-exempt form for your state must be on file with BFG or taxes will be charged on all purchases. The Account Application must be completed in its entirety to avoid processing delays. Failure to provide all information will result in adverse action with respect to Buyer's application for credit, including declining the application.

INVOICES/STATEMENTS

Product will be invoiced on the date product is shipped from BFG or when delivery information is received from a manufacturer shipping direct. BFG will make good faith efforts to transmit monthly Account Statements at the beginning of each calendar month. Account Statements are reminders of open invoices, however, Account Statements do not grant an additional amount of time to remit payment. Please follow the terms indicated on your individual invoice. Copies of invoices can be located at www.bfgsupply.com or contact

BFG at 800- 883-0234. All these documents may be mailed, faxed, or e-mailed. Please contact BFG Supply Co., LLC or visit www.bfgsupply.com with your choice preference.

RETURNS

Our merchandise is sold on an outright sale basis and is not subject to return unless mis-shipped, damaged or defective. Any shipments refused for reasons other than freight damage will be subject to freight charges both ways as well as a restocking charge. If merchandise is mis-shipped, please contact our office for return authorization. We will arrange return transport and credit.

DAMAGE/SHORTAGE/DEFECTIVE ITEMS CLAIMS

Damage in shipment claims on items shipped via Fed-Ex/UPS/etc., must be made within one (1) business day (24 hours) of receipt of the merchandise. All claims for shortages and defective items must be reported to us within one (1) business day (24 hours) of delivery. All claims regarding billing errors, (pricing, terms, etc.) must be reported to BFG Supply or our representative within 30 days of delivery. Immediately upon receipt of truck shipments, examine the shipment carefully before signing the freight bill. If damage or shortage is evident, do not accept shipment without notation on the freight bill by the driver. Failure to do so may prevent you from filing a claim with the carrier. If you need assistance regarding damage claims, please contact your nearest BFG service location. A photograph of damaged product needs to be included with any damage claim. Merchandise found to be defective will be picked up (or field destroyed if you are advised to do so) and full credit will be issued provided the merchandise does not look like it has been abused or misused and is in accordance with the manufacturer's warranty policy. BFG Supply is not liable for damages, injuries or loss of revenue as a result of a manufacturer's defective item.

DELIVERIES

BFG delivers to customers in designated delivery areas according to an established daily routing schedule. Although we do our best to run the same routes on the same days each week, unavoidable circumstances may arise which prevent us from adhering to our normal schedule. Please note that we will do our best to make sure you receive the product you need when you need it. BFG delivery charges vary by location. Please contact your local BFG service center for pricing. Or ask your Sales Representative or Customer Service Rep for current delivery charges. Backorders may be subject to delivery charge. Delivery via BFG vehicles or trucks is subject to the equipment available at the BFG Service Center and the ease of access to the destination. Please contact your delivering service center for details. Some orders may be shipped via Fed-Ex/UPS/ Etc. at the buyer's expense and are subject to an additional order handling charge. Deliveries outside of our designated area may not ship via BFG and additional freight charges may apply. Please check with the local BFG location for complete details. Please note: all flower and vegetable seed for plant growers are shipped from our Harrisonburg Facility. No orders may be shipped via UPS for a C.O.D. purchase. These orders must be prepaid. Advanced payment arrangements must be made with your local BFG Service Center for all BFG truck deliveries. BFG drivers do not carry cash. Important: All orders for delivery via BFG tractor-trailer must be phoned or faxed in at least 48 hours prior to your scheduled delivery day. BFG will accept "add-on" orders before 10:00 a.m. on the business day prior to your scheduled delivery day but cannot guarantee that they will fit on the trailer. It is necessary that the customer has appropriate personnel present to assist our drivers in unloading.

WILL CALLS

Customers who wish to pick up merchandise from our warehouses are most welcome to do so. However, merchandise is not available in all locations; please call to verify if item is stocked. To help expedite your order, please call your order in ahead. Orders for pick up in the morning should be called into the office by 5:00 p.m. the day before. You may pick up items between 8:00 am-4:30 pm.

Continued on page 12

RECOMMENDATIONS

All recommendations made by BFG are compiled from recognized horticultural sources or BFG's knowledge of recognized industries. BFG makes no warranties regarding any recommendation made and BFG is not responsible for any alleged losses of Buyer due to any recommendations given by BFG Supply Co. or its personnel.

NOTICE TO PURCHASER

Seller's and manufacturers' only obligations shall be to replace such quantity of product proved to be defective. Before using, users shall determine the suitability of the product for their intended use, and users assume all risk and liability whatsoever in connection therewith.

WARRANTIES

BFG makes no warranty of any kind, whether that be expressed or implied. Except as expressly provided in these Terms and Conditions, all implied warranties or conditions (whether statutory or otherwise) are excluded to the fullest extent permitted by Law. BFG makes no warranty respecting the merchantability of the products or their suitability or fitness for any particular purpose, non-infringement of third-party rights nor does BFG make any warranties against latent defects.

Some product(s) sold by BFG may be accompanied by manufacturer warranties from the party that provided BFG with the product(s). All such warranties shall be the responsibility of the manufacturer of the product(s) purchased from BFG, if any warranties exist.

Credits are limited to the amount of the original sale. Because of varied interpretations of standards at the local level, Seller cannot warrant that the product meets the requirements of the Occupational Safety and Health Act, or of any local acts or codes that may apply. In the event of litigation through the courts arising from any purchase, the Buyer consents to and submits to the jurisdiction and venue of the courts of Marion County, Indiana. Mail, phone, and internet orders accepted are subject to these terms and the Buyer in acceptance of the shipment agrees to these terms.

BFG Supply warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container. Subject to the limitation of liability set forth in the preceding sentence, BFG provides a limited warranty that at the time of delivery, seeds or bulbs sold by BFG are as described on the container, within recognized tolerances. As set forth above, BFG gives no other or further warranty, expressed or implied. Note: Every effort has been made to provide current, accurate product information. Product guides/catalogs are intended to represent the many products offered by BFG Supply Co. Call your servicing BFG warehouse for updated product information or if you don't see a product or size you need. Chances are we can help you. Here are three points to keep in mind as you prepare to place your order:

1. Order early because stock availability of some items is unpredictable.
2. Prices included in any BFG product guides are intended as instructive guidelines only.
3. Prices may change without notice.

FORCE MAJEURE

BFG is not liable for failure to fulfill its obligations for any accepted Order or for delays in delivery due to causes beyond BFG's reasonable control including, but not limited to, acts of God, natural or artificial disaster, riot, war, strike, delay by carrier, shortage of products, acts or omissions of other parties, acts or omissions of civil or military authority, government priorities, changes in law, material shortages, fire, strikes, floods, epidemics, quarantine restrictions, acts of terrorism, delays in transportation or inability to obtain labor, materials or products through its regular sources, which shall be considered as an event of force majeure excusing BFG from performance and barring remedies for non-performance. In an event of force majeure condition, the BFG's time for performance shall be extended for a period equal to the time lost because of the force majeure condition without subjecting BFG to any liability or penalty. BFG may, at its option, cancel the remaining performance, without any liability or penalty, by giving notice of such cancellation to the Buyer.

PROVISION OF AND RELIANCE UPON ACCURATE FINANCIAL INFORMATION

BFG makes all decisions related to the extension of credit to the Customer based upon the disclosures made by the Customer in the BFG Supply Co. Account Application. All parties executing these Terms and Conditions and the Account Application represent and warrant that the information provided to BFG Supply Co. are true and accurate in all respects. BFG Supply Co. is a wholesale distributor and does not as a part of its general practice sell to individuals. All parties executing these Terms and Conditions and the Account Application further represent and warrant that the Customer is a legal entity validly existing and authorized to do business in the State of its formation at the time of the execution of the BFG Supply Co. Account Application and that any changes in the status of the Customer as a legal entity will be disclosed to BFG Supply Co. within ten (10) business days of the occurrence of any changes in the status of the Customer. If Customer is a limited liability company, corporation, or a partnership, Customer must provide BFG Supply Co. with its Tax Identification Number contemporaneous with the execution of these Terms and Conditions. If Customer is a sole proprietorship, Customer shall provide BFG Supply Co. with Schedule C to its tax return.

These Terms and Conditions may be found at www.bfgsupply.com. These Terms and Conditions of Sale are subject to revision and change by BFG Supply Co. without notice, however, the then current Terms and Conditions maintained at www.bfgsupply.com shall be applicable to an given order at the time it is made and shall control.

Customer and, if applicable, all Guarantors hereby execute and agree to these Terms and Conditions and agree to be fully bound by the same.

By its execution of the terms and conditions the applicant affirms and certifies that the information provided on the account application is true and correct. By its execution the applicant acknowledges they have read, understand and agree to be bound by these Terms and Conditions and that they will comply with all of the requirements set forth in these Terms and Conditions.

Potting Soil

Nectar for The Gods 4 Shot Potting Soil

Oregon's Only's newest addition to the soil blend offerings. 4Shot Potting Soil utilizes all of the same components as the #4 all-purpose soil blend, with the added benefit of One Shot time-release fertilizer blended into the mix. This is Oregon's Only's answer to an all-purpose, heavily amended, fertilized soil, incorporating coarse diatomaceous earth, One Shot, and the original fertilizer blend base of the #4 mix.

Royal Gold® Tupur Mix®

Tupur was designed with the idea feeding your plant as much and often as possible. Though not your typical 70/30 coco perlite blend, it is a blank slate to create your own high performance feeding regimen. As a coco fiber based soilless medium, it requires high levels of calcium and magnesium to unlock its true potential.

Other

Down To Earth™ Garden Lime

Down To Earth™ Garden lime sweetens your soil (raises the pH) to improve plant growth and maximize fertilizer performance. Natural limestone is ground into an ultra-fine powder and then formed into uniform mini granules (prills) for easy spreading and rapid reaction time. Lime supplies calcium, an essential nutrient required for proper plant growth.

Liquid

Down To Earth™ Liquid Calcium 5%

Down To Earth™ Calcium is an essential nutrient that plays many important roles in plant growth. DTE™ Calcium is needed for cell wall formation, normal cell division in new growth and proper fruit development. Calcium deficiency can result in poor root development, yellowing of new plant tissue and fruit and vegetable abnormalities, such as blossom end rot in tomatoes.

Central Coast Garden Products pH Down

Perfect for commercial reservoirs. The maximum strength pH Down consists of a 75% concentrated Phosphoric Acid solution that quickly lowers pH levels with a gentle, but very strong formula. pH levels outside recommended ranges can lead to nutrient lockout and nutrient deficiencies resulting in stunted growth and poor appearance.

Grotek™ Cal Max™ 2-0-0

Cal-Max™ works to charge soilless media and bring plants back from common minor nutrient deficiencies resulting from nutrient imbalance, rapid growth, or overly humid conditions. A must for growers using coir based soils. Available Nitrogen fuels chlorophyll and protein production to quickly re-green starved plants.

HDI Europonic Nitrozime® Marine Algae Extract

Europonic Nitrozime® Marine Algae Extract is a plant nutrient supplement derived exclusively from a natural form of marine algae known as Ascophyllum Nodosum. It contains over 50 naturally occurring trace minerals and macro nutrients. Long known to farmers for its rich value, seaweed has been used for centuries in coastal communities as a natural way to feed plants.

Neptune's Harvest® Tomato & Veg Fertilizer 2-4-2

This is a perfect complete fertilizer for your tomatoes, vegetables and more. Made from fresh fish, seaweed, molasses, yucca extract and humic acids, this formula was uniquely designed for plants with intense growth or "vegging" stages. Growers using "Tomato & Veg" have seen increased stalk/stem mass resulting in higher yields.

Netting

Tenax Hortanova® Trellis Net

This strong and versatile polypropylene mesh trellis is designed for growers looking for gentle and efficient plant support. Tenax Hortanova Trellis Net helps increase yields by providing greater exposure to sunlight and air circulation for climbing vegetables as well as a support for flowers. Light and easy to install, UV treated, resistant to bacteria, chemicals, and mold, Tenax Hortanova Trellis Net is designed to fully satisfy the requirements of a variety of growing techniques - both vertical and horizontal.

LIGHTING

SPYDR 2h

PRECISE AND UNIFORM LIGHTING FOR INDOOR RACKS

In 3 sizes and with 10+ rack mounting options, the SPYDR Series can illuminate all types of vertical racks and grow tables with precise and uniform light on the plant canopy. The two PPF output levels and built-in dimmability enable the exact and dynamic PPF control over each of the plant growing stages. The SPYDR Series is the indoor lighting solution for all growers looking for an edge in efficiency, quantity, and quality.

SPYDR 2 series is ideal for high PPF cultivation with single or multi-tier racking – from veg to bloom. The series has an average PPF up to 1,060 $\mu\text{mol}/\text{m}^2/\text{s}$ over a 4'x4' (122x122 cm) canopy.

New SPYDR 2h
28% increase in PPF results in greater efficiency and maximizes space with greater light intensity.

Detachable Power Supply
The SPYDR 2 Series features a detachable Power Supply that can be mounted remotely on the side of a rack or on an adjacent wall to remove heat from your grow space. With the power supply remote mounted, the remaining SPYDR 2 fixture is only 1.3" (33 mm) thin (4.6" (117 mm) with power supply attached).

Easy Mounting Options
With the ability to maximize use of your growing space, SPYDR 2 has various hardware options for easy mounting to all types of racks and tables with no drilling or other modifications to the rack system. Recommended mounting height of 6"-12" (152 x 305 mm) above plant canopy.

Push-lock Connectors
For quick and easy installation, all SPYDR 2 Series fixtures and associated cables have been updated with Push-Lock connectors. Power and dimming cables now snap together with a light push while still retaining their IP66 wet-location rating.

RAPTR SERIES

INTRODUCING FLUENCE'S NEXT GENERATION TOP LIGHT SOLUTION

The new high-output top light ideal for 1:1 HPS replacement

The RAPTR Series high-output top light is ideal for 1:1 HPS replacement in controlled environment agriculture. Designed to deliver maximum intensity with industry leading efficacy in a fully sealed fixture, RAPTR is available in two optical distributions and a range of PhysioSpec™ spectrums designed for high-intensity indoor horticulture and high-efficiency greenhouse applications.

HIGH EFFICACY AND OUTPUT

- 1000W High Performance LED - Maximum Output - Maximum Yield Gains
- 800W - Ideal for growers looking to both reduce energy costs and increase light levels

BUILT TO LAST IN GREENHOUSE ENVIRONMENTS

- IP66 waterproof rating for easy cleaning, long lasting performance in tough environments, and resistance to fog, disinfectants and crop sprays.
- Extrusion design holds the build-up of surface dirt and dust on the fixture, enabling easier cleaning.

SIMPLE FLEXIBLE MOUNTING
Versatile design for easier custom mounting in a wide range of applications.

0-10V DIMMING
Compatible with all major greenhouse control systems. Pair with Wireless Flex Dimming for maximum versatility and reduced wiring.

SIX PhysioSpec™ SPECTRA OPTIONS
From broad white to high red, including Broad Red with 5% green

TWO OPTICAL DISTRIBUTIONS
Standard 120° clear cover and 150° wide lens

IRRIGATION

COMPLETE IRRIGATION SYSTEM DESIGN

DRAMM

**Irrigation systems are more than just nozzles or drippers.
A complete system requires fittings, filters, valves and controls.**

BFG & Dramm can design and ship your next irrigation system complete, including all of the necessary connections, filters and controls. Having us design your system costs nothing and saves time and trips to the plumbing supply.

Make sure your system works as it should, is protected against clogs and is ready for maintenance. BFG Dramm has the expertise needed to make your system work properly.

BFG Dramm can provide a complete quote for your system and will include an itemized parts list and a basic schematic. More complex systems may require additional drawings.

DRAMM

Watering Tools & Supplies

Dramm® ColorMark™ Rain Wand™

Save time and water while thoroughly watering plants, flowers and shrubbery. This superbly balanced wand provides a gentle, full-flow shower that won't wash away soil or harm tender plants. The ColorMark rain wand has a foam grip for comfortable watering. The brass shut-off valve is handcrafted and durable.

GRO-SLAB 12"	20.25	607.50	5	6 MINUTES

If you do not have the ability to set run times in seconds, simply run up to the next whole minute. The flow rates of these drippers are low enough where the additional drainage will not have any noticeable effect, but having too little drainage may.

Best Practices

The above shot volumes and run times are aimed at vegetative growth. When going from the vegetative stage to the generative stage, you may need to double the shot volume and double the time in between shots. This results in a slightly lower water content (WC) and higher EC in the substrate, which steers the plants in a generative direction. It is unknown how strong the effect is, but maintaining a root zone close to saturation with lower EC generally steers plants towards vegetative growth, so we want to do the best we can to steer towards reproductive growth when it is desired.

Always maintain the same volume applied per irrigation "shot" (say either 101.25 mL for veg or 202.50 mL for flower in a 6" cube) and add additional irrigation events to achieve the desired runoff % and EC content of the rockwool substrate. For the first week or two, you may only need to water once a day. However, it is perfectly normal to reach a point where your plants will need to be irrigated with these small shots upwards of 20 times per day, especially for outdoor and intense light greenhouse applications or very large plants in small cubes.

Begin with the first shot roughly 1-3 hours after sun-up (or lights-on) and stop irrigation events 1-3 hours before sun-down (or lights-off) to allow a bit of dry-back overnight and to prevent root rot (1 hour for vegetative stage, up to 3 hours for generative stage). The purpose of this 'multi-pulse' method is to maintain the root zone at the ideal balance of water content, oxygen and available nutrients at all times, preventing the plants from becoming stressed due to low water content, deoxygenation, or unbalanced nutrition/salt buildup in the root zone.

Greenhouse Ventilation

Schaefer® Fiberglass Exhaust Fans

Schaefer's narrow profile, fiberglass housing exhaust fans are designed to exhaust a lot of air for a long time. All fans ship fully assembled and have self-adjusting belt tensioners and heavy-duty aluminum shutters installed.

Features:

- Available in 36in, 48in and 52in sizes
- Heavy-duty, totally enclosed, maintenance free and energy efficient motors
- Long life pillow block bearings
- Large radius fiberglass venturi for maximum airflow, long life and good looks
- Galvanized or stainless blades for high performance and long life
- Efficient and reliable spring belt tensioning system
- Two-year limited warranty; 15-year housing warranty

Fiberglass Exhaust Fans

Schaefer® Direct-Drive Exhaust Fans Direct-Drive Shutter Style and Flush-Mount Exhaust Fans

Schaefer's high quality, long life, exhaust fans are a cost-effective way to exhaust air and moisture from most greenhouse facilities. Designed for low to medium volume exhaust airflow and suited for a broad range of facilities. Use PFM flush-mount exhaust fans for larger exhaust airflow requirements and to enable mounting the fan flush with the interior wall and exhausting through thicker walls.

Features:

- Available in 9in, 12in, 16in, 20in and 24in sizes
- Heavy-duty, totally enclosed, maintenance free and energy efficient motors
- PFM flush-mount style fans have polypropylene blades, rugged polyethylene housings and PVC or aluminum shutters for long life
- Two-year limited warranty; 25-year polyethylene housing warranty

Direct-drive flush-mount style variable speed* exhaust fan

Schaefer® Wet Wall Evaporative Cooling System

Ideal for cooling greenhouses, warehouses, and other large facilities. Schaefer's Wet Wall Evaporative Cooling Systems, in conjunction with Schaefer exhaust fans, provide up to 30°F of cooling for large volume buildings, from the evaporation of water from wet wall pads (evaporative media).

- Custom lengths and heights available.
- Up to 5-year pad life with proper pad maintenance.
- Choice of 1 Hp and ¾ Hp Gould™ pumps; 110V or 220V.
- Single- or multi-stage automatic controls available.
- Easy to install, operate and maintain.
- Water that does not evaporate is recycled through the pads; no wasted water.

Wet Wall Pads/ Evaporative Media

Used in Schaefer Wet Wall Cooling Systems and wet wall systems from other manufacturers, wet wall pads are fluted cellulose pads designed for maximum airflow, maximum evaporation, structural strength and long life.

Schaefer® Eventherm® Single Phase Thermostat

Automatic controls to control fans and heaters and optimize thermal comfort.

Controllers

System Access

An Argus Server PC is used to access control system information and adjust control settings. This can be any standard PC running the Microsoft Windows operating system. The Argus Server PC also performs housekeeping duties such as storing long-term archival data and backup copies of all control and system configuration settings in the controllers. The Server PC provides password-protected access to the control system enabling authorized users on other PCs to connect to the system via wired or wireless Ethernet networks and the Internet.

Controllers

Argus Titan II controllers are the powerhouses at the heart of the Argus system. We custom program each one to manage your specific applications. They are fast, rugged, highly configurable, and can run more applications than most controllers in their class. They can also be easily networked together for seamless control of any sized facility.

- Separated I/O
- Dedicated Control
- Seamless Integration

I/O (Input/Output)

Argus Controllers use slaved I/O Modules for high-resolution data acquisition from connected sensors and precision equipment control. We also provide UL listed interfacing equipment as needed for switching line voltage motor loads.

- I/O Modules
- Sensors
- Equipment Control
- Line Voltage Interfacing

Multi-Feed Nutrient Injection

Argus Multi-Feed injectors including the Multi-Feed RM are designed and manufactured exclusively by Argus and feature some of the most advanced capabilities of any nutrient control equipment including full single-element dosing options. The injectors are capable of 'on-the-fly' delivery of multiple stock concentrates regardless of the system flow rate. With a Multi-Feed injector, you can use the same dosing equipment to deliver dozens of different recipes. You can also modify the feed concentration and chemistry to suit the current conditions. Fully integrated with the comprehensive irrigation and fertigation capabilities of the Argus Titan system, Multi-Feed injection systems enable you to simply 'dial-in' a precision feeding program for every crop.

Software

Titan 900 Software

The Titan 900 software offers an enhanced user experience with innovative visual controls and value added features (such as intuitive visual controls, enhanced graphs, API, and smart reporting). The refreshed user interface uses color and layout strategies that can be customized to suit individuals' need for style and information. Our software is designed to de-clutter the interface, optimize visualization of your facility's data, and focus your attention on what is important to you.

Argus Live

With a live view of your operation, you can monitor, analyze, and run your facility in real time, giving you full control whether you're at your desk or on the move. It is a safe, secure, and powerful enhancement to one of the most advanced environmental control systems on the market.

BioTherm - Plantcentric Controlled Environment

A BioTherm system is an ecosystem of integrated products specifically optimized for maximizing efficiency and production. BioTherm's mission is to create the perfect environment for optimized plant growth. With over 40 years of experience, BioTherm is the leader of providing efficient climate solutions to growers. Their systems are designed to work together within the greenhouse, creating the perfect ecosystems for plants to not simply grow, but thrive.

COMPLETE CLIMATE ENHANCEMENT BY BIOTHERM

Plantcentric Controlled Environment Arcade (CEA)

BioTherm believes that greenhouses are for growing, not to be used as equipment rooms.

This controlled environment arcade attaches separately to your greenhouse to allow for complete climate control. Plantcentric CEA is a complete engineered modular solution for your greenhouse climate needs to provide the optimal growing conditions for indoor plant propagation. Ideal environmental setpoints are used to design the appropriate equipment required to maintain these values.

The PCEA is available to run over 10 modes, ranging from 100% recirculation, heating, cooling, dehumidification, CO2 enrichment, and more.

BioTherm - Heating & Hydro Sciences

Dissolved Oxygen Infusion

BioTherm's dissolved oxygen systems are an efficient method of increasing the dissolved oxygen (DO) content of irrigation water, significantly improving plant health and productivity. Dissolved oxygen is proven to increase nutrient uptake, root growth, and plant yield. By using BioTherm's dissolved oxygen technology, cannabis growers have reported over 10% greater yield and higher potency. Vegetable growers have reported a significant decrease in nutrient cost and doubled their finished crop size. BioTherm's has an extensive lineup of dissolved oxygen products and accessories. Their dissolved oxygen systems are scalable to any size to fit your desired growing operation!

Flood & Cascade Floors

BioTherm's innovative Sub-Irrigation technology provides a quick responding irrigation cycle time which is critical to greater control of nutrient uptake, timing, and prevents oversoaking. BioTherm's Flood and Cascade Floor systems save water, energy, fertilizer and reduce labor costs by up to 95%.

Irrigation Tempering

Experience optimal plant growth with tempering solutions customized to your operation. The use of BioTherm's pre-heating and pre-cooling systems will prevent thermal shock, increase rooting, and prevent disease.

Heating

BioTherm is the leading provider of efficient greenhouse heating to the CEA, horticulture, and cannabis industries. With over 40 years of experience, BioTherm has an extensive history of developing and manufacturing high-quality heating systems for a wide range of applications, including commercial greenhouses, indoor grow rooms and vertical farms. This has allowed them to accumulate a wealth of experience and knowledge in the field, which has led to the development of cutting-edge cultivation climate technologies that meet the unique needs of growers in the CEA, horticulture, and cannabis industries.

Roll'N Grow™

Roll'N Grow™ is the perfect way to apply Root Zone Heating (RZH) to growing beds or benches! Like a carpet, your growing surfaces can now be covered with growth-enhancing gentle heat in a fraction of the time it used to take..

Fin Pipe – DuoFin™ & StarFin™

BioTherm DuoFin™ is the lowest heat output finned pipe commonly used for under-bench, perimeter, and in-crop heating. BioTherm StarFin™ is a high heat output finned pipe commonly used for bench, perimeter, top, and gutter heating.

Raypak Boilers

The central part of hydronic systems! Modulating up and down to different heat loads, easily daisy-chaining to combine heat outputs, provide clean CO2 with our enrichment systems, and cascading boiler systems to follow the seasonal changes for optimal boiler efficiencies

Hydro Sciences

BioTherm Hydro Sciences has one simple focus... to enhance your irrigation system and boost plant growth using cutting edge technologies with efficiency in mind. Our products are proven to increase yields, improve plant vigor, and increase resistance to diseases and pests.

BioTherm - Optimized Air

BioTherm has proven systems designed to optimize the air inside your facility and enhance your growing conditions so that even crops not normally grown in your region can flourish. They can take the temperature and humidity down just a touch, or they can close the access to outside air and bring those factors way down. It is all in the design, and BioTherm's experienced team knows how to engineer and deliver systems made specifically for rugged cultivation environments using special air handlers or standalone dehumidifiers.

CO2 Enrichment

CO2 levels are naturally low in a greenhouse environment as plants use available CO2 as part of the photosynthetic process. Increasing CO2 levels above ambient conditions promotes increased plant growth and health. With the right condensing boiler system in place, a BioTherm CO2 system can easily be integrated to achieve elevated CO2 levels in the greenhouse environment. BioTherm's system pulls CO2 directly from the boiler's exhaust gases, cleans it, and distributes it uniformly into the growing space. The CO2 system delivers clean, safe, and dry CO2 to your growing environment.

Centralized 4-pipe systems

BioTherm understand the demands of indoor gardening and greenhouse crops. A major issue is moisture control & humidity management. BioTherm has developed a line of pragmatic dehumidification and air temperature control solutions for agricultural applications without compromising performance. These systems run off hydronic circuits connected to pumps & high-efficiency Raypak boilers and chillers—all located remotely.

Standalone Dehumidifiers

BioTherm AC/Dehu systems can be customized to accommodate your greenhouse design, saving you space, cutting costs, and conserving energy. Moisture control and humidity management are fundamental needs within any growing environment. BioTherm's newest greenhouse and grow room AC/Dehu systems allows them to meet the needs of any grower while providing efficient solutions without compromising performance. From standalone units to fully engineered system designs, BioTherm can help provide the optimal air environment for your growing operation.

MAKE YOUR OWN WEATHER.

Watering Booms and Systems

Single Rail Boom

Cherry Creek's Single Rail Boom is a cost-effective automatic system, designed with simplicity and efficiency in mind and ideally suited for smaller bays with simple watering requirements. Its rugged, compact housing is built to move up and down a greenhouse on one rail. It's spray bar is turned on or off by a single solenoid, and the boom waters the full width of the bay.

Double Rail Boom

Cherry Creek's Double Rail Boom offers the versatility of independent watering of the right, left, or both sides of the greenhouse, along with walk-through for walkways. With the stability of two running rails, boom sway is eliminated. Combined with the New TIC, the Double Rail Boom handles the most complicated application requirements, assuring precise rates of water and chemicals. Save significantly on both water and labor costs. Booms are nearly fully assembled and simple to install.

Walking (Navigator) / Tower Booms

Cherry Creek's Tower Boom is designed to be a workhorse for all of your irrigation, maintenance and crop inspection needs. It is almost completely pre-assembled at the factory, and is supported by rails mounted off the gutter posts on both sides of the bay that span the width of the greenhouse.

- Rugged construction
- Precise application of water and chemicals
- Water savings and reduction in labor
- Adaptable for conveyors and scaffolding
- Pre-assembled for easy installation
- Transportation system for equipment & humans.

ECHO Hanging Basket System – Water By Weight

The ECHO System allows for accurate measurements of water to each basket. Additionally, fertilizer applications can be consistently controlled, resulting in faster production times, higher yields, and more crop turns per season.

The NEW WBW (Water By Weight) Controller has the following features:

- 10" Touch Screen with Wifi capability for cell phones & iPads
- Water By Time Mode / Water By Weight Mode, 7 Day Schedule with Repeat Cycle every "X" hrs., 16 Schedules.
- WBW mode has a dry weight and wet weight setting for optimal root growth.

NEW TIC (Touch Irrigation Controller)

Boom automation allows for controlled application rates of water and chemicals, which reduces overspray and results in long-term savings. Automatic irrigation will also significantly reduce labor costs. The new TIC is available on the Double Rail Booms, Walking (Navigator) Booms and Tower Booms. The TIC has the following enhancements:

- 16 Crops with their own 8 Areas that can Water, Mist and/or SSW all within the same Crop, 4 Schedules with 7 days of the week options. (ssw = step, stop, water).
- Auto Mode / Manual Mode with Queue position over-ride
- Touch Screen with Grower Friendly Menus
- Wifi capability for cell phone/iPad & remote access.

The gentle movement of the plants as they go through the watering mode allows them to experience various lighting exposures and air movement over the surface, which promotes healthier growth. The ECHO leaves the factory fully assembled, making installation fast and simple.

Conservation Systems

FOGCO products are becoming standard equipment for all greenhouse applications. FOGCO has become an industry leader in humidification and cooling by developing innovative products to meet environmental needs.

Fog systems are proven to positively impact growing operations by regulating the temperature, humidity, and moisture content within the greenhouse. Fog systems are ideal for addressing and correcting the problems associated with high temperatures and/or low humidity levels. This promotes increased health and productivity within the greenhouse by eliminating plant water stress, one of the most significant factors in the growth of all plants. Plants lose their moisture through evaporation from the leaves. They also gather carbon needed for growth in the form of carbon dioxide through the leaves. By controlling the plants' pores through the use of a properly designed fog system, the results are stronger and healthier plants with optimum growth potential. Fog systems can also be used to introduce fertilizers by injecting nutrients directly into the atmosphere. The moisture and the nutrients are absorbed by the leaves of the plant.

Features:

- Revolution Fan system provides 360 degree fog distribution.
- Ensures proper humidity levels.
- Reduces demand for moisture.
- Maintains favorable conditions.
- Creates in-house propagation stock.
- Reduces need for shading/whitewashing.
- Reduces irrigation/water consumption.

Odor Control

FOGCO has teamed up with Cannabusters to develop and deliver the industry's first 24/7 monitoring, reporting, and self-adjusting system. Independently tested and proven at 98.7% efficacy, odor concerns are now a thing of the past. FOGCO offers custom designs and solutions from large scale commercial greenhouses to hobby houses and any size or type of application in between.

Features:

- Odorless odor control technology - no additional VOCs or residual oils/smells like other systems that use enzymes or fragrances for masking.
- Nontoxic, environmentally friendly, no contamination impact.
- Designated as best available control technologies (BACT) by a professional engineer and certified industrial hygienist.

Crop Level Airflow™

FOGCO has reengineered horizontal airflow technology to improve plant health while reducing energy costs by up to 70%. The Snap-Fan EC20 Max is a variable speed fan specifically designed to provide the proper air speed at the plant's stomata resulting in increased CO2 uptake and photosynthesis.

Features:

- 4370 thrust CFM **** Tested at BESS Lab.
- 220% wider air cone at 40' compared to industry leading HAF.
- Brushless electronically commutated (EC) Motor.
- IP 54 water resistant.
- Discrete or variable speed.
- Patented mounting system reduces vibration and noise.
- Made in USA.

Fertilizer Injectors

J+ Advanced

H.E. Anderson J+Advanced Series Ratio:Feeder® Injection Systems

J+Advanced Ratio:Feeder® Injector Systems can inject almost any liquid chemical into a water line at a set ratio. Most common uses include fertilizer injection, acid injection for pH stabilization, chlorination, and sanitization.

All J+ Advanced Injectors can be configured to pump multiple chemicals or solutions at different ratios. Systems can be configured to work with flows ranging from 1/4 gallon per minute to 10,000 gallons per minute. Common injection rates range from 1:100 to 1:10,000. Injectors require at least 30 psi to operate with a maximum of 125psi or 100psi depending on which blend tank is utilized. Controllers can be powered using 120VAC or 12VDC.

J+Advanced injectors can be purchased as complete assembled units which fit most common applications or as individual components sized especially for your specific application.

- J+ Advanced CONTROLLER - Connects to the water meter and pilot valve/manifold. It measures the water flow using the water meter then turns the pilot valve on and off to stroke the pump heads at the proper rate to maintain the set ratio.

- WATER METER - Used by J controller to measure water flow. Many different models are available which can measure flows from 1/4 GPM up to 10,000 GPM.

- MANIFOLD/PILOT VALVE - Pump Heads are mounted to the manifold. The Pilot Valve, which is controlled by the J Controller, provides water pressure to the pump heads to make them pump.

- PUMP HEADS - Pump Heads are what actually pump the chemicals. Many different models and sizes are available to handle almost any liquid and feed ratio.

- BLEND TANK - Ensures the chemical injected into the water line is blended uniformly ensuring even distribution and allowing for accurate measurements to be made.

H.E. Anderson® J+Advanced Controller

Connects to the water meter and pilot valve/manifold. It measures the water flow using the water meter then turns the pilot valve on and off to stroke the pump heads at the proper rate to maintain the set ratio. Includes latest features, new backlit display and full keypad.

DB Series

DB Wall Mount Series

DD Series

H.E. Anderson D Series Ratio:Feeder® Injector Systems

The DB & DD Series offer an inexpensive way inject almost any liquid into a water line at an adjustable ratio. Built with the same quality and pride as the J Plus, these pumps will inject one chemical up to a 1:100 ratio with models rated for 20 or 50 GPM. These models feature an adjustable feed ratio which makes fine tuning the injection ratio as easy as twisting a knob. Injectors can be turned down to 1/10th of their maximum feed ratio.

- Industry leading quality - legendary dependability helps save time on maintenance
- Easy installation and operation
- Positive Displacement - extremely accurate injection helps save money on chemicals
- Diaphragm Operation - No sliding seals, accuracy does not degrade over time
- Volume proportioning - constant chemical levels regardless of flow rates
- Adjustable feed rate - change the feed rate while unit is operating and without recalibrating
- Filter not required
- Extremely low pressure loss
- Low power consumption
- On/Off and Pulse Button

BFG Item#	Model	Water Flow Range	Maximum Feed Rate	Typical Use
HEANDB100	DB100	1/4 to 20 GPM	1:100 or 1%	Fertilizer

Controllers

Link4 iPonic Indoor Controller Line

The iPonic Indoor controller line is ideal for smaller indoor growing applications. Single or dual zones utilizing 8 outputs allows you to control most needs for indoor growing. The iPonic series of controllers is compatible with the Link4 Cloud, which will allow you to monitor, control, graph, report and receive alarm notifications.

Link4 iGrow 1800 Advanced Indoor or Greenhouse Controller

The iGrow 1800 offers the finest in greenhouse and indoor growing experience. Used for larger and more complex grow situations, the iGrow 1800, you can increase productivity while reducing energy use and operating costs. The iGrow 1800 series offers 24VAC intelligent controlled outputs that can be expanded up to 144 outputs for fans, heaters, vents, irrigation, supplemental light and DLI, shade curtains (blackout curtains), and more. Combine the iGrow 1800 with the iDoser to automate dosing and fertigation.

- Advanced control, affordable price
- 24VAC intelligent controlled outputs expandable up to 144 outputs
- Advanced irrigation (VDP or Soil Moisture Content)
- Advanced lighting control (DLI)
- Auxiliary controls are flexible and user defined to control conditions to fit your unique growing requirements
- UL Listed for safety and easy permits
- Runs off Linkconn software or with the new 1800 Cloud for remote accessibility

Other Equipment

B-Line Flat and Pot Filler (Model 5343)

The B-Line is the most popular Kase Flat Filler, supporting the container sizes used by most greenhouses and nurseries. It is ideal for peat moss-based soils, is easy to operate, quiet and easily maintained.

With its generous 1.5-yard hopper, the B-Line offers a production rate up to 1,200 flats per hour, and it handles containers up to 18in wide x 12in tall. Feed your B-Line with a Kase 3561 Gobbler or 3538 Small Bale Buster.

Additional Filler Models include the high production N-Line, large capacity Super-B, and Minor-B for plug trays and smaller containers.

Gobbler (Model 3561)

The Gobbler is designed to process large 135 cu. ft. compressed bales (as well as smaller bales) into a fluffed and moistened potting soil, with a production rate up to 75 cubic yards per hour. The hydraulic lift gate platform is easily loaded via forklift or pallet jack. Basic start/stop controls or automated sensors allow the Gobbler to integrate with other processing equipment, such as a Kase Filler or 4300 Series Soil Conveyor. The Optional TopHopper dispenses an amendment of your choice directly into soil as it is processed through the Gobbler.

Modular Belt Conveyors (4100 Series)

If you are looking for versatility and portability without sacrificing durability, the Kase Modular Conveyor's simple design allows these conveyors to be easily networked to cover extended distances without sacrificing power. Conveyors are available with 10" and 15" wide belts and variable speed or reversing controls. Optional adjustable height stands are available to suit your production line.

Soil Mixers (3400 Series)

Kase offers four sizes of Batch Mixers to meet your needs for rapid, complete and uniform soil mixing. The 3/4 yard unit has a center discharge, while all other Kase Mixers have an end discharge. Each Mixer includes a spray apparatus for moistening soil and a safety grate with splash guard shielding the top of the unit. The 2 and 4 yard models incorporate a bolted replaceable bottom barrel, available in heavy duty abrasive resistant material.

Kase Water Tunnel

Watering Tunnels are used to water plant material that is planted in flats, pots, hanging baskets or other containers. Watering tables have smaller Drip Nozzles placed over the conveying unit to moisten plug trays. Watering Tunnels have water Spray Nozzles. They are self-contained using an open mesh Polyethylene conveying belt to move the product thru the machine at a variable speed rate, which is selected by the operator. The adjustable speed feature will help control the amount of water that is dispensed on your plant material. Different size nozzles are available also to control the amount of water flow. These units have water drip pans to catch all of the excess water into a drain at one end of the unit, which may be plumbed into an existing drain. The collection pans are longer than the spray area to catch the excess spray and have an area to place the plant material on the unit and an area to take the plant material away. Features: Stainless steel enclosure, Quad spray heads variety of nozzle size available, High impact poly chain and sprockets, Electric operated solenoid valve, Brass Ball Valve, Stainless slide racks Optional electronic control of water spray Variable drive speed Water Volume: 4gpm to 16gpm Belt Width: 12in, Maximum Flat Width: 16, Adjustable Height of Conveyor: 24in to 36in.

Propagation

Ferry-Morse® 72-Cell Hexagon Tray with Dome

Revolutionary hexagon cells encourage a better and stronger root system. The newly formed roots of a seedling are in search of water. When a root hits the wall of the hex cell it shoots straight down, eliminating circular roots. Helps minimize transplant shock for seedlings.

Wadsworth Seed®

A sophisticated new touchscreen climate control so intuitive it makes managing multiple zones a snap. Our most capable control to date.

- Highly intuitive – the easiest control you'll ever operate!
- Newest most responsive touchscreen technology
- Extensive information at a glance
 - Equipment Status lists current conditions
 - Why Code displays explanation for equipment status
- Easy navigation
- Modular design allows for easy expansion
- Remote access
- Precision control of your crop
- View equipment settings, overrides, lockout and setpoints from a single screen
- Manages fertigation using the H.E. Anderson J+ system

Wadsworth Seed® 16

Seed 16 is identical to Wadsworth's popular Seed control, but made for small-scale needs.

- Functionality and intuitive graphic interface
- Design accommodates beginners and experts
- 16-outputs, enough to support standard greenhouse cooling, heating, HAF fans, pad pump, plus lighting and irrigation
- Configured to suit grower needs, multiple zones, single zone; your choice
- Flexible electrical panel built for custom equipment
- 16-inputs – enough to support temperature and humidity sensors, an exterior weather station and multipl other sensors, like soil moisture and CO2
- Advanced sensing options include dissolved oxygen (DO), tank electrical connectivity (EC), tank pH an differential pressure (Sensors require inputs)
- Expandable

The Power of Seed

Seed App

Access your control and make adjustments using the Seed app. Whether you're onsite or not, we've got your back.

Soil Analyzer

This advances sensor reads soil temperature, moisture, and electrical conductivity (EC) and adjusts watering frequency and duration. Can be pooled with other sensors and monitors root temperature.

Fertigation

Wadsworth and H.E. Anderson work together to simplify your fertigation needs. Connect one or multiple systems to our Seed control.

Predictive Weather

Protect your greenhouse and crops from extreme weather. This weather subscription makes certain your Seed control knows a storm is coming before it arrives, allowing time for equipment to make needed adjustments.

INTEGRA™ Humidity Indicator Cards

Use humidity indicator cards to determine the humidity levels (or relative humidity, "RH") in a contained environment. Each pack contains 10 humidity-indicator cards, and each card will read RH from 10%-60%. Simply place a single card in the area to be read and wait for the indicator dots to turn bright blue in order to determine the humidity levels in that area.

Coverings Accessories

Mardenkro® ReduClean® Shade Remover

ReduClean® removes all Mardenkro® shading coatings from glass, poly-carbonate, and plastic film. It must be diluted with clean water before use in a ratio of 1 part ReduClean® to 7 parts water. Add ReduClean® to the water while stirring and Apply ReduClean evenly to a dry greenhouse surface and allow it to soak in for at least 15 minutes before brushing.

20L Pail - HAZARDOUS
MARDREDUCLEAN
Min Buy 1 EA

Mardenkro® ReduSol® Shading Coating

ReduSol has been specifically developed for applications where the coat of whitewash applied to the greenhouse must last for a whole season. It provides an attractive white, even shading coat which can be easily removed using ReduClean at the end of the season. ReduSol is exceptionally resistant to the effects of frost and rain, and is UV stabilized.

20kg Pail
MARDREDUSOL
Min Buy 1 EA

Mardenkro® ReduHeat® Shading Coating

ReduHeat sets itself apart from other, more traditional shading agents due to its different ratio between light transmission and heat reflection. It is a coating that contains a special pigment which has the ability to transmit growth light (PAR) while increasing the reflection of heat radiation (NIR).

OBSCURA 10070 FR WB+B

OBSCURA 10075 FB A+BW

Obscura - Product Family for Light Restriction or Total Blackout

Obscura Screens

The double layered Obscura screen has been giving plants a good night's rest for over 20 years. It does this by providing total blackout from daylight – up to 99.9 percent. And in the last ten years, single layer Obscura has been preventing supplemental lighting from escaping greenhouses at night. This lets neighbors get a good night's sleep and complies with industry legislation.

In both cases, the unique knitted structure provides good moisture managing properties.

Twice as versatile

The double layer also allows more options as the top and bottom of the screen can have different surfaces. Aluminium on the top, for example, provides the greatest energy saving at night, whereas white provides better cooling in sunny weather. White is also useful as a bottom layer for intensifying light inside the greenhouse, whereas black is better for absorbing and restricting interior light.

Where and when you can expect to find Obscura

For short-day plants, such as chrysanthemum, Obscura is ideal for delivering flowers in bloom – on time – for important market dates. Obscura is also popular where supplemental lighting is needed and night time light emission is a problem. This has now proven to be a good investment, as the intensified lighting increases productivity.

- Total control over day length for most sensitive plants.
- Effective cooling when a reflective upper surface is chosen.
- High energy savings, especially if one layer is aluminium.
- Light Emission control that satisfies neighbors and legislation.
- Increased productivity when used with supplemental lighting.
- More uniformity from supplemental lighting in the growing area.
- Good moisture management.

GREENHOUSE SYSTEMS

CONTROLLED ENVIRONMENT AGRICULTURE & HYDROPONICS

Controlled-environment agriculture (CEA) is a technology-based approach toward food production utilizing greenhouses structures or a building/grow room to provide protection and maintain optimal growing conditions throughout the development of the crop. Plants are often grown using hydroponic methods in order to supply the proper amounts of water and nutrients to the root zone. CEA optimizes the use of resources such as water, energy, space, capital and labor.

BFG offers a complete line of systems for CEA/Indoor Growing and can help you design and implement an efficient system where you'll have the optimal growing environment for your crop, whatever that maybe.

Rolling Benches
EBB & Flow Benches

Light Deprivation

Irrigation Systems

Growing Lights
LED & HID

Heating & Cooling

Ventilation &
Dehumidification

Fertigation

Water Treatment

DeCloet Greenhouses are a great option for CEA. They were originally designed with the purpose of growing vegetable crops hence its heavy-duty design to support hanging systems. Even with the market changes over the last few decades, DeCloet maintained its heavy-duty design making our structures perfect for today's changes and CEA providing protection and maintaining optimal growing conditions throughout the development of the crop.

When we look at lights and lighting, Greenhouses are by far the best way to raise and cultivate crops. Greenhouse structures allow growers and cultivators to harness the power of the sun maximizing the natural lighting combined with supplemental lighting.

LIGHTING DESIGN:

BFG partnered with LED cutting edge technology companies to provide you the best lighting solution. We can customize systems to optimize production and minimize costs using new technologies, traditional technologies and a hybrid between the two: HPS/ LED

HID

LED

CONTROLLED ENVIRONMENT AGRICULTURE & HYDROPONICS

BFG experience integrating systems really comes handy when connecting greenhouses with buildings and processing facilities. We can apply proven concepts of horticulture and floriculture to new crops; such as efficient ways to handle soil and soilless media, fertilizers, crop protection and plant care.

We bring decades of proven successful practices that can applied to novelty crops allowing you to be more competitive in constantly changing and evolving markets. Talk to one of our Experts about your Next CEA/Indoor Growing Project!

BFG GREENHOUSE CONSTRUCTION & SOLUTIONS

The BFG Greenhouse Solutions Team assists growers all across the United States with their greenhouse structure needs. Everything from the design, planning, construction and maintenance of new or existing sites, upgrades or remodels, our team is excited and ready to help! We offer a full range of products that include:

- Greenhouse Construction
- Coverings
- Heating & Cooling
- Ventilation
- Climate Control
- Irrigation
- Light Deprivation
- Lighting
- Indoor Grow Rooms

Our experienced team has the technical expertise to guide you through the process and provide the information you need to make the best choice for your operation!

Tap Into Our Resources

Our team is committed to you! Whatever wants or needs you have we are here to help and make the process as seamless as possible. Whether it's a re-cover, improving efficiencies or complete installation, we take pride in providing the resources you need.

Over 4 Decades of Experience

With our team of dedicated professionals, BFG brings decades of experience to each project. Based on our proven success in numerous installation projects we know we can put your mind at ease.

THE BFG & DECLOET ADVANTAGE

- Highly engineered to reduce installation labor
- Wide bay spacing available in order to maximize production greenhouse efficiency
- Superior gutter design to reduce corrosion and maintenance
- 11 Gauge heavy gutter provides added strength and structural integrity
- Posts, gutters and trusses are galvanized after manufacture for longer rust-free life
- One piece oval bows provide consistency in strength and integrity, available on 4ft and 6ft centers
- Custom designs to meet your special requirements and maximize your footprint
- Available in widths of 18ft, 21ft, 24ft, 32ft, 36ft, 42ft and 48ft
- Single, double, triple span up to 48ft wide

DeCloet Greenhouses are a superior option for CEA. They were originally designed with the purpose of growing vegetable crops, hence its heavy-duty design to support hanging systems. Even with the market changes over the last few decades, DeCloet maintained its heavy-duty design making BFG structures perfect for today's changes and CEA providing protection and maintaining optimal growing conditions throughout the development of the crop.

When looking at lights and lighting, Greenhouses are by far the best way to raise and cultivate crops. Greenhouse structures allow growers and cultivators to harness the power of the sun maximizing the natural lighting combined with supplemental lighting.

FROM CONCEPT TO COMPLETION

Having control of your growing facility makes all the difference. The BFG approach is to begin with your end goal in mind and work together to design and engineer the perfect structure and systems. With a BFG controlled environment greenhouse you'll have the optimal growing environment for your crop, whatever that maybe.

Consulting

Before you get started, you should know where to start. BFG provides complete solutions and our services span across all phases of operations - from design to growing/cultivation, and we can assist you plan for future expansion saving valuable time and money.

Systems & Controls Integration

The BFG design philosophy revolves around systems Integration: each grow facility corresponds to a system of systems, each one optimized and integrated to work together. Every element must be in perfect balance for the highest level of control so you can consistently raise high-yield crops.

TALK TO ONE OF OUR EXPERTS ABOUT YOUR NEXT CEA/INDOOR GROWING PROJECT

Featured project: *Plantpeddler Phase2 Step2 – Cresco, IA*

Structure: Custom DeCloet 8 bays of 43' wide X 216' long double poly roof
Roof vents & vertical vents – providing EXCELLENT natural ventilation
Custom connector to existing building
Growing Facility integrated with Loading Docks

Total Space: 77,000 sf

Pictures below represent – conceptual design, elevation drawing, docks (external and internal) and full rotation of PREMIUM crops: spring, summer/fall crops and poinsettia crop.

CUSTOMER TESTIMONIALS

Plantpeddler (Cresco, Iowa) "We are a year into our first DeCloet greenhouse structure and have completed the first full rotation of finished crops through the open roof ventilated structures. The quality and consistency of the plants produced in this structure have been spectacular. We have been working with BFG for many years and knew that the combination of the DeCloet structure and the BFG support would not disappoint. From the ease of construction to the terrific communication and support from both BFG and DeCloet, that premonition definitely held true." *Jason Sbiral (Facility Manager)*

PRODUCTION GREENHOUSE

We know that time is money and we can tailor our services to meet your needs. You can spend your time focused on quality plant growth and we'll focus on building you a quality greenhouse! Our goal is to provide you a piece of mind throughout the design, planning and implementation of your project.

Whether you are looking for professional advice OR complete greenhouse solutions, BFG is at your service. Between our exclusive brands and supplier partners we have the latest structures, equipment and controls to make your production facility efficiently produce outstanding crops. In addition, our team also puts emphasis on streamlining product flow in and out of your facility to help ensure a faster return on investment.

RETAIL GARDEN CENTER

BFG understands the importance when it comes to Retail Greenhouses. It's not just about having the best merchandising, it's about providing a comfortable shopping experience in a setting that is pleasant for your customers and efficient for your staff.

Our team and expertise does not stop once construction is done. BFG supplies Garden Centers nationwide with the latest and most innovative products but we all know it starts with a sound design. That is why we begin each project with the full picture in mind, from curb appeal to product flow to environmental impact. The BFG solutions team will guide you from the design stage to the day you open your doors!

CUSTOMER TESTIMONIALS

Meadowridge Inc (Zeeland, MI) – "We have been building DeCloet Greenhouses with BFG for over 20 years, these strong structures are well built and able to withstand the harsh west Michigan winter conditions. DeCloet's greenhouse design has fewer parts than most making it easier and more efficient to build. We really like the 36ft double peak with 2 roof vents per bay, we also have integrated our production and shipping space easily and efficiently using the same greenhouse frame. We look forward to using BFG and DeCloet for our future structure needs."

- Jordan Blauwkamp

Darrell Norris Greenhouse (Racine, OH) – "Looking back, selecting BFG & DeCloet Greenhouses was one of the best decisions we made. The DeCloet Greenhouses are tough and built to withstand our climate. They go together easy and when we are ready to add more square footage their expandability is great. The BFG team is truly the best, from providing the greenhouse design to construction, furnishing the proper greenhouse equipment and last but not least plant grower expertise, BFG has the experts we need. We value our relationship and we see BFG as a partner in the supply chain of horticultural supplies, we work together and succeed together. I would recommend the BFG Greenhouse Solutions team to anyone looking for a greenhouse and horticultural supplies."

- Darrell Norris

Brower Greenhouse (Hudsonville, MI) – "We have been building greenhouses with BFG and DeCloet since 1991, the heavy duty structure from DeCloet combined with the products and services BFG has to offer have been a winning combination for our company. Whether it's construction or supply needs, we truly value our relationship and will continue to do business with DeCloet and BFG Supply in the years to come."

- Kurt Brower

PRODUCTION GREENHOUSE

GUTTER CONNECTED

DeCloet Gutter Connected Greenhouses are custom designed to meet your needs as well as your crop requirements. Complying with all industry building codes, DeCloet's gutter connected ensures a strong and long lasting growing environment.

- 11 Gauge heavy-duty metal gutters provide added strength to structurally withstand the elements. They are incredibly strong and large enough to walk in, but small enough to minimize shadowing. Posts, gutters and trusses are all galvanized after they've been manufactured to ensure a longer rust-free life.
- One piece oval bows provide consistency in strength, integrity and ease of construction, available on 4ft and 6ft centers
- Highly engineered design for faster and easier assembly and construction
- Exclusive and unique design reduces clutter and maximizes growing space
- Increased light transmission
- Expandability: When you want to expand, you can easily do so without disrupting your existing growing business
- The gutter is designed for expansion and does not require disassembling existing houses
- This is the most economical greenhouse for a large operation
- Custom Sizes Available, including up to 48ft available

Standard Gothic

18ft 21ft 24ft

Twin & Triple Peak Series

28ft 32ft 36ft 42ft 48ft

MAX COOL

Max Cool is DeCloet's solution for growers that want to maximize their productivity and efficiencies. The Max Cool is a gutter connected structure.

- Triple Peak 42ft wide frame
- Similar cooling to an open roof structure
- Raised rack and pinion system
- Leading edge of the vent can be raised from the gutter to above the peak
- Maximum cooling
- Proven reliable ridder rack and pinion system
- Easy to cover with 16ft poly tubes
- Up to 35% vent to floor space ratio

VENLO GLASS

DeCloet's world class Venlo Greenhouse combines European design and North American engineering providing a structure with the latest in design for maximum light transmission and a lifetime of successful production. With the tempered glass roof and aluminum glazing system, you get the best value and the least maintenance for your business. It offers our clients a structure capable of withstanding extreme climate conditions with long term protection. The diffused glass option has been a popular option among our latest projects improving the environment climate and increasing production.

THE DECLOET ADVANTAGE

- Hot dipped galvanized steel structure
- Aluminum roof and sidewall glazing bars
- Clear or diffused tempered glass
- Under gutter height up to 24ft
- Up to 42ft wide triple peak
- Push/Pull vent system

FREESTANDING

Freestanding Greenhouses, also called Ground to Ground, are suited for professional growers who require unique environments for different crops. They provide the economical growing space and versatility needed. DeCloet's Freestanding and cold frame greenhouses are affordable and versatile structures. With a wide variety of options and sizes available, these greenhouses are practical and easy to assemble.

SUNMASTER 24ft 27ft 30ft Widths

Used as both a cold frame and grower house, this series represents our most practical and cost-effective greenhouse. It comes with our exclusive oval tubing for the roof and a full selection of options. Available in 4ft and 5ft bow spacing.

GROWERS CHOICE 30ft 35ft Widths

Excellent for both growing and as a retail house. It is stronger than anything else on the market, featuring all welded truss style hoops in the roof, with taller sidewalls. Designed to hold more hanging baskets than any other structure.

GROW MAX 30ft 40ft Widths

This webbed truss design offer more benefits and features. Features include more weight support, standard 50lbs snow load on 6ft centers, 7-12ft high straight sidewall above grade. Increased hanging basket capacity.

COLD FRAMES

These 14ft and 15ft cold frames are designed for overwintering nursery stock or as a temporary growing area. An optional extended stake package is available for extra height. The house can be purchased without stakes and can be made portable by using a baseboard to connect the bows. Most often used with a single purlin with hoop/bow spacing at 4ft O.C. to help eliminate pocketing. (Build your own endwall to complete the structure). Simple design for easy installation. Add-on options include: purlin runs and baseboard clamps.

GrowerSelect®

Cold Frame Bows & Structures

14ft Bow

For Center Height: 6ft 5in Without Stakes - Use 24ft Poly
 For Center Height: 8ft 5in with 48in Stakes - Use 28ft Poly
GSA01540 Stocked in Kalamazoo, MI

15ft Bow

For Center Height: 7ft - Use 24ft Poly
GS98-1000A Stocked in Burton, OH

*For a complete Grower Select cold frame quote
 Please contact your BFG Representative*

HIGH TUNNELS

High tunnels are used to extend the growing season by providing protection for early or late season production, or they may be used for year-round growing. High tunnels are becoming increasingly more popular due to the low start-up cost and quick rate of return on investment. They are a quick and inexpensive way to lengthen your growing season, protect your crop from pests and disease, decrease water usage and increase your crop yield.

Options are available with a roll-up side for optimal ventilation and ease of use. Choose from economical frame-only pricing or standard package pricing to finish your structure. Hoop spacing is available in 4ft or 6ft sections depending on the manufacturer and it can be designed to best fit your use and the needs of your location.

ROOF & SIDE VENTS

Ventilation is an essential component for the greenhouse growing environment. Types of ventilation can be forced air or passive ventilation. When designing a new greenhouse, we always take into consideration the passive ventilation incorporating roof & side vents to increase air flow and produce excellent quality crops.

We have the leading-edge technology for gutter vents in the greenhouse industry. We offer raised rack and pinion systems to ensure plenty of room for heat retention systems as well as hinged shaft hangers for easy maintenance in your gutter connect or ground to ground greenhouse.

If your greenhouse does not offer satisfactory ventilation, our team can offer retrofitting options to enhance air flow with your existing structures. Our retrofitting packages are easy to install and will provide significant improvements to your existing structure.

BENCHING

Grower Select® works with some of the largest and most well-known retailers to provide them with benching that is efficient, flexible and presentable. You can no longer afford to use cement blocks and 2ft x 4ft's to produce a quality product and image. We've produced double deck benching, modular benching and benching with re-supply racks underneath. Our retail benching features complete coverage of the sharp expanded metal ends, corner protectors and plastic caps on all legs and tube ends.

Our production benches feature a 20lb/sqft load capacity and have 3/4in pre-galvanized expanded metal tops. Our special aluminum side rails completely cover all of the sharp expanded metal edges, no more torn pants with our corner protectors! We produce thousands of square feet of rolling benches every year. Our benches can be rolling or stationary, freestanding or cemented. We can usually customize to fit your needs at a very economical price.

Seasonal Retail Greenhouses

Commercial Greenhouses

The Garden Mart

Designed to be a modular, low-cost, sales building for added spring plant sales. Our most popular selling model has been engineered for superior strength, easy future expansion and simplified setup. It offers protection for your plants and shopping comfort for your customers.

- Width: 21ft
- Length: 24ft-96ft (in 6ft increments)
- Sidewall height: 6ft
- Height to apex: 11ft 4in
- Frame spacing: 6ft
- Door: 6ft wide x 6ft 8in tall

Sun Shadow

The Sun Shadow is designed to be the simple, low-cost shade solution for your seasonal garden center. Protect your plants from the sun and provide a cool, comfortable shopping environment for your customers. The easy-to-assemble, modular design features galvanized steel construction and an extended base plate that allows you to use your palletized product for hold-down.

20ft x 20ft
Custom Sizes Available.

Sunstopper

The Sunstopper will protect your valuable product from over exposure and windburn, while reducing water requirements. It features straightforward assembly, options for future expansion and is built tough with 2.5in x 12 gauge, galvanized steel for years of trouble free service. The Sunstopper is also offered in custom configurations to meet your existing layout.

20ft x 20ft	40ft x 40ft	60ft x 60ft	100ft x 100ft

INSTITUTIONAL RESEARCH AND EDUCATIONAL GREENHOUSES

BFG and its partners design and manufacture education, teaching and research greenhouses. We can help you design your research or education research facility no matter the size. We work with schools around the country and know what is important to the end user: quality, safety and long-lasting performance. We have experience in designing and building state-of-the-art research facilities as well as small greenhouses for a high school program or other educational and developmental programs.

SPECIAL PURPOSE GREENHOUSE

DeCloet Greenhouse Mfg Ltd has supplied many growers with special custom designed and manufactured greenhouse structures to be used for reasons other than growing. These special houses can be used for a variety of purposes, such as, mechanical rooms, head houses, shipping/staging areas and loading docks.

Custom Options

- Wide post spacing up to 48ft
- High side wall heights
- Multitude of roof coverings may include shaded polycarbonate or steel roofing with insulation
- Natural ventilation or exhaust fans
- Large overhead doors
- Loading docks
- Warehouse & Storage Spaces

SOUTHWEST AGRI-PLASTICS, INC.

Benching

Southwest Agri-Plastics Inc Dura-Bench Ultra

The Dura-Bench Ultra is our newest greenhouse bench top. The plastic bench top is tougher, smoother, and is a longer lasting growing surface for your plants. With increased airflow, easier installation and a lower cost per square foot, the latest Dura-Bench Ultra will fit your needs and budget. 2ft x 4ft & 3ft x 4ft (8 or 12sq ft., nominal) high impact abrasion resistant polypropylene plastic panels weigh 4.5lbs each for the 2ft wide and 6.6 lbs for the 3ft wide. 1.1in x 2.1in rectangular holes. Panel ends connect with a four tab and receiving hole system. 4ft sides interconnect with easy to install black nylon clips. Pre-molded screw attachment rails and outer screw attachments tabs for easy installation with stainless steel screws. Dura-Bench Ultra panels allow for any combination of bench sizes. Bench panels can be attached parallel or perpendicular to the length of the bench depending on needs and frame design. 12" and 18" panels can easily be created by cutting between double-ribbed center sections on each size panel. Substructure frame cross supports placed on any incremental interval (such as 16in or 24in centers) based on the weight of the plants per square foot.

Dura-Bench Ultra Assembly Clip locked in position (in Clip Receivers)

Tabs/Receiver Holes: End-to-End Assembly

Tek Screw Installed in Screw Attachment Rail (Left: Metal Substructure Stainless Steel Tek Screws. Right: Wood Substructure No. 10 Wood Screws)

Southwest Agri-Plastics Inc Dura-Bench Original

The DURA-BENCH Original Overlap design is 2ft wide by 4ft long panel with connections on all four sides. This design utilizes four interlocking tabs along the 4ft side allowing the parts to be adjoined. The 2ft side uses an overlap connection only requiring one cross support.

Overlap - 24in x 49.5in Top

Features:

- 2ft x 4ft & 3ft x 4ft (8sq ft. & 12sq ft., nominal) high impact abrasion resistant polypropylene plastic panel
- 1.1in x 2.1in rectangular holes
- 2ft & 3ft ends connect with a four tab and receiving hole system
- 4ft sides interconnect with easy to install black nylon clips
- Multiple pre-molded screw attachment rails and outer screw attachment tabs for easy installation with stainless steel screws
- Weight 4.5lbs & 6.6 lbs/panel

Table Layout/Design

- Dura-Bench Ultra panels allow for any combination of bench sizes
- Bench panels can be attached parallel or perpendicular to the length of the bench depending on needs and frame design
- 12in and 18in wide panels can easily be created by cutting between double-ribbed center sections on each size panel
- Substructure frame can be made from metal, wood or pipe
- Substructure frame cross supports placed on any incremental interval (such as 16in or 24in centers) based on the weight of the plants per square foot

Obscura - Product Family for Light Restriction or Total Blackout

Obscura Screens

The double layered Obscura screen has been giving plants a good night's rest for over 20 years. It does this by providing total blackout from daylight – up to 99.9 percent. And in the last ten years, single layer Obscura has been preventing supplemental lighting from escaping greenhouses at night. This lets neighbors get a good night's sleep and complies with industry legislation. In both cases, the unique knitted structure provides good moisture managing properties.

Twice as versatile

The double layer also allows more options as the top and bottom of the screen can have different surfaces. Aluminium on the top, for example, provides the greatest energy saving at night, whereas white provides better cooling in sunny weather. White is also useful as a bottom layer for intensifying light inside the greenhouse, whereas black is better for absorbing and restricting interior light.

Where and when you can expect to find Obscura

For short-day plants, such as chrysanthemum, Obscura is ideal for delivering flowers in bloom – on time – for important market dates. Obscura is also popular where supplemental lighting is needed and night time light emission is a problem. This has now proven to be a good investment, as the intensified lighting increases productivity.

- Total control over day length for most sensitive plants.
- Effective cooling when a reflective upper surface is chosen.
- High energy savings, especially if one layer is aluminium.
- Light Emission control that satisfies neighbors and legislation.
- Increased productivity when used with supplemental lighting.
- More uniformity from supplemental lighting in the growing area.
- Good moisture management.

LUITEN
GREENHOUSE TECH
SHADING SPECIALISTS
We Put Our Energy Into Saving Yours

Shading systems

We specialize in all kind of shading systems. Utilizing our professional, able and experienced staff to completes each project to the highest standard of satisfaction. Each project must be handled with the highest degree of skill and flexibility during production and installation from start to finish.

Greenhouse Design and Construction

BFG Supply can offer the best turnkey solutions and service available in the market.

Coverings

BFG offers a full range of greenhouse coverings to ensure you have the best option to help your business grow.

Heating and Cooling

The right heating and cooling systems are essential for running your greenhouse evenly and efficiently.

Climate Control

Designed to maximize crop yields, help manage energy cost and optimize thermal comfort. Environmental controllers and light and energy curtains.

Ventilation

Air movement is important to keep your plants healthy and thriving. From passive to forced air ventilation solutions, BFG can design the right environment for your crops.

Irrigation

We are constantly developing our product line to bring you the best in the industry. BFG can design irrigation and fertigation systems to meet your needs.

Light Deprivation

Whether retrofitting an existing structure or designing a new light deprivation facility, BFG has the solutions you need to achieve a total blackout.

Lighting

BFG has all the lighting and controls you need for starting seeds, growing indoors, or just supplemental lighting.

Indoor Grow Rooms

From HVAC to benching, irrigation to control systems, BFG's technical team can assist with your buildout or retrofit of all indoor grow rooms.

ONE STOP

We have you covered.

Talk to one of our experts about your next CEA/Indoor Growing project!
