Almost 40 years ago, what began as a family learning experience soon grew into a lasting passion for all things birding. As this hobby developed, we grew to notice the inadequacies of feeders and houses available, as well as the lack of innovation and support offered to independent specialty retailers. Being family owned and operated allows us to focus on innovative product launches, addressing gaps in the market, and finding emerging trends without sacrificing quality of finish or materials.

At Nature's Way Bird Products, we create distinctively advanced bird products.

Our **INNOVATIVE DESIGN** technology is combined with **SUPERIOR QUALITY** for ease-of-use and long-lasting durability. We are committed to bringing wildlife back to your yard in a sustainable, enriching and enjoyable way – just like nature intended!

Superior Quality

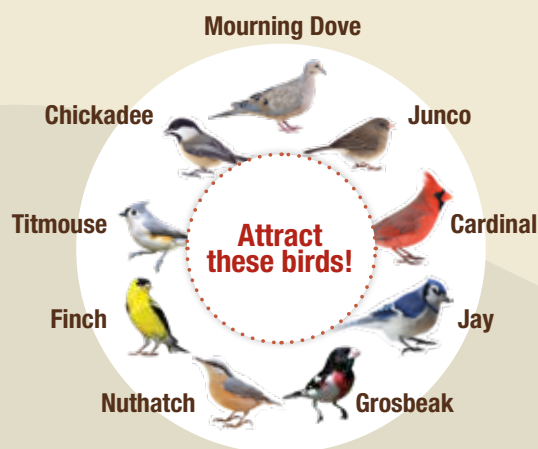

We understand that Mother Nature and Earth's creatures can create wear and tear on our products. That's why we take care to construct all our bird feeders and houses with premium materials to ensure our products can stand up to all types of weather.

Innovative Design

We are committed to the health and conservation of wild birds in our communities. Our innovative designs offer a unique combination of features that maximizes the experience for the birds and the birders, all while making it easy for consumers to clean and maintain our feeders.

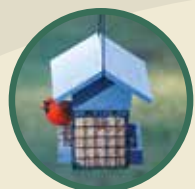

Customer Education

Whether our customers are first-time birders or avian aficionados, we believe that the first step to a successful birding journey is proper education. **Our product labels clearly and visually inform consumers of the best seed types and what kinds of birds to attract.** From where and how to hang their feeders to steps that keep them clean and maintained, we provide important care tips that will lead to a long and rewarding birding experience.

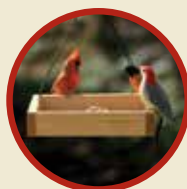

Product Assortment

Nature's Way manufactures a **complete selection of top-quality bird products** including cedar, bamboo, tube and nectar feeders as well as a variety of bird, bat and insect houses and birding accessories.
