

***Raised, Elevated, Vertical, Mobile
and Modular Garden Beds***

2024 Spring/Summer

Why NuVue Raised , Elevated and Mobile Garden Beds?

Experience

Global supplier of consumer products, including raised garden beds and elevated planters for over 40 years. Providing quality products to world-class retailers for the Home & Garden, Hardware and Automotive categories.

Innovation and Investment

Industry leading, in-house product engineering

Timeless designs that are “on-trend”

Exclusive assembly systems (**Quick↔Connect™** , *Twist Lock*, SMART Modular Gardens) that make set-up or take-down quick and easy!

Simplicity

Most of our products are “No Tools Required” - Installation made easy! Assemble or disassemble in minutes. Products that look great in any indoor or outdoor area.

Durability

Maintenance free material specifications. Polymers are UV resistant with cold inhibitors. Powder coated steel for durability. Our products will not rust, rot or mold. Easy to clean.

Value

A variety of options with materials, textures, colors, and sizes to fit any space or budget. Higher wall designs are ergonomic and provide more growing options. Attractive, full color packaging that highlight product features to the consumer.

ELEVATED GARDENS

SMART Modular Gardens – Endless Gardening Possibilities!

- Evolutionary in its modular design and function, providing gardeners with a completely integrated folding planter system – including the legs!
- Attractive, contemporary design with deep but narrow horizontal slats, rounded shape, angled walls and a textured matte finish.
- Folding legs seamlessly extend and retract to provide multiple base heights
- Standard dimensions are 27”L x 11”W x 11”D (22” height with legs folded out or 33” with no tools, quick-connect system extension kit)
- Multiple planters and extension kits can be combined to provide an endless array of configurations and heights to fit any space.
- Fully sealed, BPA free polymer specification
- Self-activating capillary watering system

NEW!

27"x11"x11"

27"x11"x22"

27"x11"x33"

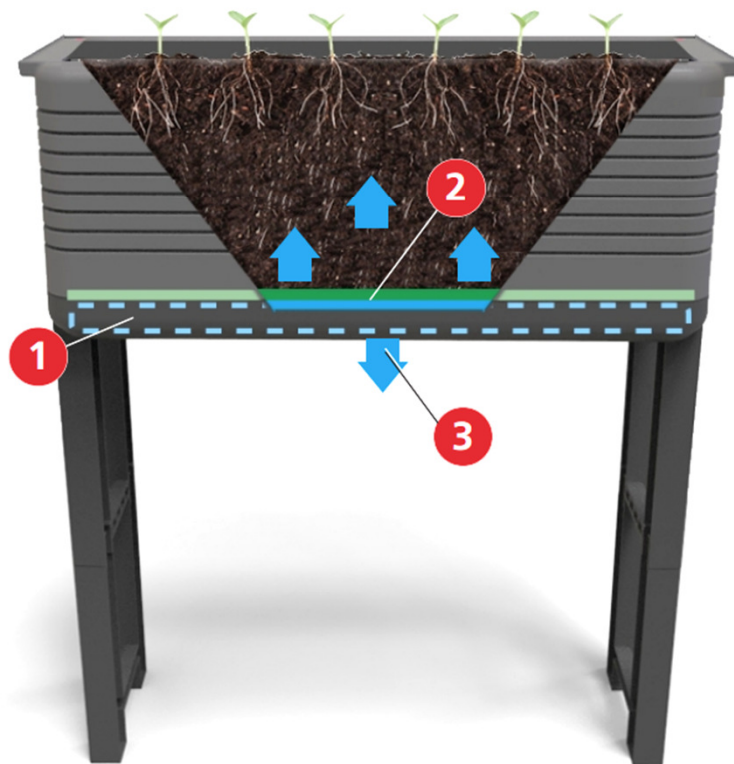

NuVue Item #26030 Series
Item # based on configuration.

- The SMART Modular Garden is a patent pending innovation that provides gardeners with a completely integrated folding planter system, including the legs! No tools are required, making set-up and take-down quick and easy, with a multiplicity of display options
- A sealed, BPA free polymer specification is UV and weather resistant with a Capillary Watering System and built-in drainage option allowing the SMART Modular Garden to be used indoors and outdoors

FIRST EVER – Self-Activating Capillary Watering System!

1. Excess water accumulates at bottom of planter in **storage tanks** located on sides, with total capacity of just over .5 gal (2.25 L)
2. **Capillary mat** (covering entire bottom of planter) absorbs excess water, soil absorbs water via mat to feed plant roots
3. If storage tanks fill to over capacity (due to unforeseen rain or excessive watering), the overflow exits through **drain hole** in bottom of planter to prevent root rot

- NuVue's SMART Modular Garden has a built-in capillary watering system. This innovative feature utilizes storage tanks that are incorporated into the planter's base, combined with a unique heavy-duty capillary mat to provide water directly to the plants root system

- The capillary mat is constructed of high-quality needle punched polypropylene material that is very durable and will not mold or rot. The material is also environmentally friendly and BPA FREE – safe for growing edible plants

- The base of the SMART Modular Garden has a built-in channel system to funnel off excess water into the side storage tanks which also captures the soils nutrients

- Capillary watering provides constant moisture and nutrients directly to the root system promoting healthy root growth while reducing the amount of water needed

INDOOR/OUTDOOR – GROW PLANTS YEAR ROUND

EXCLUSIVE FEATURE!

INCLUDES CAPILLARY MAT SELF-WATERING SYSTEM

HOW CAPILLARY MATS WORK...

- EXCESS WATER** - accumulates in storage tanks at bottom of planter with total capacity of just over 5 gal (2.25 L)
- THE CAPILLARY MAT** - covers entire bottom of planter absorbing excess water for transferring to soil and plant roots
- PROTECTS PLANT ROOTS** - If tanks fill to over capacity (due to unforeseen rain or excessive watering), the overflow exits through drain hole in bottom of planter to root damage
