CELEBRATING OUR 95<sup>TH</sup> YEAR | FAMILY OWNED SINCE 1924

**GENUINE  
TOP QUALITY PLASTICS**

**AMERICAN MADE BY AMERICAN WORKERS**

# Insist on Warp's Genuine Top Quality American Made Products

A NAME YOU CAN TRUST.

As we celebrate our 95<sup>th</sup> year in business, we take great pride in our heritage of producing Genuine Top Quality American Made Products with the same consistently high quality and business standards as when they were first developed. After three generations of ownership and operation, we still maintain our superior manufacturing standards to equal or exceed those required by industry or government regulations.

We wish to continue to build a lasting trust with you and your customers. This can only be accomplished with an ethical commitment to manufacturing Genuine Top Quality Plastics that will exceed your expectations and never disappoint your customer. This relationship can only flourish by providing you with Genuine Top Quality products.

I hope that you will take a few moments to look through our new **Warp's Full Line Catalog**. Basically, we have five distinct product lines listed in this catalog:

**Window Materials**—In the early 1920's we made the **FIRST** plastic storm window material. Shortly thereafter, we made the **FIRST** Storm Window Kit and in 1955 the **FIRST** inside Tape-On Storm Window Kit.

**Acrylic Safety Glazing**—Flex-O-Glaze was the **FIRST** Acrylic Safety Glazing certified by the Safety Glazing Certification Council (SGCC).

**Plastic Sheeting**—Carry-Home Coverall was the **FIRST** Consumer Sheeting on the market. Also, our Construction Sheeting has been made longer than any of our competitors.

**Lawn & Garden Products**—We made the **FIRST** plastic Garden Mulch, the **FIRST** plastic Lawn Edging and the **FIRST** Rose Collar.

**Housewares**—Plast-O-Mat Ribbed Shelf Liner provides an attractive, easy glide surface. Jiffy-Cover Drop Cloths are made under our roof, no imports, and open easily. Our Flex-O-Bag Trash Bags have extra-long twist ties and a Hold-Tite rubber band. And our Banana Bags were the **FIRST** oversized storage bags on the market.

Most importantly, this catalog comes with our continuing commitment to offer you innovative, top quality products, reasonable prices, prompt shipments, and outstanding customer service. Please give us a call if we can help in placing your order.

Harold G. Warp  
President

## WARP BROS... Celebrating Our 95<sup>th</sup> Year!

Since 1924, Warp's has depended upon **Innovative** and **Top Quality** products for success.

When 20 year old Harold Warp chugged his Model T into Chicago from the Nebraska farmlands in 1924 with a patent for Flex-O-Glass and \$800 in his pocket, his hope for the future lay in a special window material he had developed for his family's chicken coops, a desire for success, and a willingness to work hard. A storefront factory/living quarters on unpaved Cicero Avenue provided the start of Flex-O-Glass and Warp Bros. Today the firm has grown to fill three large plants and place the company among the leaders in the plastics industry.

Just as Harold Warp's first Flex-O-Glass window material provided a marked improvement over ordinary glass in 1924, Warp Bros. has continued to introduce new products and set standards through the years.

Warp Bros. is still owned and run by the Warp family, adhering to the philosophies on which the firm was founded... Top Quality full weight products, national consumer promotion, and hard work.

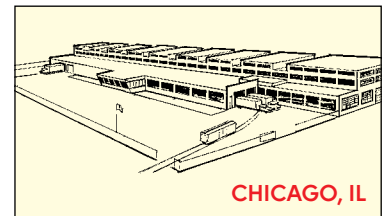

All Warp's products are proudly made in the U.S.A.

Chicago bound Harold Warp in 1924.

John and Harold Warp at first factory in Chicago in 1924.

# Warp's **Genuine** Top Quality Plastics are **Full Honest Weight.**

That's important for you. **Here's why...**

You want to get what you pay for. Not just because you don't want to be taken advantage of, but also because you need plastic sheeting that truly meets the standards and strengths required of it.

**Most building codes specify a minimum thickness for polyethylene moisture barrier used in construction, requiring nothing less than 6 mil for under-concrete applications<sup>‡</sup>.** You need to know that the film you're putting down will meet the requirements of the inspectors. When you use Warp's plastic sheeting, you can have that confidence.

Similarly, State Weights & Measures Inspectors have been coming down hard on underweight or mislabeled plastic film. Don't risk having your inventory hit with a "stop sale" order. Again, when you stock any of Warp's plastic sheeting you can have confidence that you are selling Honest Weight and properly labeled products.

Some plastic manufacturers have responded to this new enforcement with multiple product lines... full legal weight products for areas with enforcement reputations, and short weight products where they think they can get away with it. They try to justify this by using terms like "industry standard," "construction grade" and other euphemisms for light weight poly. One state's Director of Weights and Measures cleared this up neatly when he said, "...Industry standard... or similar terms are meaningless descriptions used to misrepresent short weight film. The only lawful and acceptable method of sale for polyethylene... is full weight."

All of Warp's polyethylene sheeting made since we started making poly in 1954 has been full weight. The Warp's name on any product is your assurance that you are purchasing full weight polyethylene sheeting.

Since 1953, the Harold Warp Pioneer Village at Minden, Nebraska has attracted millions of visitors who have enjoyed seeing HOW AMERICA GREW. Any Warp Bros. dealer who wishes a free pass for himself and his immediate family can get one by writing Harold G. Warp, 4647 W. Augusta Blvd., Chicago, IL 60651. Requests must be made on the dealer's letterhead giving the dealer's name, and also the name of spouse and number of children, if any. Visit us at [www.pioneervillage.org](http://www.pioneervillage.org).

For many years, Warp's dealers and buyers have received Warp's Yuletide Greetings during the holiday season. Each year this unique little booklet is sent from our family to yours as a special thanks for your loyal support in buying Warp's Top Quality products. (Back issues are available from Pioneer Village at 1-800-445-4447.)

# CARRY-HOME® COVERALL®

THE ORIGINAL  
CONSUMER SHEETING

There are two ways of displaying and selling Warp's Carry-Home® Coverall® consumer plastic sheeting products. One way is with Warp's colorful merchandisers that display Warp's most popular 4 mil Carry-Home® Coverall® product assortments. The exclusive CHA3 retail wire rack and 12-4CH10 do not take up a lot of floor space and the colorful graphics illustrate the many practical uses for Coverall®. The second way is on your retail shelf displayed either horizontally or vertically with the versatile shelf pack packaging. Warp's shelf packs are available in 3 mil, 4 mil or 6 mil in clear and sun-resistant black.

Warp's Coverall is the Original Top Quality plastic sheeting, sold through dealers since 1954. Warp's is the originator of the handy 10' x 25' Carry-Home consumer roll. Millions of rolls have been used by do-it-yourselfers and contractors for projects large and small. Tall roll displays well, has fewer folds for easier use.

Specify "Warp's Coverall," the Original Top Quality, Full Weight consumer plastic sheeting!

## Warp's Genuine Top Quality Plastic Sheeting is Always Guaranteed Full Weight and Full Strength!

AVAILABLE IN CLEAR OR SUN-RESISTANT BLACK IN THESE MIL GAUGES:

**Standard Weight: 2 mil**

Perfect for light covering jobs, drop cloths, furniture covers, masking.

**General Duty: 3 mil and 3.5 mil**

Improved linear tough plastic sheeting designed for general duty service at an extremely attractive price point.

**Heavy Duty: 4 mil**

The most popular Carry-Home thickness. Tough, for tear resistance and long life. Many different sizes are available.

**Extra Heavy Duty: 6 mil**

Super tough, resists abrasion. Use as vapor barrier under concrete, as a tarp or material cover outdoors, other tough applications.

**Sun-Resistant Black**

In outdoor applications, Warp's Sun-Resistant Black Carry-Home Coverall will provide longer service than clear.

# Over 65 Years Making Warp's Genuine Coverall®

The *Original* Plastic Sheeting Since 1954

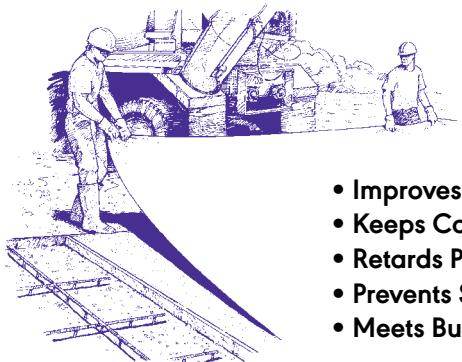

- Warp's Coverall® is the Original Top Quality Plastic Sheeting sold through dealers since 1954.
  - Warp's has made construction and consumer sheeting longer than anyone.
  - Warp's is the originator of the handy 10' x 25' Carry-Home® consumer roll.
  - Super Tough, Super Clear, Fully Waterproof.
  - Warp's Coverall® is, has been, and always will be Full Honest Weight.
- Increase your profit potential with the only permanent wire rack available for consumer rolls.
  - Available in 2, 3, 3.5, 4, and 6 mil thickness.
  - Available in clear and in sun-resistant black.
  - New Shelf Pack Products.
  - Graphics show uses and promote sales.
  - Made in U.S.A.

Display Warp Products on your top shelf. Watch your bottom line grow.

## MAKE YOUR CONCRETE STRONGER WITH WARP'S GENUINE COVERALL®

- Improves Concrete Strength
- Keeps Concrete Moist for Proper Curing
- Retards Premature Drying
- Prevents Shrinkage Cracks
- Meets Building Codes

| Curing Method                     | % Stronger   |
|-----------------------------------|--------------|
| Uncovered Air Dried               | 0%           |
| Covered with Coverall®<br>7 DAYS  | 26% Stronger |
| Covered with Coverall®<br>28 DAYS | 47% Stronger |

Ref.: Design and Control of Concrete Mixtures, Chapter 12, Portland Cement Assoc.

### Concrete Curing Facts:

- Curing concrete covered with Warp's Genuine Coverall makes stronger concrete.
- Concrete does not harden by drying. In fact, concrete needs moisture to cure.
- The longer curing concrete remains moist, the stronger it becomes.
- Rapid moisture loss from new concrete can cause surface cracks.
- Concrete poured on top of Warp's Coverall makes stronger concrete.
- Moist curing is required by Building Codes: IBC 1905.11.1 (03), BOCA 1908.8 (99), and UBC 1905.11.1 (94).
- Polyethylene is required for dampproofing under basement floors and walls per Building Codes: IBC 1807.2.1 (03), BOCA 1813.3.1 (99), and UBC 1827.3 (94).

### WARP'S 4 MIL WHITE HIGHWAY FILM – POLY-COVER®

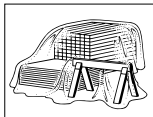

Warp's Poly-Cover® White Highway Film keeps concrete moist and cool for proper curing in hot weather, and meets ASTM C-171 and AASHTO M-171 specifications. All Warp's plastic sheeting retards moisture evaporation for proper ailing.

## The Original

### Full Weight Poly Sheeting Since 1954

TOUGH PLASTIC FOR TOUGH  
JOBS IN CONSTRUCTION,  
LANDSCAPING & AGRICULTURE

**Full honest weight:  
Warp's only standard.**

Meets building code specs. Most building code specs require 4 and 6 mil thick sheeting in building construction, not 3 or 4.5 mil!\* Don't chance having to break up concrete or tear out wallboard because of cheap underweight or mislabeled sheeting that doesn't meet specifications! **Sun-Resistant Black outperforms clear in outdoor applications.**

All Warp's POLY-COVER plastic is guaranteed to be full weight as marked on each roll, and to comply with ASTM D-4397. Specifications for Polyethylene Sheeting, NBS PS17-69, and National Bureau of Standards Handbooks 130 and 133.

## The Original **COVERALL®** Polyethylene Silage Covers & Plastic Tarps

The Original Silo Cap Cover is made of heavy-duty Coverall®, the best polyethylene for agricultural use. Save tons of silage by stopping spoilage. Full weight black, sun-resistant plastic covers are available in 3 mil plastic tarps and 4 mil Round Cut, sealing tight to produce top quality silage. Not affected by moisture or fumes. Economical. Each easy-to-handle, reusable cover is packaged in a colorful bag with full instructions included.

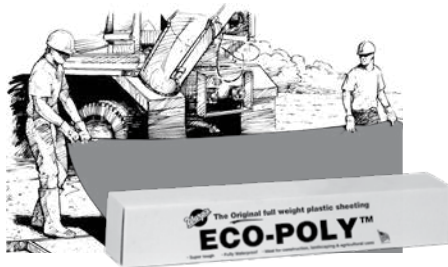

### Warp's Bale Covers

Linear-tough, sun-resistant black protects Round Bales from sun, rain, snow and spoilage. For hay bales 6 feet in diameter and 6 feet long.

### Warp's Hydro-Film®

Specially formulated for hydroponic greenhouse systems. Full weight. Black UV sun-resistant.

### Warp's Eco-Poly

Ecologically sound, economically smart! Same quality and performance as clear Poly-Cover®. Full weight, full measure. Random colors. Designed for use as a moisture barrier sheeting that is installed under concrete where color or clarity is not important.

**Professional Painter's Plastic**  
High density poly sheeting. Easy to open. Easy to tape. Dispenser carton.

The Original

**Warp's BANANA BAGS®**

Oversized storage bags seal up those big objects you used to cover with several smaller bags or try to tie a tarp cover. With BANANA BAGS, you put that bulky object in the bag, seal it with an extra long twist tie provided and forget it. **It's sealed against moisture, dust, bugs and spiders.**

Tough 2 mil plastic is see-through to show contents, heavy weight to resist tears and punctures. Sizes up to 5' x 9' to cover mattresses, sofas, or your garden tractor!

The Warp's BANANA BAG is one of those product ideas that creates new uses—and new customers—every time another person sees it. Stock and display them prominently in your bag, seasonal, and housewares department.

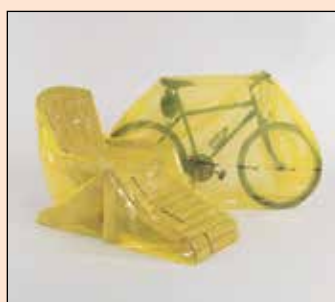

**Oversized Storage Bags** are a natural for your store... and they **sell themselves.**

**Warp's BANANA BAGS®**

# Jiffy-Cover®

## DROP CLOTHS

American Made by American Workers

Our drop cloths are specially formulated to open and unfold easily, compared to other drop cloths. Jiffy-Cover Drop Cloths help protect against spills, drips, and dust when painting or plastering.

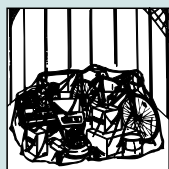

### Easy to Market

Full line for every need. Tough transparent plastic in a variety of sizes and thicknesses. Special formulation provides easy unfolding, unlike cheap imports.

### The All Purpose Cover

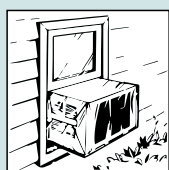

DROP CLOTH

DUST COVER

SHRUBBERY PROTECTION

AIR CONDITIONER COVER

**JCS-912:** Our most popular Heavy Duty drop cloth, 1 mil, 9' x 12'. Resists tears and punctures, stays in place. Easy to open. Also available in 4 Drop Cloth Value Pack JC-9124.

**PC-72:** Good promotion item. Light duty, 4/10 mil, 9' x 12', protects against dust and paint splatters. Easy to open. Made in U.S.A. by Warp. Bros., not a cheap hard to open import.

**U-912-48:** Medium duty 6/10 mil, 9' x 12' plastic gives longer lasting protection. Easy to open. 48 piece carton pack.

**8JC-912:** Medium-Heavy duty 8/10 mil, 9' x 12' plastic in a practical shelf pack design is easy to open.

### KING SIZED – 10' X 20'

**JC-1020:** For bigger jobs... almost twice the coverage. Sturdy 1 mil plastic resists tears and punctures, stays in place. Easy to open. Shelf Pack.

### ULTRA-HEAVYWEIGHTS

**2JC-912:** For bigger jobs. Sturdy 2 mil, 9' x 12' plastic resists tears and punctures, stays in place. Easy to open. Shelf Pack.

**2JC-1020:** Extra heavy duty 2 mil, 10' x 20' is twice the thickness of one of our best selling sizes of drop cloths.

**4JC-912:** Super heavy duty plastic 4 mil, 9' x 12' is tough and strong. Package back highlights use as a tarp. Popular for outdoor use. Easy to open.

### EMBOSSED SHELF-PACKS

Diamond pattern embossing gives heft and flexibility. Drapes easily and grips surfaces. Paint doesn't run off as quickly. Easy to open.

**EC-912:** 1 mil Heavy duty, 9' x 12'.

**MADE IN**

**U.S.A.**

### Shelf-Pack Drop Cloths

- Designed for vertical or horizontal display
- Rolled to obtain maximum facings
- Colorful graphics show the many uses
- Consumer friendly—easy to open and easy to use

# PLAST-O-MAT® RIBBED FLOOR RUNNER

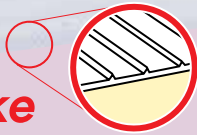

PM-50

Plast-O-Mat sheet is the perfect floor runner. It goes down quickly and lays flat, protecting new or freshly cleaned carpets from mud and tracking. Ribbs hold dirt until it can be wiped up or carried away. Also handy in campers.

As a shelf and drawer liner, Plast-O-Mat is five times as thick as normal shelf liner. It won't tear, yet it is easily cut to size with regular scissors.

It is almost impervious to spills and wipes clean with a damp cloth. The ribs of Plast-O-Mat allow air to circulate under dishes and glasses. Use 30" wide Plast-O-Mat shown on this page to line shelves and drawers. The specially packaged 12" and 24" shelf liner comes in designer colors listed on next page.

**The ribs make the difference.**

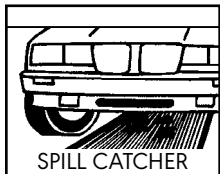

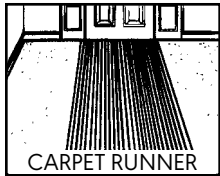

PM-25P

## TRADITIONAL BULK ROLLS WHITE OR CLEAR

Heavy weight, 30" wide floor runner, ready to sell by the foot in your service center, or by the roll to commercial accounts or homeowners. Opaque white or clear. Perfect for shelf or drawer lining. Each roll comes in a colorful corrugated carton.

## 25 FOOT PRE-PACKAGED ROLLS – IN 6-PACK DISPLAY CARTON

Colorful floor display carton shows applications and invites customers to pick up these new 25 foot rolls of 30 inches wide clear Plast-O-Mat Ribbed Plastic Floor Runner.

**AMERICAN MADE BY AMERICAN WORKERS**

# The Original PLAST-O-MAT® Ribbed Shelf Liner

American Made by American Workers

**High gloss finish** makes your shelves sparkle. Ribbed Shelf Liner **wipes clean easily** and is **durable**—about 5 times thicker than ordinary liner.

**Deep ribs allow air to flow** under glasses—clears out moisture and stale air. Exclusive ribs provide extra cushioning to protect dishes. **Sanitary.**

**Easy glide surface won't tear.** Heavy pots, pans and canned goods that would gouge and rip ordinary shelf liners slide easily across the unique ribbed surface. Cuts easily with regular scissors and lays flat.

**Protects fine wood finishes** and has **no messy adhesives.**

Waterproof Ribbed Shelf Liner **resists stains** and wipes clean with a damp cloth.

**Popular decorator colors plus clear.** 12 and 24 inch widths. 10 foot, 20 foot and 25 foot rolls.

Use Plast-O-Mat® Ribbed Shelf Liner for **low friction** surfaces under dishes, canned goods and pots and pans.

PM210-C

PM220-C

### DUST & DIRT BARRIER

Small items won't slip through.

PM120-C

### EASY-GLIDE SURFACE

Durable—won't tear, scuff or crack. Cuts easily.

### MADE IN

### U.S.A.

### RIBBED FOR VENTILATION

Exclusive cohering bottom surface holds liner firmly in position without adhesives.

*The Difference is the Ribs*

For wherever shelves need protection from high usage, wear and tear, moisture... even messy spills.

**BPA-FREE**

# FLEX-O-BAG® Trash Can Liners

Plastic Bags are **not all the same**. Here's **why** Warp's FLEX-O-BAGS will serve you **better...**

Warp's bags are 25 to 50% heavier gauge than other bags on the market. Compare the "MIL" thickness. Thin bags may do for light loads or limited protection, but if you're hauling heavy trash, Warp's heavy duty FLEX-O-BAGS will hold up tough. We formulate our resins to service rough use and heavy clean-up projects. Our bags are engineered to do the job right. There are no side seams to split, and no gussets to weaken the bottom. Constant quality control monitors the strength of Warp's bags to assure that they will serve you well when cheaper bags have burst or shredded.

NOTE: Ask about our bags made with Post Consumer Recycled plastics where states have mandated these regulations.

# Warp's Plastic Garden Mulch and Weedshield

Economical sun-resistant black plastic mulches specially formulated to block light and stop weeds. In spring, sun-resistant black mulch absorbs the sun's warmth and transfers it to the earth. It holds moisture through the heat of the summer. Choose low cost, longer lasting Warp's plastic mulch for your landscaping, flower or food gardening projects.

## STOPS WEEDS...

UNDER DECORATIVE STONE

UNDER DECKS

UNDER BRICK OR PATIO BLOCK

AROUND PLANTS AND KEEPS VEGETABLES CLEAN

## No Hoe® Garden Mulch

Our popular sun-resistant black plastic mulches are available in an economical 1.2 mil, 3' x 50' size, and a 1.5 mil 3' x 50' and 3' x 100' sizes. Perfect for small gardens!

## Easy-Grow™ BONSAI Rock Garden Weedshield

Heavy 3 mil sun-resistant black plastic holds rocks and chips without ripping. Available in a roll folded to 18" for counter-top display, or unfolded 36" floor display.

## Bark Base Mulch

Very heavy 6 mil plastic mulch is redwood color to match chips. Controls weeds, keeps chips clean. Unfolded 36" roll.

## Warp's Leaf & Lawn Clean-Up Bags

Same heavy weight and construction as Warp's Industrial Grade Trash Can Liners, but in smaller packages. For heavy outdoor jobs. Top Quality means they won't "zipper" when a stick pokes through, and they'll hold loads that would have cheaper bags begging for mercy. Don't confuse these with lightweight grocery bags. EXTRA LONG TWIST TIES. Also available in "Clear Bags."

American Made by American Workers

# The Choice of Professionals

Permanent plastic lawn edging installs easily and won't harm feet or lawn mowers. Separates grass from tended areas for a neater and more easily maintained appearance.

### Easy-Edge® Landscape Border

The choice of professionals. Long lasting polyethylene plastic is heavy and semi-rigid to lay straight as an arrow along drives and walks or curve gracefully around trees and decorative areas. Rounded top edge for deluxe appearance, splices without connectors. 5" height and frost flange hold border at desired depth to prevent heaving. 20' and 100' coils. Colorful display cartons sell product. Color: Black.

### Easy-Edge® Plastic Lawn Edging

Flexible, corrugated, with ground gripper ribs. Lasts for years, withstands temperatures to -30°F. Easiest handling of all our edgings. Green color, two heights, two lengths.

### Warp's Lawn Border

Solid rolled edge creates a neat bed to separate grass from tended areas. Easy to install. Flexible, frost-proof design.

### Warp's Rose Collars

Three white corrugated plastic collars per package. Snap around rosebush base. 9" high, 12" diameter.

Fill collar with mulch to protect delicate hybrid rose graft from winter freezing. White color and open top reflect sun and stop heat build-up to prevent premature sprouting in spring. Easy to remove and store flat so that they last for years. 3 collars in a colorful display package.

**Warp's Original Flex-O-Pane®**

Superior clarity in a semi-rigid window material. UV stabilized. 10 mil has the same benefits as the 5 mil, with the added strength of twice the thickness for longer service. Recommended for temperatures above 0°F. **Bulk Rolls.**

**Warp's Screen-Glass®**

**Top quality reinforced.** 14 mesh aluminum screen base coated with clear plastic. UV stabilized.

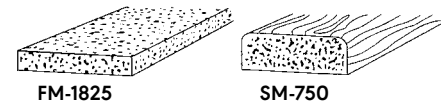

**Fiber Moldings FM-1825**

Water-resistant 1/2" x 36" strips for mounting plastic window material with tacks or staples. 18 strips (54 feet total) in colorful pegable display package.

**Wood Moldings SM-750**

Selected pine. Flat with rounded edges. 1/4" x 5/8". Standard screen sizes.

**Shrink-It® Window Sealer Kits**

Finest optical clarity and fastest shrinking of any shrink window kit on the market! Less costly than others, too. Insulates and seals out drafts. Tough film resists tearing.

Kits include Shrink-It film plus new improved double-faced tape to seal each window. 25' multi-window pack insulates eight 3' x 5' windows & does not include tape.

**Poly-Pane® and Easy-On® Window Kits®**

**The Original Storm Window Kits**  
Warp Bros. invented the first glass substitute storm window and the first storm window kit. Poly-Pane® and Easy-On® Storm Window Kits have excellent clarity, insulate, and seal out drafts. All Kits include 18' of water-resistant molding and 35 nails per window or door.

# The Original FLEX-O-GLAZE™

## ACRYLIC SAFETY GLAZING

MADE IN THE U.S.A. SINCE 1971

**Flex-O-Glaze** is the **TOP QUALITY** Choice for Acrylic Safety Glazing

- Pure Virgin Acrylic
- Won't Yellow
- Won't become brittle

Warp's Flex-O-Glaze acrylic safety glazing **withstands blows** that would shatter normal glass. Flex-O-Glaze is pure virgin acrylic which will not yellow or embrittle like cheaper plastic glazing which has scrap or polystyrene added.

### Why Flex-O-Glaze™?

**FLEX-O-GLAZE** was the first acrylic safety glazing to be certified by the Safety Glazing Certification Council. FLEX-O-GLAZE is easy to cut to size and safe to work with. Withstands blows that would shatter normal glass. FLEX-O-GLAZE is pure virgin acrylic which will not yellow or embrittle like cheaper plastic glazing which may have scrap or polystyrene added. It has an easy to remove yellow masking that can be marked with a ballpoint pen, providing easy-to-see lines for cutting. It has a thermal transmittance 1/5 that of glass resulting in less heat loss through the window. It is less than half the weight of glass. It is seven times tougher than glass. It does not break with razor sharp edges. It has instructions included with each sheet. FLEX-O-GLAZE is made by the oldest plastic window material manufacturer in the U.S. — Warp Bros. — since 1924.

### First to be certified

Warp's Flex-O-Glaze meets ANSI Z97.1 impact standards and was the first acrylic safety glazing to be certified to this standard. All Flex-O-Glaze products are produced to ±1/8" on size and ±10% on thickness. Flex-O-Glaze also complies with ASTM D-4802.

### Thickness

Warp's FLEX-O-GLAZE is made in the following 5 thicknesses. Use this illustration as a guide for replacing your broken glass.

-  .250" Extra heavy weight for security glazing, larger window openings and for commercial use.
-  .125" Comparable to Double Strength glass. Recommended where maximum break strength is required and for openings over 6 square feet.
-  .100" 100 mil for full strength. Ten times more break resistant than ordinary glass.
-  SS Single Strength meets ASTM C-1036-01 and BOCA Standards (.085" to .101"), and can be used in most replacement applications.
-  .080" Comparable to glass used in low cost storm doors and for lighter service.
