PROFESSIONAL
PRODUCT CATALOGUE **2021 • 2022**

CONSISTENCY

Premier Tech improves crop performance by adding life back into the plant root zone. We know that predictable results come from the highest standards. Our Sphagnum peat moss is free of pathogens and contaminants. It is also preferred for good water and nutrient retention, porosity and aeration. Our precisely controlled manufacturing systems and strict quality assurance result in consistent, high-quality products.

SERVICES

For more than 95 years, we are making a difference together. Our trusted specialized teams are dedicated to support you through your entire crop cycle. Our experts will provide you with a personalized service and will share their knowledge and passion.

TECHNOLOGIES

Our desire to innovate is driven by the technologies we master. Our teams of experts collaborate to maximize the outcomes of research in order to create innovative solutions and provide value-added biological active ingredients. These reliable ingredients are integrated into PRO-MIX® products, bringing life into your crop from our innovation DNA.

THE VALUE-ADDED COMBINATION

P PLANT

Nutrients and water are essential components for effective plant growth. By adding biological active ingredients, such as beneficial mycorrhizae and *Bacillus*, the early accessibility and efficient use of nutrients and water help plants reach optimum crop growth and yield.

UNTREATED WITH PREMIER TECH TECHNOLOGIES

ACTIVE INGREDIENTS WORK TOGETHER TO ENHANCE PLANT PERFORMANCE, QUALITY AND YIELD

Backed by more than 35 years of expertise in biological active ingredients, Premier Tech masters a unique large-scale manufacturing process in aseptic laboratories that meets the highest quality control standards allowing you to fully benefit from the added value integrated into PRO-MIX®. Proven consistency of viable spores, no contamination and reliable active ingredients. It's how we make a difference.

Learn more

M

MYCORRHIZAE +

PTB297 Technology, *Glomus intraradices*

Mycorrhizae are beneficial associations between a mycorrhizal fungus and roots. Mycorrhizal spores germinate in the growing medium and produce filaments (hyphae) which will enter into root cells. This association will allow the formation of an intra and extra-radical network of filaments that will explore the soil and access more nutrients and water, and transfer them to the plant.

- ✓ EXPAND ROOT SYSTEM GROWTH
- ✓ ENHANCE NUTRIENT & WATER UPTAKE
- ✓ INCREASE TOLERANCE TO STRESSES
- ✓ REDUCE TRANSPLANT SHOCK

B

BACILLUS

PTB180 Technology, *Bacillus pumilus*

Bacillus is bacterium that produces an antibiotic which helps suppress root rot diseases caused by *Fusarium*, *Pythium* and *Rhizoctonia*. It also secretes biostimulant molecules (auxins) to form a biofilm around the root system that ensures protection and induces the proliferation of the root hairs to favor the absorption of nutrients and water.

- ✓ ACCELERATES SEED GERMINATION & PLANT ESTABLISHMENT
- ✓ REDUCES NEED FOR FUNGICIDE DRENCHES
- ✓ STRENGTHENS PLANT DISEASE RESISTANCE

=

+ BIOFUNGICIDE™ MYCORRHIZAE™

ENHANCE
The use of fertilizer and water. Increase resistance to stresses. Improve plant strength and productivity. Optimize plant growth rate and uniformity.

PROTECT
By reducing incidence of plant root diseases (*Fusarium*, *Pythium* and *Rhizoctonia*) and risk of pathogens that develop resistance to chemical fungicides.

SUPPRESS
Certain insects, including fungus gnats and thrips that pupate into the growing media, by suppressing their food sources and plant susceptibility.

Exclusive to US, PRO-MIX® BIOFUNGICIDE™ + MYCORRHIZAE™, ENHANCE plant growth with MYCORRHIZAE™, PROTECT against root diseases caused by specific root pathogens, and also SUPPRESS fungus gnats and thrips. (EPA Reg #: 74267-4) Product availability may vary depending on the US region.

INGREDIENTS

1. SPHAGNUM PEAT MOSS

Sphagnum peat moss is a natural and organic, partially decomposed plant material comprised mostly of Sphagnum moss. This primary resource is carefully harvested from peat bogs with specialized vacuum harvesters. Sphagnum peat moss is available in various levels of fibrosity and decomposition. Careful grading ensures that the properties of each grade are optimized for a final product that satisfies stringent quality specifications.

2. PROCESSED PINE BARK

Processed pine bark consists of partially composted aged pine bark predominantly derived from red and southern pine species. The pine bark is screened, graded and processed, and then partially composted to improve and stabilize the carbon:nitrogen ratio.

3. COIR

Coco fiber, commonly called “coir”, is a natural product which comes from the exterior envelope of an aged coco fruit. We have carefully selected a material based on the following 3 types of properties to create a high-quality professional growing medium:

- Physical (particle type and size)
- Chemical (washed material with a very low salinity level)
- Microbiological (pathogen-free)

Chunk coir: Chunk coir provides an ideal balance between air porosity and water retention. This type of coir is ideal in drought conditions thanks to its water retention ability.

4. PERLITE

Perlite is an alumino-silicate ore of volcanic origin. The raw ore is crushed, graded, heat expanded and screened in various particle sizes. Perlite is a light-weight aggregate that has a high total porosity and improves both drainage and air porosity.

5. VERMICULITE

Vermiculite is derived from an aluminum-iron magnesium silicate mineral ore that is mined throughout the world. The raw ore is crushed, graded, heat expanded and screened in various particle sizes. Vermiculite has a high total porosity and has a good nutrient holding ability.

6. LIMESTONE

Limestone is used to adjust a growing medium’s pH to an optimum range. It is also a source of calcium and magnesium.

BX GENERAL PURPOSE

PRO-MIX® BX is the solution for growers seeking to benefit from both the nutrient retention ability of vermiculite and a perlite content providing air porosity and drainage. Combined with high-quality fibrous peat moss, this formulation is ideal for growers looking for a general purpose medium which creates a well-balanced growing environment.

INGREDIENTS:

- Canadian Sphagnum peat moss (75-85% by volume)
- Perlite – horticultural grade
- Vermiculite – horticultural grade
- Limestone (pH adjuster)
- Wetting agent

LP15 MULTI-PURPOSE

Designed to provide good water retention and flexibility for multiple purposes, PRO-MIX® LP15 is a growing medium formulated with a blend of fibrous peat moss and coarse perlite. Combined with cutting-edge active ingredients, PRO-MIX® LP15 will meet your expectations.

INGREDIENTS:

- Canadian Sphagnum peat moss (80-90% by volume)
- Perlite – horticultural grade
- Limestone (pH adjuster)
- Wetting agent

HP

HIGH POROSITY

With its high perlite content, PRO-MIX® HP provides a porous environment for growers wanting high air porosity, low water retention and good drainage. The added benefit of fibrous peat moss and coarse perlite makes this formulation ideal for growers who require a superior-quality product adapted to their needs for watering flexibility and crop seasonality.

INGREDIENTS:

- Canadian Sphagnum peat moss (65-75% by volume)
- Perlite — horticultural grade
- Calcitic and dolomitic limestone (pH adjuster)
- Wetting agent

FPX

PLUG AND GERMINATION

Providing an optimized growing environment is fundamental, especially when it comes to plugs and seed germination. Quality plugs and seedlings are essential for the success of future crops. PRO-MIX® FPX BIO-FUNGICIDE™ is well adapted for water-sensitive crops by providing low water retention levels and good air porosity for developing seedlings. BIO-FUNGICIDE™ is included to suppress root pathogens (*Fusarium*, *Pythium* and *Rhizoctonia*) that cause root diseases.

INGREDIENTS:

- Canadian Sphagnum peat moss — short fiber (80-90% by volume)
- Perlite — plug grade
- Calcitic and dolomitic limestone (pH adjuster)
- Wetting agent

CHOICE OF ACTIVE INGREDIENTS:

HPCC

HIGH POROSITY CHUNK COIR

For growers seeking high water retention, drainage and good air porosity, PRO-MIX® HPCC is the solution. A quality blend of fibrous peat moss, unique chunk coir and perlite. Chunk coir resists compaction and holds water for plant roots to access, combined with peat moss and perlite forming a growing medium that promotes plant growth and root development.

INGREDIENTS:

- Canadian Sphagnum peat moss (65-75% by volume)
- Chunk coir
- Perlite — horticultural grade
- Calcitic and dolomitic limestone (pH adjuster)
- Wetting agent

MP ORGANIK™

MULTI-PURPOSE

PRO-MIX® MP ORGANIK™ provides the perfect solution for growers in need of a growing medium certified for organic use that delivers well-balanced air/water qualities. This formulation is ideal for a variety of growing uses and is designed to meet crop requirements for certified organic growers. Enriched with active ingredients, this growing medium will not only improve the overall growth and yields of your crops, it will also increase your plants' resistance to environmental stresses and suppress root pathogens (*Fusarium*, *Pythium* and *Rhizoctonia*) that cause root diseases.

BRK

LOW WATER RETENTION

Formulated with a base of Sphagnum peat moss, processed pine bark and coarse perlite, PRO-MIX® BRK is well suited for growers who require low water retention and frequent dry down periods for their crops. Ideal for outdoor growing conditions subject to variable weather conditions and challenging growing environments. PRO-MIX® BRK is a carefully designed for high container stability and consistent, predictable results.

INGREDIENTS:

- Canadian Sphagnum peat moss (40-50% by volume)
- Processed red pine bark (35-45% by volume) coarse — screened at 1/2"
- Perlite — horticultural grade
- Calcitic and dolomitic limestone (pH adjuster)

BK25

MEDIUM WATER RETENTION

EXCLUSIVE TO EASTERN UNITED STATES

PRO-MIX® BK25 is a medium-weight growing medium designed for the cultivation of greenhouse horticultural crops. The combination of processed pine bark, Sphagnum peat moss and perlite makes for a general purpose product that provides good drainage and medium water retention capacity.

INGREDIENTS:

- Canadian Sphagnum peat moss (50-60% by volume)
- Processed southern pine bark (20-30% by volume) medium screened at 3/8"
- Perlite — horticultural grade
- Dolomitic limestone (pH adjuster)
- Wetting agent

BRK20

MEDIUM WATER RETENTION

PRO-MIX® BRK20 is a medium-weight growing medium that offers flexibility for growers. Combining the qualities of processed pine bark, professional-grade Sphagnum peat moss and perlite, PRO-MIX® BRK20 creates a favorable root zone environment that is suitable for greenhouse and perennial crops grown in medium-size containers.

INGREDIENTS:

- Canadian Sphagnum peat moss (60-70% by volume)
- Processed red pine bark (15-25% by volume) coarse — screened at 1/2"
- Perlite — horticultural grade
- Calcitic and dolomitic limestone (pH adjuster)

BK55

LOW WATER RETENTION

EXCLUSIVE TO EASTERN UNITED STATES

PRO-MIX® BK55 is a medium-weight growing medium designed for the cultivation of long-term greenhouse crops and perennials grown outdoors. The combination of processed pine bark, Sphagnum peat moss and perlite makes for a good air/water balance. The high percentage of bark adds weight, which is perfect for growers looking for container stability.

INGREDIENTS:

- Processed southern pine bark (50-60% by volume) coarse — screened at 1/2"
- Canadian Sphagnum peat moss (25-35% by volume)
- Perlite — horticultural grade
- Dolomitic limestone (pH adjuster)
- Wetting agent

PRO-MOSS® TBK / FINE PEAT MOSS

All of our professional peat moss has been selected under very specific and unique procedures which have ensured the consistency of PRO-MOSS® products year after year, bag after bag.

PRO-MOSS® TBK

PRO-MOSS® TBK is made of select long-fibered blond Sphagnum peat moss for general commercial use. It provides a high degree of water retention and air porosity for a wide range of applications.

INGREDIENT:

Select long-fibered blond Sphagnum peat moss

PRO-MOSS® FINE

PRO-MOSS® FINE is made of select short-fibered blond Sphagnum peat moss for seeding applications. It is specially processed to be used in the propagation of small-cell forestry seedlings, in the construction of golf greens/tees, and as a major component of germination media.

INGREDIENT:

Select short-fibered blond Sphagnum peat moss

MEGA PACKAGES

MEGA SIZE

PRO-MIX® offers large package options for the most efficient handling of professional growing media, at very competitive prices. Benefit from reduced labor costs, greater storage space, more efficient handling and less plastic/pallet waste!

MEGA BALE

The MEGA BALE is a 135 cu. ft. compressed bale, the largest package size on the market. It is a sealed plastic package that is airtight and waterproof to protect contents.

110 cu. ft. size available. Ask your sales representative for more information.

ADVANTAGES

- Consistent, predictable yield
- Maximum protection from external contaminants
- Less storage area required
- 22% less material handling vs. average competitive packages
- Yielding up to 5,500 cu. ft. of growing medium material per truckload
- Less plastic waste and reduced pallet disposal

SERVICES

Our **GROWER SERVICES** team provides professional growers with technical support, interpretation of analyses, and production guidelines. Every aspect of commercial greenhouse and nursery production is covered so you can be certain to get the most out of your PRO-MIX® products.

Our **SALES REPRESENTATIVES** across North America can share their passion and knowledge and help you get the right products for your operations.

Our **CUSTOMER SERVICE** offers support in English, French and Spanish. They are passionate and committed to create the best possible customer experience.

A DEDICATED COMPANY

Premier Tech is a leader of quality growing media products for edible, floriculture, and nursery crops. Thanks to its numerous manufacturing facilities and vast distribution network, products are offered throughout North America, from coast to coast.

A LEADING BRAND

Introduced in 1968, PRO-MIX® has always provided commercial growers and consumers with cutting-edge and value-added growing media products. PRO-MIX® growing media are enhanced with high-performance active ingredients and are considered a reference in the market, as they represent innovative and unique solutions. Fine-tuned for growers who seek efficiency, superior plant quality, disease suppression and resistance to environmental stresses, PRO-MIX® optimizes results.

For many years now, Premier Tech has used a very unique approach to peat moss gradation and selection. It has ensured consistency in the final product, which has set a high standard for the industry.

SUSTAINABLE SOLUTIONS

Sphagnum peat moss is an important component of growing media and the peatlands it comes from must be managed in a responsible way. Our sustainable management of this valuable resource ensures a long-term supply for our customers and for future generations.

PRO-MIX® improves crop performance by bringing life into the plant root zone with natural active ingredients. Its distinctive solutions incorporate biostimulants and biocontrols that enrich growing media and fortify plants in an ecological and responsible manner.

OUR COMMITMENT

We have created a solid bond with growers seeking the best. By using our ability to innovate and by paying careful attention to the growers' needs, it has become essential in our daily activities to incorporate something unique into both our products and the services we offer.

* 'D' designates deep tray ** Vegetable trays are injection molded. *** The outside dimensions of tobacco float trays are approximately 13 ½" x 26 ¼".
 Important Note: Please keep in mind that the figures and calculations presented here are approximate. All growing media will vary in volume, depending on the composition, the way in which they are prepared and the tray filling method used.

* Products with BIOSTIMULANT are only available in Canada.

PEOPLE AND TECHNOLOGIES MAKING A DIFFERENCE

Making a difference, this is what we are all about at Premier Tech. One team driven by a shared passion to deliver solutions that will better the lives of people, businesses and communities. At Premier Tech, People and Technologies connect in lasting, transformative ways, giving life to products and services that help feed, protect and improve our world. We are committed to creating sustainable solutions that help bring beautiful gardens to life, increase crop yields, improve the efficiency of manufacturing facilities, treat and recycle water, and much more as we keep innovating.
