## About Tenax USA

Established in Ohio in 1984 as a distribution center under the name of ATP (American Tenax Products), Tenax relocated to Jessup, Maryland in 1987 to open our first U.S. manufacturing facility. In 1993, the company expanded our operation and moved to our current location in East Baltimore. Tenax gained worldwide fame with our first US-produced product—orange safety fence for building and construction sites—which quickly spawned imitators all over the world. Currently Tenax Corporation serves the USA, Canada, Mexico, and Central and South America with specialty products for netting, fencing, pipe protection, construction, agricultural, gardening and DIY applications. Throughout the years of growth and expansion, Tenax Corporation has maintained our promise to be a pioneer in the “Made in USA” movement.

## Tenax Group

Established in Italy in 1960, Tenax was one of the first companies to develop the unique process of extruding and forming thermoplastic polymers. Ever since, Tenax has been a rising star through sustained growth and advances in engineering efficiency. Tenax’s mastery of manufacturing capabilities now places the Tenax Group and its subsidiaries as a true international leader with production facilities, technical services, distribution centers and sales departments in more than 50 countries across five continents.

## Commitment to Quality

The Tenax Group’s commitment to quality shows in our superior product line, and it all starts with our selection of raw materials. Tenax only uses 100% specially-selected raw materials. This means our resins are clean and unaltered. This ensures that our products provide the longevity, appearance and versatility our customers have come to expect from the Tenax brand. Our products are also treated for UV resistance, allowing for longer-term use and performance in the field. Our discriminating process for selecting raw materials places the Tenax Group in the forefront of quality in the industry.

## Our Values

Tenax is committed to building a lasting company that provides products and services of the highest quality. We offer our employees a safe and rewarding work environment and are striving to be a good corporate citizen in the communities in which we operate. Tenax focuses on strategic growth through the responsible use and management of our resources.

# LAWN & GARDEN

Tenax's expertise in the garden and outdoors has been instrumental in achieving a deep and specialized range of meshes and plastic products that are functional, easy to use, and durable. Biorientation technology, stretching of the mesh in both the longitudinal and transversal directions to provide extra strength and rigidity, ensures a strong and long-lasting product.

- PROTECTS PONDS FROM LEAVES, DEBRIS, BIRDS AND OTHER PREDATORS
- PROTECTS BERRIES, TREES & GARDENS FROM HUNGRY BIRDS AND DEER
- PROTECTS BUILDING INTERIORS AND EXTERIORS FROM NESTING BIRDS

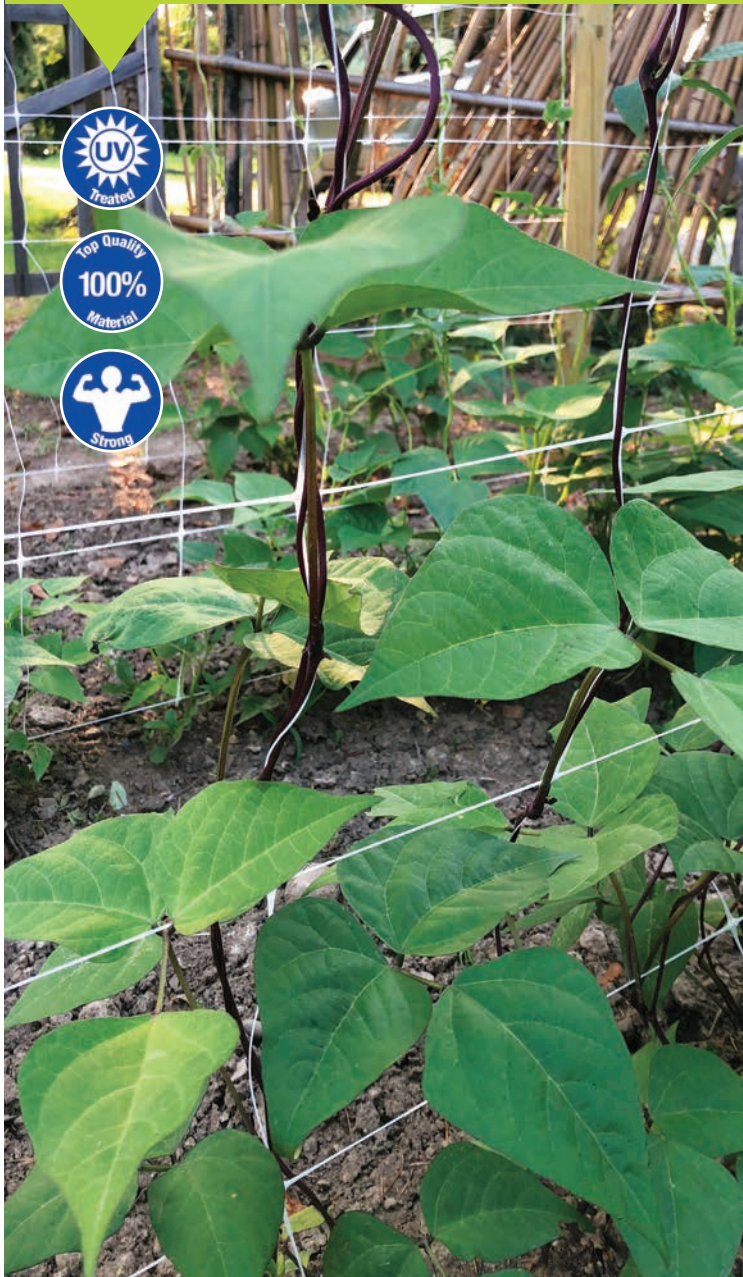

## TRELLIS NET

Lightweight, weather resistant, easy to install, and UV stabilized, the famous Tenax Hortonova Trellis net offers an excellent cost-benefit ratio for climbing plants and heavy crops.

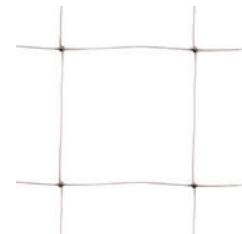

The Hortonova Trellis net is lightweight and able to stretch between and over gardens, flower beds, or hydroponic systems, but strong enough to help grow lush vegetables, rich foliage, and beautiful flowering plants. Its white color contrasts with your plants for easier and safer harvesting, trimming and stem cutting.

### Hortonova Trellis Net SM

A lighter version of the Hortonova Trellis Net for lighter, smaller applications.

#### UPRIGHT APPLICATION

(1) Set support posts at a distance of 5 feet apart. (2) Stretch a cable from one post to the other. (3) Secure the Tenax Hortonova Trellis Net to the initial post with nylon string. (4) Use sod staples every 6 inches for contact with the ground.

#### LAYERING APPLICATION OR HORIZONTAL APPLICATION

(1) Set support posts at corners of the planting area. (2) Secure your Tenax Hortonova Trellis Net on posts approximately 6 inches from the ground so plants can grow up through the mesh. Multiple layers can be used in the same fashion to support larger plants. (3) Secure your Tenax Hortonova Trellis Net to each corner post with self locking ties or tie wire.

# GARDENING

## TREE & TRUNK GUARD

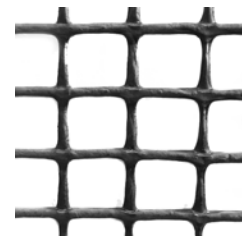

Wildlife damage to plants and crops can be devastating. Tree & Trunk Guard creates a safe environment by preventing wildlife from reaching plants and crops. It acts as a shelter for woody plants and fruit trees, protecting them from deer rubbing and other damages caused by nature.

## Tree & Trunk Guard

“Tree trunk” meshes are cut longitudinally so they can be installed easily also on already developed plants using a simple tie. Strong and heavy-duty, they are recommended for fruit trees and are perfect for protecting plants from large ungulates.

	Roll		Sold as
2A200057	2-FT	<input type="checkbox"/>	5/C
2A200058	3-FT	<input type="checkbox"/>	5/C
2A200059	4-FT	<input type="checkbox"/>	5/C

# GARDENING

## EARLY GROWTH

Early plant growth needs protection from sudden weather changes if they're going to survive the spring. Tenax offers a range of plastic films and fabrics to protect your crops and promote growth by creating a microclimate that keeps crops growing.

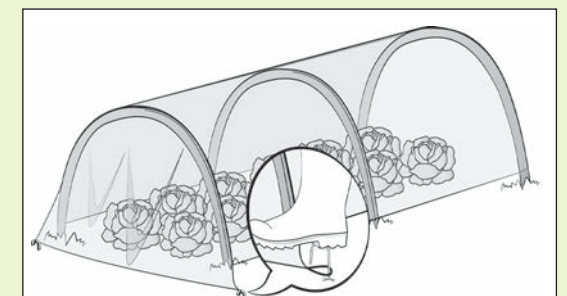

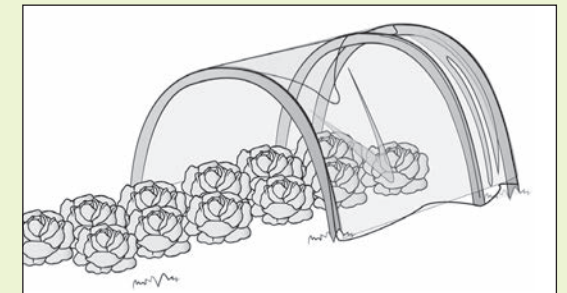

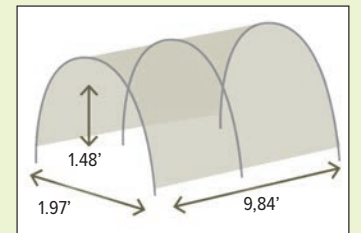

## Early Tunnel Pop-up

Ready for use, this transparent polyethylene tunnel is ideal for speeding up the ripening process in young fruits and vegetables, and protecting plants from changes in temperature. It has metal support arches to fix it down. Foldable and easy to move, it can be reused over many seasons.

	Bag		Sold as
1A110423US	1.97'x1.48'x9.84'	<input type="checkbox"/>	6/C

READY TO USE  
EXTENSIBLE  
TUNNEL

# GARDENING

## MULCHING

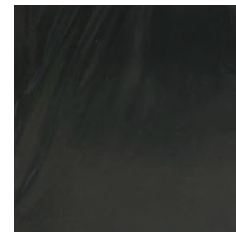

Mulching is an agricultural practice also used on gardens and crops to mechanically prevent weed growth without using chemical herbicides. Tenax offers a range of films, covers and nonwoven fabrics which, when laid around crops, maintain the humidity of the ground but stop light filtering, thereby depriving the weed seeds of the chance to develop.

### Mulch Film

Waterproof black film in PE that keeps soil warm and humid, eliminates weeds and protects against erosion. Practical and convenient, it provides the best conditions for growing fruits and vegetables, and keeps them out of the soil and clean.

	Bag	Sold as
1A130301US	4.6'x32.8'	10/C

40 μ

### Punched Mulch Film

A permeable black polyethylene sheet, Punched Mulch Film is micro-perforated to allow limited aeration and irrigation of the soil. It prevents weeds from growing and is ideal both for fruits and vegetables.

	Bag	Sold as
72202119US	4.9'x16.4'	10/C

40 μ

### Black & White Film

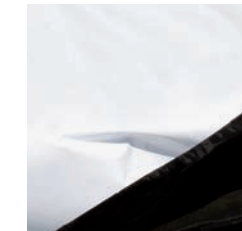

Tenax Black & White Film is a dual-purpose 40-micron, double-face polyethylene film created to prevent weed growth and promote plant growth.

The **black** side of the film sits in contact with the ground and prevents weed growth.

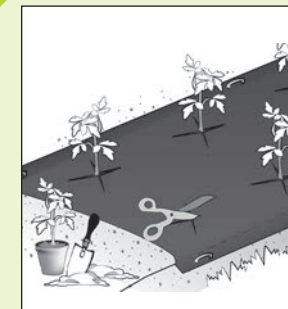

The **white** side of the film attracts sunlight and maintains a better growing temperature for plants and fruit. It also helps keep fruit from contact with the ground, keeping them clean. The white side of the film repels some insects, especially aphids, and reduces the likelihood of mold growth.

Summer salads, cauliflower and broccoli, and small fruits commonly benefit from this type of film.

	Bag	Sold as
1A150331US	4.6'x32.8'	10/C

40 μ

- PREVENTS WEED GROWTH.
- ENHANCES PLANT MATURATION.
- KEEPS THE SOIL FRESH, SAVING WATER.
- DOES NOT BURN YOUNG PLANTS.
- KEEPS APHIDS AND SMALL INSECTS AWAY FROM CROP.

Tenax professional weed fabric is perfect for any landscaping project and durable enough to be walked on, weighting 85 g/m<sup>2</sup>.

	Roll	Sold as	
2A190071	3'x50'	12/C	
2A190072	3'x100'	6/C	

2.5 oz - 85 g/m<sup>2</sup>

# LAWN & LANDSCAPING

## TURF PROTECTION

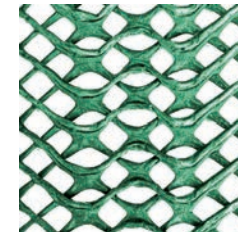

Tenax Turf Protections are very strong netting made for protecting all sorts of turf, from lawns to parking areas. Once installed and the grass grows through, you're left with a natural green environment with a stabilized surface.

## Keep-It-Green

Keep-It-Green, turf retention mat, is a high density foam polyethylene (HDPE) extruded net with a three-dimensional structure composed of a series of overlapped and crossed filaments. The mat absorbs load and distributes it equally to prevent damage to grass. Perfect for temporary events and driveway replacement.

	Roll	Sold as
1A150284	6.7'x50'	EA

## Yard Protection

Tenax Yard Protection is a high density polyethylene mesh designed to provide a fast laying, stable surface that protects your lawn. Once grass growth is established, Tenax Yard Protection will keep grass roots from becoming damaged. Thanks to its unique design the mesh is tough yet flexible enough to make it easy to lay, even across large surfaces.

	Roll	Sold as
64313308YP	3.3'x20'	EA

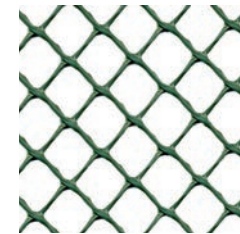

1.4"x1.4"

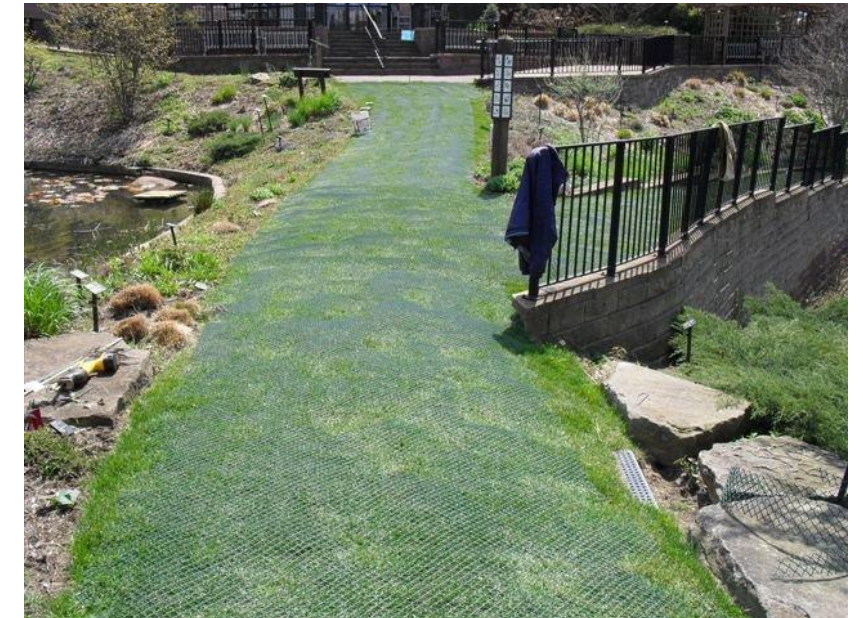

## Turf Reinforcement

Tenax Turf Reinforcement is a strong, high density polyethylene net capable of protecting grass from wheel ruts while ensuring a good grasp for roots. Ideal for car parking during concerts and other events.

	Roll	Sold as
64313308	6.7'x100'	EA

1.4"x1.4"

- FOR USE ON EXISTING LAWNS
- REINFORCES THE TURF
- PREVENTS THE DOG FROM DIGGING HOLES IN THE GARDEN
- FAST LAYING, EVEN ON LARGE SURFACES
- LIGHTWEIGHT AND INEXPENSIVE

# BOUNDARIES & FENCING

## GARDEN FENCE

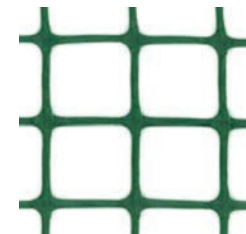

Easy to install garden protection border fence with different mesh and pattern options. UV stabilization guarantees long lasting color.

### Garden Fence

The perfect border fence for your garden or flower beds, or to block off pets from vulnerable areas. Great for providing shape and form to your yard by placing it around your vegetable garden, flower beds, tree seedlings, or pond. Flowering vines and vegetables will climb the sturdy mesh, allowing for a uniform and natural look to any landscape.

	Roll	Sold as
2A140089	2'x25'	12/C
2A140091	3'x25'	12/C
2A140093	4'x50'	6/C

2"x2"

- SMALL GARDEN FENCING
- TRELLIS FOR CLIMBING PLANTS
- BOUNDARY FOR PONDS AND VEGETABLE GARDENS

### CORRECT INSTALLATION OF TENAX PERMANENT FENCING

#### Determine how many poles you need.

Measure and trace the perimeter to fence. To determine how many poles are necessary, consider placing a pole every 6 feet. Include arrows on the corners.

#### Installing the wire.

After positioning the poles, strengthen the fence by pulling the metal, plastic coated wire through the holes of each stake and fastening the corresponding tensioners. Plan on positioning a plastic coated metal wire every 18 inches high. Place the wire tensioners approximately 6 inches from the pole on each wire. Pass some wire through the specific wire tensioner. Use pliers to tighten the wire.

#### Installing the mesh.

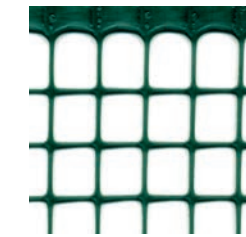

Unroll the mesh along the poles and fasten the mesh to the wires and the relevant poles with the help of the metal, plastic coated wire or the specific plastic ties. Unroll the entire mesh roll and fasten it to the poles before going back to tighten and straighten it.

### Border Fence LM

This larger mesh size is ideal in gardens as additional protection on gates and fences. Selvage finish on both sides.

	Roll	Sold as
72170118US	3.28'x16.4'	6/C

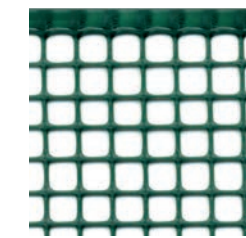

.79"x.79"

### Border Fence SM

The best selling and used mesh to match any fencing or gate. Also perfect on balconies because its finished edges means no sharp sides.

	Roll	Sold as
1A100301US	3.28'x32.8'	6/C

.4"x.4"

# FARM & RANCH

## TRELLIS NET

The Hortonova Trellis Net in the Farm & Ranch line of Tenax products is a heavier mesh than the version of this product in the Lawn & Gardening line. It is built stronger to stand up to the tougher conditions of farming and ranching, without sacrificing flexibility or ease of use.

### Hortonova SM Small Mesh version

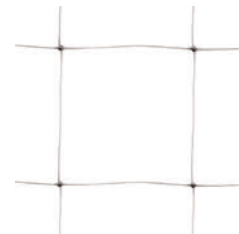

It is the plastic mesh that has revolutionised the cut flower and climbing vegetable cultivation system. Produced from top quality polypropylene and made with the exclusive dual stretching extrusion process that ensures optimum strength and duration. It has replaced metal meshes, iron trellises and perishable materials such as bamboo canes or wood, traditionally used to create support and separation frames. Using Tenax Hortonova for vertical support ensures excellent ventilation, ideal exposure to the sun and better use of space, for both cultivation and harvesting.

- Improves plant exposure to air and sun.
- Resists bacteria, chemical agents and mold.
- Does not rust.

**Hortonova for vertical use:** support to climbing plants such as peas, tomatoes, pumpkins, cucumbers, beans.

**Hortonova for horizontal use:** allows flowers and plants to grow in a proper and well displayed way to maximize productivity.

## Hortonova SM/LM Vertical use

### INSTALLATION

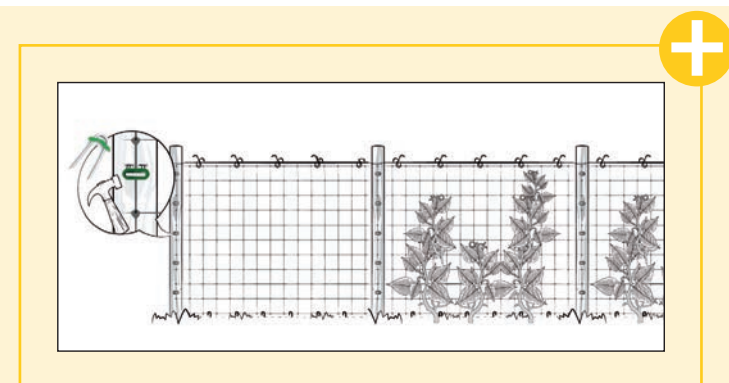

Hang the mesh on poles placed 10-15 ft apart along the row of plants being cultivated. The mesh should be slightly raised off the ground to enable vegetation to develop before it begins climbing the Hortonova mesh. Vertical installation of the mesh is perfect for growing **peas, beans, tomatoes, cucumbers, eggplant, peppers, zucchini, climbing pumpkins and any other climbing vegetable**. The mesh is available in different colors to help identify the plant.

Its application ensures:

- less diseases
- increased growing density
- increased exposure to sunlight to make fruit ripen at the same time
- faster harvest, thanks to space optimisation
- product enhancement, because it makes the vegetables better thanks to the best ripening.

### ADVANTAGES

- It increases exposure to sunlight and photosynthesis;
- It increases air circulation;
- It gives a more abundant harvest;
- The cultivated product does not stay in the ground and is not walked on;
- It reduces plant diseases and reduces irrigation of agrochemical products;
- It improves the quality of the vegetables;
- It facilitates sowing and cutting;
- It is easily installed.

## Hortonova SM/LM Horizontal use

### INSTALLATION

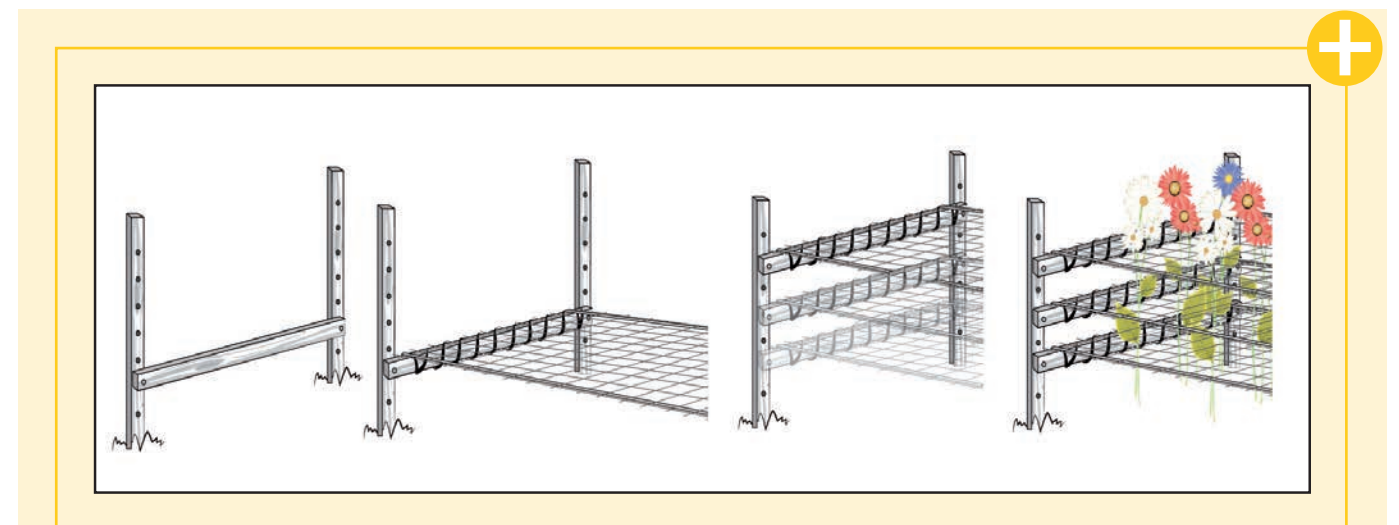

Tenax Hortonova is used by the best growers to cultivate the highest quality flowers. The net is stretched horizontally across the growing area and supported by poles positioned intermittently along the exterior of the plot. As the plants grow, add additional layers of Hortonova Trellis net to create layers of support. Ideal for growing **carnations, chrysanthemums, daisies, gladioli, lilies, orchids, roses, and snapdragons**.

Its application ensures:

- increased production value, since the flowers grow healthier (bacteria does not deposit on the mesh), more regular and straighter.
- considerably less labour compared to using raffia and metal wire.

### ADVANTAGES

- It facilitates cutting and harvest;
- It optimises space;
- It improves plant development and distribution;
- It saves on labour.

# FARM & RANCH

## DEER & ELK FENCE

Tenax Deer Fence is the best product on the market used to control hungry deer and elk. Bioriented and super-resistant, easy to install in different weights and varieties, it is manufactured with Tenax's exclusive round tensile structure.

### Deer Fence Pro

Professional grade control of hungry deer for use in orchards, gardens, farms or anywhere else deer are a problem. It's virtually invisible once installed and naturally blends into the landscape.

## SAFETY FENCE & WARNING BARRIER

Tenax Safety Fence and Warning Barriers are designed for protection around construction sites, manholes or for use as a property delineator. Providing an alternative to traditional metal construction materials, Tenax's plastic construction solutions are easier to handle and highly visible. Perfect for road work, crowd control, identifying obstacles and dangerous areas.

### Sentry Secura

Tenax Sentry fences are safe, durable, and attractive safety fences. Their consistent diamond mesh ensures aesthetic appeal, while the smooth top and bottom borders make the fence less likely to cut and scrape adjacent materials during installation and removal. Tenax Sentry is the most economical of the Sentry product line. Sentry Secura is a premium strength mesh safety fence great for use on construction sites.

### Griffin Plus

Visual barrier for use on construction sites, crowd control, hazardous areas and utility work sites.

	Roll	Sold as
1A170062	4'x50'	EA
1A170061	4'x100'	EA

2.25"x1"

### Caution Fence

Tenax Caution Tape Fence, in hi-vis orange, combines a heavy duty warning barrier, with a caution tape. During the manufacturing process, the caution tape is affixed to a band in the middle of warning barrier resulting in a highly visible safety product that can be used in a variety of applications.

	Roll	Sold as
2A180119	4'x100'	EA

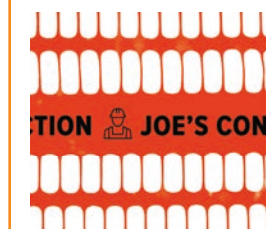

2.25" x 1.25"

### Logo Fence

Tenax has taken the concept of the Caution Tape Fence a step further by offering a customized version of the product called Logo Fence. Instead of the tape reading "Caution", the Logo Fence option can feature a contractor's name, phone number, or website. Logo Fence combines safety with advertising. This option is a great cost saver, eliminating the need for separate signage.

	Roll	Sold as
2A180008	4'x100'	EA

2.25" x 1.25"

# FENCING & CONSTRUCTION

## SNOW FENCE

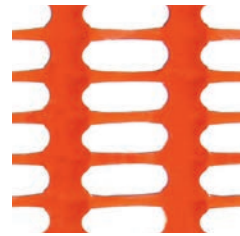

Tenax Snow Fences are a must for winter safety. Safety starts with keeping snow cleared, and that's where Tenax Snow Fences stand out. By cutting wind speed they reduce snow drift and lessen the need for plowing. Work sites and roads stay cleaner and safer.

**Nordic**

Tenax Nordic is the heaviest snow fence Tenax manufactures and is ideal as a warm-weather safety fence or in situations where a single fence is needed for both snow control and safety. It is also efficient as a windbreak or sand barrier.

	Roll	Sold as
90853704	4'x100'	■ EA
90853709	4'x100'	■ EA

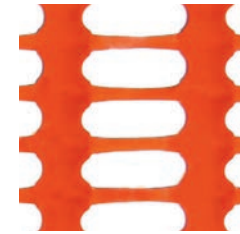

3.5"x.9"

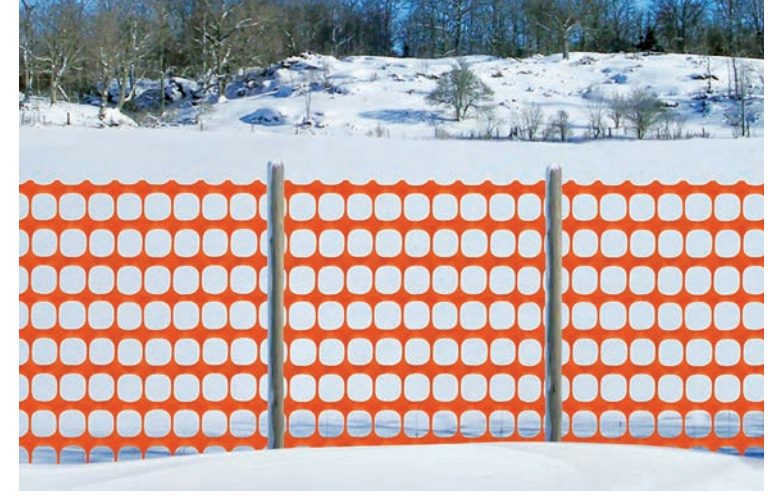

**Safety Snow Fence**

Tenax Safety Snow Fence is a UV stabilized fence with oval mesh openings that is designed to slow wind and create drifts for snow storage so that they will not interfere with roadways, driveways, or runways. Tenax Safety Snow Fence's strong HDPE plastic resists wind damage and remains flexible in freezing temperatures.

	Roll	Sold as

# FENCING & CONSTRUCTION

## SILT FENCE

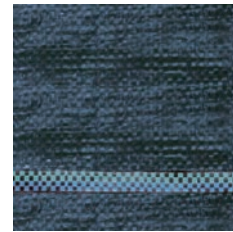

Barriers for sediment control. Erosion control on work sites and in finished projects is more than just important, it is essential. It is often a city, state, and federal requirement.

## Silt Fence

Tenax Silt Fence is the ideal barrier around construction sites or wherever there is bare or disturbed earth. The woven geotextile used on Tenax Silt Fence is designed to filter out sediment from construction site run-off, yet allow clean water to pass through. Tenax Silt Fence is pre-assembled with hardwood stakes securely attached at 10-ft intervals and packaged in 100-ft rolls.
