About Pacific Northwest Organics

PNW Organics, founded in 2011, is a family-owned company with 20 years experience in organic fertilizer manufacturing. We are dedicated to making high-grade yet affordable certified organic products.

The Pacific Northwest is known for making outstanding nutrients producing high yielding plants for agriculture and gardeners alike that is why our main ingredients are sourced locally. PNW Organics is not only passionate about making environmentally conscious products but we also use energy efficient processing through a micro hydroelectric system resulting in zero emissions.

We also use a gravity water powered mechanical mixer. All this is done to guarantee we stay true to our mission of making the very best products for plants, soil, people, and the earth. All or our products can be used in a foliar and/or soil application

- ✓ Excellent for compost teas.
- ✓ Can be mixed with virtually any other inputs.
- ✓ Can be used anytime throughout the growing season.
- ✓ No toxic run off into riparian environments
- ✓ No phytotoxicity, no toxic effects on plant growth.

INGREDIENTS

Bull kelp, *Nereocystis luetkeana*, from the north coast of California, is the main ingredient in Kelp Help. The kelp lives its entire life immersed in the cold nutrient-rich waters of the Pacific Ocean. Pacific Northwest Organics, LLC uses a cold extraction process—no heat—to preserve the best kelp has to offer. To our kelp we add a humic acid extract (for immediate availability) and pure, Marble Mountain spring water. Our product is made with pure Marble Mountain spring water, straight from the heart of the mountains. Pure water, cold water processed kelp, and humic acid - nothing but the best ingredients for your plants!
