# NEW 2024 PRODUCTS

## Heavyweight Metal 8-Pattern Nozzle

metal

## SKU XT456

You can feel the quality and durability when you hold the Heavyweight Metal Flow Control Nozzle. The nozzle is designed to fit comfortably in the hand with soft rubber grips where you need them. Select the spray pattern with the front turret and control the on, off, and flow rate with one thumb control.

- » Heavyweight metal construction built to last
- » 8 Spray patterns for a variety of watering chores
- » Thumb-activated flow control
- » Ergonomic design
- » Metal sieve plate for added durability

## Quality and durability

### Heavyweight Metal

The heavy-weight construction is built tough to withstand the demand of everyday use.

### 8 Patterns

Choose from eight dynamic spray patterns for any outdoor cleaning and gardening chore.

### Thumb Control

The thumb-activated flow control and shut-off allows for one handed operation.

 FEATURES

### Mid-Size Adjustable Nozzle

### Mid-Size 8-Pattern Nozzle

### SKU MS100 & SKU MS101

Smaller in size, but big on impact! The mid-size metal nozzles are the perfect tool for any watering chore. The adjustable nozzle changes from a fine mist to a jet stream. The multi-pattern nozzle features eight spray patterns to fill a bucket then easily switch the spray pattern to water the flowers. The smaller size is the perfect fit for smaller hands. Turn the thumb control on and off without straining your hands or wrists.

- » These nozzles are perfect for general watering or cleaning tasks around the lawn or garden
- » Smaller size to fit smaller hands
- » Easy-to-use thumb control
- » Durable metal construction

### Smaller in size to fit smaller hands

**Easy-to-Use Thumb Control**  
No need to squeeze or lock a traditional trigger handle with the smooth thumb control.

**Hanging Loop**  
Store the nozzles in your garage using the helpful hanging loop.

**Insulated Grip**  
The insulated grip adds comfort in wet conditions.

Weave the hose around the base of your plants where water is needed most.

Soaker Hoses are a great way to conserve water. By slowly soaking only the areas you need, plants grow strong and lush with minimal run-off. Our Flat Soaker Hoses are easier to use than standard soaker hoses which are hard to bend and store. The flat design rolls up tightly to store in a small space and is available in three lengths: 25, 50 and 75 feet.

# Sunrise Timer

## Water daily without programming.

Here's a bright idea: A timer that automatically waters your lawn or garden every morning, at sunrise...with absolutely no programming. Watering in the morning is the best way to ensure healthy, lush plants. But, who wants to get up at the crack of dawn and do the task? Let Sunrise, the Once-a-Day Water Timer, do the job for you. Simply set how long you want to water and let Sunrise handle the rest. Set it and forget it.

## Sunrise Once-a-Day Water Timer

Your lawn and garden are watered

# HydroLogic Water Timers

Each watering area can have its own schedule.

Choose days to water and days to not.

Select up to 4 individual start times per day.

Easily skip watering when rain is in the forecast.

Keep up with your watering needs by automating your schedule. Melnor Hydrologic Water Timers let you automatically water the garden every morning and the lawn every few days. Easily select up to four separate start times on each valve to water exactly when you want. Each zone works like a separate timer, so the squash and sunflowers can be watered every morning while the lawn sprinkler comes on every few days. Avoid wasting water when it rains with the handy day rain delay to pause the watering schedule for up to 7 days.

# Bluetooth® Water Timers

SKU 93280

### Skip watering when rain is in the forecast

Stop your sprinkler from running in the rain. The delay feature allows you to pause the watering schedule for up to 7 days.

### Easily choose when and how long to water

Whether you need to water on specific days of the week or just every few days, flexible scheduling allows you to set exactly when and how long to water.

### Each watering area can have its own schedule

Each zone has its own schedule, so you can water your tomatoes every morning and your lawn every other day.

Use the free app on your smart phone or tablet to control all the programming on your Melnor® Bluetooth® Water Timer. You can manage one or multiple timers from the same app. Set-up is simple and offers completely flexible scheduling options to keep your lawn green and plants healthy all season long. You can personalize the app features specifically for your lawn and garden. Set custom device and zone names, create a password for security and add images of your unique watering areas.

# QuickConnect Systems

## QuickConnect™

▶ Make an easy switch between products without going back to the faucet to turn off the water.

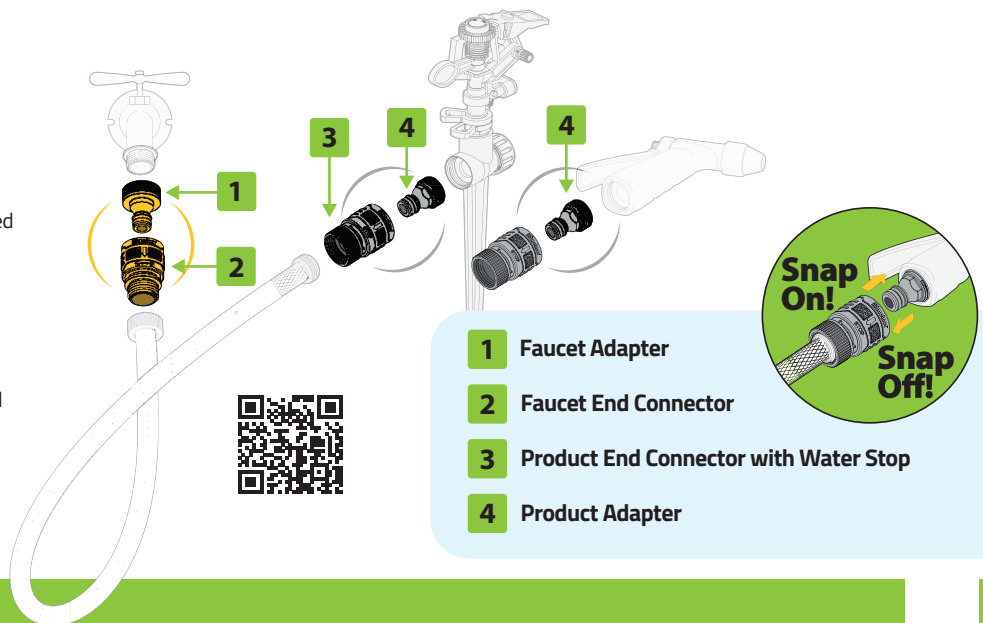

### Color-coding for ease-of-use!

#### Start using your QuickConnect™ System in a few easy steps:

Attach the Product End Connector onto the male (watering) end of each hose.  
Insert Product Adapters into your watering tools and easily snap them on or off your hose whenever you need them, even with the water running.  
Product End Connections are color coded gray for easy identification.

#### Make faucet connections just as easy:

Attach Faucet Adapter on each outdoor faucet.  
Attach Faucet End Connector to the female (faucet) end of the hose and snap into place on the Faucet Adapter.  
Faucet End Connections are color coded yellow for easy identification.

Melnor's QuickConnect™ system makes switching out watering tools fast and easy. Product adapters stay in place on your nozzles, wands, or sprinklers so you can quickly attach or switch out tools in a snap. You can even change tools while the water is running! Put one product adapter in your watering wand to water your hanging baskets and add one to your favorite adjustable nozzle to spray a larger area.
