GARDEN TABLES & PLANTERS

Master Gardner Fabric keeps weeds out while allowing air & water in.

No need for harsh chemicals that harm the soil, pets or the environment. Our fabric allows proper air exchange so oxygen can enter the soil, which is necessary for the absorption of water and nutrients. It helps maintain soil moisture, which
 promotes a deeper root system.
*For best results, cover with 3"- 4" of material.*

YardTek PRO
YardTek Pro is a spunbond non-woven fabric. YardTek is made from continuous monofilaments of medium thickness and the fibers are bound at every cross-over-point.

YardTek WOVEN
YardTek Woven Fabric is made from continuous sheets of polypropylene, slit into yarns and woven. These fabrics have a high percentage of open area which allows water a direct path through the fabric.
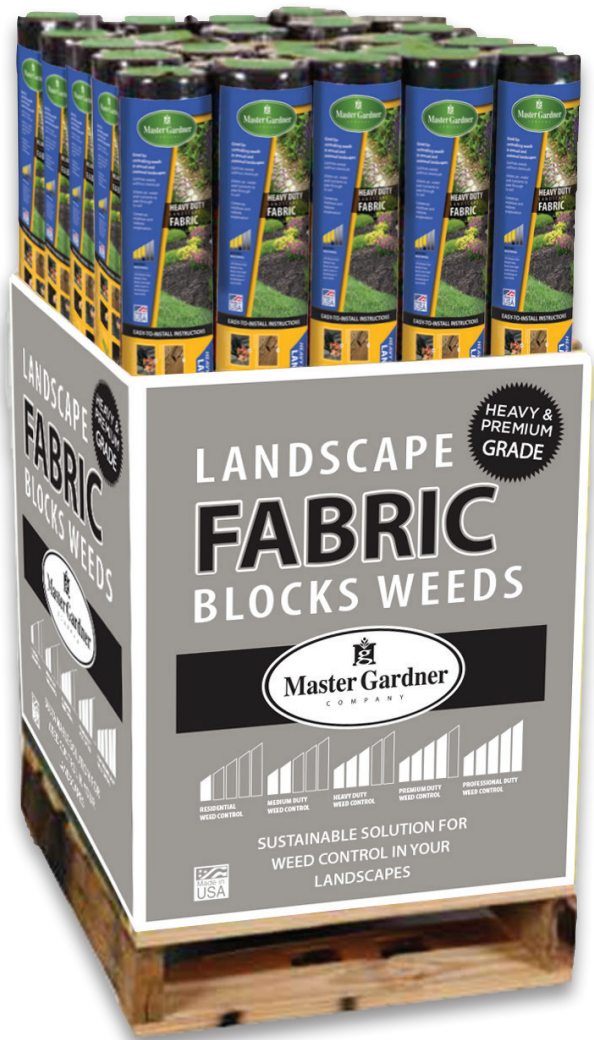

YardTek WOVEN - PLUS
YarkTek Woven Plus is similar to our woven fabric except a top layer of fibers are needled into the fabric to increase durability and blocks more light from passing through the fabric.

YardTek UNDERLINER
YardTek Underliner is made from mechanically interlocking fibers. This produces a three dimensional fabric with a higher strength to elongation ratio.
